The Society of the
New York Hospital.

ANNUAL REPORT
FOR THE YEAR 1910

CONTENTS

	PAGE
Governors and other Officers of the Corporation	3
Standing Committees of the Board of Governors	4
Medical Officers	5-8
Executive Officers	9
Endowed Beds	10-11
Donors to the Hospital	12
Annual Report of the Governors	15-17
Memorial to Joseph Edward Simmons	18
Memorial to James T. Woodward	19
Treasurer's Report	20-21
Report of the Superintendent of the New York Hospital and House of Relief	22-37
Report of the Medical Board	38-47
Report of the Superintendent of the Training School	48-50
Report of the Medical Superintendent, Bloomingdale Hospital	51-56
Report of the Ass't Sup't, Campbell Convalescent Cottages	57-59
Complete List of Governors with Terms of Service	61-67
Complete List of Officers of the Board of Governors with Terms of Service	68-69
Complete List of Physicians and Surgeons with Terms of Service	70-72
Members of the Society	73-85
House Physicians and House Surgeons (New York Hospital) 1792-1910	86-94
House Surgeons (House of Relief) 1875-1910	95-97
Medical Superintendents and Ass't Physicians (Bloomingdale Hospital) 1821-1910	98
Graduates of the Training School for Nurses (New York Hospital) 1878-1910	99-118

GOVERNORS.

GEORGE L. RIVES.....*President.*
HOWARD TOWNSEND.....*Vice-President.*
EDWARD W. SHELDON.....*Treasurer.*

JOSEPH H. CHOATE,
WILLIAM W. HOPPIN,

1908	BETSY HEAD	13,150.97
1910	MARGARET J. P. GRAVES	10,000.00
1910	JAMES T. WOODWARD	10,000.00

TO THE LEGISLATURE OF THE
STATE OF NEW YORK

The Governors of the Society of the New York
Hospital respectfully present their Annual Re-
port of the state of the Institutions under their
charge for the year 1910, as required by law.

ANNUAL REPORT

OF THE

GOVERNORS OF THE SOCIETY OF THE NEW YORK HOSPITAL FOR THE YEAR 1910.

In conformity with the provisions of its charter, granted by Royal authority June 13, 1771, in the reign of King George III, the Governors of the Society of the New York Hospital present their Annual Report, consisting of the report of the Treasurer and of the several institutions under their control and management, as follows:

The Hospital at Fifteenth Street, the Private Hospital at Sixteenth Street, the House of Relief at Hudson Street, the department for the treatment of mental diseases, known as Bloomingdale Hospital, and the Convalescent Cottages at White Plains, Westchester County.

The number of individuals who received care and treatment in all departments during the past year was 66,935 as compared with 63,709 for the year 1909, divided as follows:

	1910	1909
NEW YORK HOSPITAL, FIFTEENTH-SIXTEENTH STREETS:		
In Wards	13,321	11,032
Private Rooms	510	440
Out-Patient Department	17,690	16,720
Treated by Ambulance Surgeons and not brought to the Hospital	2,895	1,809
	<u>34,416</u>	<u>30,001</u>
HOUSE OF RELIEF, HUDSON STREET:		
In Wards	2,792	3,015
Out-Patient Department	26,557	28,191
Treated by Ambulance Surgeons and not brought to the Hospital	1,952	1,462
	<u>31,301</u>	<u>32,668</u>
BLOOMINGDALE HOSPITAL, WHITE PLAINS:		
Psychopathic Department	478	476
CONVALESCENT COTTAGES, WHITE PLAINS:		
Men	90	89
Women	227	159
Children	423	317
	<u>740</u>	<u>564</u>

The most important transaction of the past year has been the determination of the Governors to remove the main Hospital from Fifteenth to Fifty-fourth Street.

The reasons for the abandonment of the present site are, briefly, that it lacks sufficient air and sunshine; that it has become inadequate both in size and facilities for the efficient performance of the work of the Hospital; that these defects are increasing; and that they seem to be practically irremediable. The present buildings were opened for use in 1877 and during the thirty-four years that have elapsed, the locality has wholly changed in character. It was then a good residential neighborhood. It is now given over to business of various kinds, largely the wholesale manufacture of clothing. Buildings fourteen or fifteen stories high have been erected in immediate proximity to the Hospital, and these buildings not only cut off light and air, but add very materially to the risk of fire. Additional land in the neighborhood cannot be procured except at very high and indeed prohibitive cost.

The proposed new site embraces the entire block between Fifty-fourth and Fifty-fifth Streets and Eleventh and Twelfth Avenues. On its south side it faces for eight hundred feet (or about double the length of the north side of Madison Square) on DeWitt Clinton Park; and its westerly end looks out upon the Hudson River, from which it is only separated by a wide avenue. It will thus be seen that there will be an abundance of sunshine and air, and that on so large a site there will be the most ample opportunity for future expansion.

The pressure for additional space may be estimated from the fact that in 1909 the total number of individuals who received care and treatment in the several branches of the Society's work was 63,709; in 1910, it had risen to 66,935. This is an increase of nearly five per cent. over the exceptionally large work of 1909.

Taking the Fifteenth Street Hospital alone, the increase in almost every item of comparison has been very striking. Thus the total number of patients treated during the year (excluding the out-patient department) has grown from 11,472 to 13,831; the total days of Hospital care from 80,551 to 86,874; the total number of days of patients in private rooms from 8,078 to 8,681; the number of ambulance calls from 4,286 to 5,237; and the number of patients treated in the out-patient department from 16,720 to 17,690. These figures indicate, more clearly than anything else, the greatness of the opportunity of service which this Society has before it.

During the past year every effort has been made to conduct the work of the Society on the most economical basis consistent with entire efficiency. The result has been that the expense of conducting the main Hospital was less than the year before, in spite of a general increase in the cost of food and the very marked

increase in the number of patients cared for. The per capita cost for patients at this Hospital has been substantially decreased and is now much less than it has been in any previous year.

For more than a generation, the Society of the New York Hospital has had means sufficient to conduct its work without appealing to the public. The construction of a new and thoroughly modern Hospital will evidently require additional funds, either in the way of gifts for buildings, or of endowment for maintenance. The sums needed will be large; but the Governors feel confident that the oldest hospital in this city will be supported in its step forward by all who appreciate its one hundred and forty years of conservative management. The opportunities of the new Hospital in caring for the sick, and in promoting education and research, will only be limited by the amount of the means available for carrying on this beneficent work.

During the past year the Society has lost by death two of its Governors: J. Edward Simmons and James T. Woodward (both of whom were at the head of very important banking institutions in this city). Appropriate resolutions were adopted by the Governors expressing their appreciation of the loss sustained.

The resignation of Dr. Samuel W. Lambert, Attending Physician to the Hospital, was received and accepted by the Board with regret during the early part of the year. Dr. Lambert was appointed Attending Physician in 1896 and served with distinction during the fourteen years of his incumbency.

The Governors gratefully acknowledge the following gifts received during the past year:

A legacy of \$10,000 from Mrs. Margaret J. P. Graves; a legacy of \$10,000 from James T. Woodward; and \$5,000 from Mrs. Elizabeth Fisher King for endowing a bed in the Hospital in memory of her late husband, Edward King, for many years a Governor of the Hospital.

The By-Laws of the Society provide for placing tablets in the main Hospital building, bearing the names of all the donors to the Hospital of sums not less than five thousand dollars; and it has seemed fitting that a permanent record of that kind should be supplemented by printing the list of such donors with this annual report. There is not sufficient space to include in this report the names of the many generous donors of sums less than \$5,000, but it is proper to state these donations aggregate \$229,927.51, dating from 1795. It is interesting to observe how wide an appeal the work of the New York Hospital has made in the past, and what very notable sums have been contributed to its support.

HENRY W. CRANE,
Secretary.

GEORGE L. RIVES,
President.

NEW YORK, February 7, 1911.

In Memoriam.

JOSEPH EDWARD SIMMONS.

Died August 5, 1910.

JOSEPH EDWARD SIMMONS, a member of the Board of Governors of the New York Hospital, died at his country home at Lake Mohonk, New York, on August 5th, 1910, in the sixty-ninth year of his age.

Mr. Simmons was elected a member of the Society of the New York Hospital in 1891, and a member of the Board of Governors in 1892. He served continuously as Treasurer from 1897 to 1908, and upon his retirement from this office resolutions thanking him for his distinguished services were placed upon the record of the Board.

It is fitting, therefore, at this time that we, his surviving associates, should inscribe upon our minutes our deep appreciation of his high character, distinct ability and many services. Possessed of an unusually charming personality, and gifted with rare judgment and a high sense of what was due from him to his associates in the many important institutions over which he was called to preside, his death comes as a peculiar loss to the community in which he has so long resided.

To this Institution Mr. Simmons gave his best efforts and his fullest sympathy, and it is worthy of record that the good influence which he exercised and the high example which he set have been in consonance with the importance of the interests which he so faithfully served.

The Board of Governors in adopting these Resolutions desire to make expression of their appreciation of the loss which they have sustained; and it is

RESOLVED, That a copy of this minute, suitably engrossed, be forwarded to the members of Mr. Simmons' family.

Extract from the minutes of the Board of Governors, October 4, 1910.

In Memoriam.

JAMES T. WOODWARD.

Died April 10, 1910.

JAMES T. WOODWARD, a Governor of the New York Hospital, died at his residence in this City on Sunday, the 10th of April, 1910, after a short illness.

Mr. Woodward, though a native of Maryland, had been a resident of New York for upwards of forty years. After a successful career as a merchant, he assumed in 1877 the office of President of the Hanover National Bank, which he raised from comparative unimportance to be one of the principal financial institutions of the Metropolis.

In 1907, he was elected a Governor of this Hospital, having been a member of the Society since 1883. His keen interest in our charitable work, his alert intelligence and his long and varied business experience enabled him to render the most valuable services. During his too brief tenure of office, he was always ready, notwithstanding many other urgent demands upon his time, to undertake whatever he was called upon to do in behalf of the Hospital.

The Board of Governors of the Society of the New York Hospital, deeply regretting the loss of this wise, experienced and courteous colleague and friend, direct that the foregoing be entered upon the minutes of the Board, and that an authenticated copy be sent to the family of Mr. Woodward.

Extract from the minutes of the Board of Governors, May 3, 1910.

TREASURER'S REPORT.

RECEIPTS FOR THE YEAR 1910.

REPORT OF THE SUPERINTENDENT, JANUARY, 1911

TO THE BOARD OF GOVERNORS:

January, 1911.

Gentlemen:—I beg to submit the following report:

COMPARATIVE STATEMENT OF OPERATING EXPENSES FOR THE YEARS 1909 AND 1910. FIFTEENTH-SIXTEENTH STREETS.

ADMINISTRATION EXPENSES.

	1910.	1909.
Salaries, officers and clerks.....	\$19,110.92	\$25,010.82
Office expenses.....	661.87	644.50
Stationery, printing and postage.....	2,447.19	2,169.99
Telephone and telegraph.....	2,507.77	2,028.37
Miscellaneous.....		92.85
Hospital Bureau standards and supplies.....	1,000.00	
Total Administration Expenses.....	\$25,727.75	\$29,946.53

PROFESSIONAL CARE OF PATIENTS.

SALARIES AND WAGES:

Physicians.....	\$3,000.00	\$3,034.00
Superintendent of nurses, assistants and instructors.....	5,381.07	3,681.00
Nurses.....	18,717.90	20,107.27
Special nurses.....	678.51	1,255.36
Orderlies.....	10,165.72	10,228.37
Ward employees.....	2,908.00	1,680.00
Private patient building employees.....		1,266.00
Seamstresses.....	\$40,851.20	702.70
		\$41,954.70

EQUIPMENT FOR NURSES:

Uniforms.....	162.45	
Books.....	24.40	21.40
Tuition fees.....	749.00	935.85
		21.40

MEDICAL AND SURGICAL SUPPLIES:

Apparatus and instruments.....	1,305.65	1,404.88
Medical and surgical supplies.....	13,075.39	13,646.55
Alcohol, liquors, wines, etc.....	748.25	15,129.29
		1,109.67
		16,161.10

DISPENSARY:

Salaries and labor.....	2,410.00	4,988.72
Supplies.....	3,901.26	6,311.26
		4,834.35
		9,823.07

EMERGENCY WARD.....	2,273.28	
CONVALESCENT RELIEF.....	2,850.00	1,374.87
X-RAY.....	2,070.91	
		\$69,335.14

Less cash received from nurses for uniforms....		209.70
---	-------	--------

Total Professional Care of Patients.....	\$70,426.79	\$69,125.44
--	-------------	-------------

DEPARTMENT EXPENSES.

	1910.		1909.	
AMBULANCE: Labor.....	\$917.37		\$779.30	
Supplies.....	5,228.22	\$6,145.59	815.71	\$1,595.01

Female.....	12			11	
		24		17	
Total.....		193		188	

*Includes cases treated in Reception Ward.

TOTAL PATIENT DAYS TREATMENT:	1910.	1909.
Free Ward.....	58,281	53,710
Endowed Bed.....	564	240
Pay Ward.....	11,121	12,218
Private Room.....	8,681	8,078
Private Room, Staff and Nurses.....	518	695
Total.....	79,165	74,941

NOTE. The above figures for 1909 differ from the figures for the same year in the previous report, as in above figures the cases treated in the Emergency Ward are not included. This is true also of the above figures for 1910.

PERCENTAGE:		
Free Ward Days.....	.74	.69
Endowed Bed Days.....	.01	.01
Pay Ward Days.....	.14	.19
Private Room Days.....	.10	.11
" " " Staff and Nurses.....	.01	
Total.....	.100	.100

AVERAGE NUMBER OF PATIENTS TREATED PER DAY:		
Free Ward.....	159	149
Endowed Bed.....	2	1
Pay Ward.....	30	33
Private Room.....	23	20
" " " Staff and Nurses.....	2	
Total.....	216	203

Average time per patient in Hospital Wards..... 12 13
Daily average cost per patient..... \$2.68 \$3.07
Daily average cost per private room patient..... 4.55 5.57+
Daily average cost per ward patient..... 2.44 2.74+

This cost for both ward and private patients was arrived at by a schedule of percentages adopted after conference by the Hospital officials.

Emergency Ward.

Patients under treatment first of year, Male....	0	1
Female...	0	0
	0	1
Patients admitted during year, Male.....	6,423	4,788

Articles sold	2,717.50	3,537.33		819.83
Out-patient department	7,700.75	7,119.65	581.10	

THE COST OF MAINTENANCE.

The total cost of maintenance of the Hospital for the year was \$6,434.41 less than for the preceding year, owing in part to certain salaries, amounting to \$4,838.72, charged to corporation expenses in 1910, being carried in Hospital expenses in 1909. Coming as it did in a year when the cost of commodities ruled high and the work done by the Hospital was the largest in its history, any decrease in expenditures is very gratifying.

Owing to changes in bookkeeping, the expenditures of 1910 are not comparable in all particulars with those of 1909. Certain salaries formerly charged to administration expenses are now carried as corporation charges. All salaries of the apothecary's department are now included under administration expense. The salaries of visiting and convalescent relief nurses appear for the first time as a separate charge. The expenses of the X-ray department were formerly charged to photography—this year the two accounts have been separated.

The average per capita cost for all patients this year was \$2.68, compared with \$3.07 in 1909 and \$3.25 in 1908. The per capita cost for ward patients was \$2.44 and for private patients \$4.55, contrasted with \$2.74 and \$5.57, respectively, in 1909.

ADDITIONS AND BETTERMENTS.

The additions and betterments made during the year included among others the following:

The rooms on the Fifteenth Street side of the Hospital formerly occupied as offices were converted into wards for children.

The Hospital offices were removed to the Administration Building on Sixteenth Street.

The Fifteenth Street entrance was closed.

The paint shop was moved to that part of the stable which was formerly occupied by the horses. A large amount of painting was done at the Hospital and House of Relief.

The Reception Ward was converted into a regular hospital ward, and the number of beds increased by three.

Two rooms in the basement were equipped for the isolation of noisy patients.

A considerable amount of plumbing was done, including new utensil sterilizers in the operating room and in the children's wards, typhoid sinks in the medical wards, porcelain bathing slab in the children's ward, and a bathtub in the old reception ward.

A new steel elevator car was installed in the Hospital Building.

The floors, ceilings and walls of the refrigeration rooms in the butcher shop were covered with white tiles.

The ambulance equipment was increased by one electric ambulance, making three in all.

CHILDREN'S WARDS.

The offices on the Fifteenth Street side of the Hospital were converted into wards for children. Six wards, with a total capacity of twenty beds, were thus obtained.

These wards, being small, enable the physicians to better classify their patients, and furthermore, when a case of contagious disease occurs only a few children are exposed to the contagion.

The lack of isolating facilities was formerly a great handicap to this service, as it was necessary to close our only ward for children every time a case of contagious disease occurred.

We now have a thoroughly up-to-date department for children, with a total capacity of about 45 beds.

HYDRIATIC DEPARTMENT.

In this department treatment is furnished free of charge to ward, private room, and out-patients.

Men and women are treated on alternate afternoons. Expert operators are in constant attendance.

The average daily number treated in 1910 was 9+, being the same as in the year 1909.

The number treated during the year is as follows:

	Male.	Female.	Total.	From Wards.	From O. P. Dept.	Total Treat- ments.	Average Treat- ments Day.
January	24	22	46	1	47	215	8+
February	32	26	58	..	58	249	11+
March	31	29	60	4	56	333	12+
April	29	..	29	2	52	302	11+
May	24	22	46	1	45	297	11+
June	25	31	56	3	54	353	13+
July	22	28	50	5	45	213	8+
August	20	18	38	2	36	190	7+
September	25	20	45	3	42	215	8+
October	23	20	43	2	41	228	8+
November	24	21	45	3	42	174	7+
December	22	18	40	..	40	229	8+
Totals	301	255	556	26	558	2,998	9+

X-RAY DEPARTMENT.

The work of this department is steadily increasing.

The following table shows the separate radiographs taken. As a large proportion, however, demanded more than one view, it is estimated that the total number was about 2,800:

Head	28
Neck	15
Thorax	113
Shoulder	76
Upper arm	43
Elbow	102
Forearm	45
Wrist and hands	279
Abdomen	243
Pelvis and hips	140
Thigh	37
Knee	79
Leg	59
Ankle	81
Foot	61
Total	1,401

OUT-PATIENT DEPARTMENT.

The work in this Department was larger than in 1909. The number of new patients, the number of visits, and the number of prescriptions all showed substantial increases. The average cost per Dispensary patient was 23 cents, as against 31 cents in 1909.

The work of the year was as follows:

	1910.	1909.	Increase.
New patients.....	17,690	16,720	970
Total visits.....	65,698	63,184	2,414
Total prescriptions issued.....	45,475	43,117	2,358
Total receipts.....	\$7,775.00	\$7,119.65	\$655.35

The distribution of milk and eggs to needy tubercular patients has been as follows:

	1910.	1909.
Eggs, dozen.....	1,746½	1,966¼
Milk, quarts.....	7,285	7,932
Cost.....	\$1,005.74	\$1,219.88

CONVALESCENT RELIEF DEPARTMENT.

This department, under Miss Sutcliffe's supervision, has increased its activities during the year. It is accomplishing much good. Not only does it render assistance to convalescent patients and their needy families, but it enables the Hospital to increase its service to the community by the prompt removal of convalescent patients from the Wards.

Formerly these patients might remain several days in the Hospital after they were ready for discharge, for the reason that they had no suitable place to go. The beds they were occupying without benefit to themselves were needed by sick people.

The total number cared for by this department since April was 658. Of these 98 were from the Out-Patient Department, while the others were from the wards, or connected with ward patients.

The wards are visited frequently. The homes of those who seem to need help are also promptly visited. Most cases are referred to other institutions or organizations, immediate relief being given only when absolutely necessary.

The following statement of the disposition made of cases shows the scope and character of the service rendered.

Referred to Convalescent Hospital.....	195
Referred to country.....	255
Referred to Asylum.....	9
Referred to Day Nurseries.....	10
Referred to Temporary Homes.....	12
Referred to Charity Organizations.....	68
Referred to Tuberculosis Hospitals.....	12
Referred to other hospitals.....	17
Dressings and Treatments.....	252
Car Fares.....	68
Surgical Belts and Shoes.....	12
Clothing.....	70
Emergency relief.....	20
Miscellaneous.....	17
Refused help after arrangements were made.....	24

On both Thanksgiving and Christmas, dinners were distributed to the families of patients. A Christmas Tree and an entertainment were also provided for them, about 250 attending.

PRIVATE SERVICE.

The capacity of this department was decreased by ten rooms by the closing of the fifth floor of the Private Patient Building to patients. This was necessary in order to provide additional accommodations for nurses, the Nurses' Home being inadequate.

We now have only 25 rooms for private patients, which number does not meet the demand.

During the first five months of the year the daily average of private patients was 32.

HOSPITAL RECEIPTS.

The receipts from private patients were \$1,599.50 greater than in 1909. Owing to a reduction in the number of rooms allotted to this department it is expected that the year 1911 will show a marked decrease in income.

The receipts from ward patients showed a decrease of \$1,646.76. The gradual decrease in receipts from ward patients can be accounted for by the increase of our ambulance service. About 40 per cent. of the patients are brought to the Hospital in our ambulances, practically all of whom are treated gratuitously.

HOUSE OF RELIEF.

Total Operating Expenses.....	\$43,349.38	\$48,984.45

THE YEAR'S WORK.

This institution continues to do most excellent work. Great numbers of patients are cared for in limited quarters, and at comparatively small expenditure. The doors are never closed to the sick and injured, regardless of whether or not they belong to the so-called emergency class. As a result the service is an intensely active one.

The number of ambulance calls was 440 greater than in 1909.

The number of ward patients admitted was 257 less than last year. This was due largely, if not entirely, to the transferring of more patients to Bellevue Hospital direct from the scene of call, instead of bringing them first to the House of Relief, entering them as patients, and making the transfer later.

There was a decrease in the number of patients treated in the dispensary. This is thought to be due largely to increased and improved dispensary facilities elsewhere in this section of the city.

The maintenance expenses were \$5,635.07 less than in 1909, and \$6,217.98 less than in 1908. On the other hand, the income was \$2,593.96 greater than in 1909.

Complete details of the medical and surgical work done will be found in the report of the Medical Board.

Subjoined is a brief résumé of the year's work.

STATISTICS.

PATIENTS IN HOUSE OF RELIEF THE FIRST OF THE YEAR:		1910.	
Medical, Male	18		
Female	3		
			21
Surgical, Male	8		
Female	5		
			13
Total			34
PATIENTS ADMITTED DURING THE YEAR:			
Medical, Male	1,297		
Female	256		
			1553
Surgical, Male	1,042		
Female	163		
			1,205
TOTAL PATIENTS TREATED DURING THE YEAR:			
Male	2,365		
Female	427		
			2,792
PATIENTS DISCHARGED DURING THE YEAR:			
Cured	209		
Improved	2,172		
Unimproved	148		
Died	230		
			2,759
PATIENTS IN HOSPITAL END OF YEAR:			
In Medical Wards, Male	17		
Female	3		
			20
In Surgical Wards, Male	8		
Female	5		
			13
Total			33

	1910.	1909.
New patients treated in the Out-Patient Department.	26,557	28,191
Total patients' visits made to Out-Patient Department	56,802	64,526
Total days of hospital care	13,883	13,748
Total days of pay patients	856	727
Total days of non-paying patients	13,027	13,021
Percentage of free patients	94.7	94.7
Average daily census	38	37+
Average days per patient	5	4+
Number of major operations	246	182
Number of deaths	230	277
Total prescriptions	26,332	40,441
Receipts from ward patients	\$2,322.33	\$1,798.29
Receipts from out-patients	5,571.28	3,715.79
Miscellaneous receipts	537.45	323.02
Total receipts	8,431.06	5,837.10
Approximate daily average cost per patient	1.87	2.16

AGGREGATE SERVICE.

The total number of individuals receiving relief at the hands of the Hospital (including the House of Relief) was 65,717. They were distributed as follows:

	1910.	1909.
At the Hospital.....	34,416	30,001
At the House of Relief.....	31,301	32,668
Total.....	65,717	62,669

Seventy-five per cent. of those who were admitted to the Hospital wards received gratuitous treatment (not including 7,709 treated in the Accident Room, all of whom were treated without charge).

At the House of Relief 94.7 per cent. were treated free.

AMBULANCE SERVICE.

A third electric ambulance was added to the Hospital equipment. The horse-drawn ambulances were done away with at the Hospital, but are still in use at the House of Relief.

The number of calls at the Hospital were greater than those of last year by 951, and at the House of Relief by 440.

The average daily number of calls at the Hospital was approximately 14, compared with 11 in 1909, and 8 in 1908.

The average daily number of calls at the House of Relief was 13, compared with 12 last year.

The details of the service are as follows:

	Hospital.		House of Relief.	
	1910.	1909.	1910.	1909.
Total calls.....	5,237	4,286	4,993	4,553
Brought to Hospital.....	1,986	2,301	2,146	2,456
Treated and left at place of call.....	1,447	729	1,952	1,462
Taken from scene of call to other hospitals, precincts or home.....	1,448	1,080	569	358
Dead on arrival.....	146	142	132	126
Nothing found at place of call.....	210	94	194	151
Transferred to other hospitals.....	139	118	1,528	1,480

PURCHASING BUREAU.

A new departure this year was the organization of the Hospital Bureau of Standards and Supplies, on lines laid down by Mr. W. V. S. Thorne, Treasurer of the Presbyterian Hospital, in a pamphlet entitled "A Central Purchasing Agency for the Hospitals of New York."

At the close of its fiscal year the bureau had a membership comprising 12 hospitals and Columbia University.

The New York Hospital is a member of the Bureau.

For several months most of our supplies, both for the New York Hospital and the House of Relief, have been obtained on contracts made by Mr. W. J. Forbes, purchasing agent of the Bureau.

The organization has not existed long enough to permit of definite predictions as to the part it is likely to play in the field of hospital economics, but the indications are that it will become a useful agent.

Increased membership will enhance the usefulness of the Bureau by reducing the proportionate expense to each member, and by increasing its purchasing capacity.

NEED OF INCREASED FACILITIES.

The year of 1910 was the most active in the history of the Institution. More patients were treated in the wards, in the dispensary, and in the emergency department than ever before. The number of ambulance calls and the number of operations showed marked increase.

The demands on the Hospital have been gradually increasing year by year. It has been necessary to resort to numerous make-shifts in order to meet these demands.

CHANGES IN ACCOUNTING DEPARTMENT.

A simple and more direct system of accounting was installed during the past year. In most ways it is more effective than was the old one, which was rather cumbersome, and it is more economical to maintain.

In a general way it conforms with the Uniform System of Accounting which has been adopted by a considerable number of hospitals in New York and other cities.

CONVALESCENT COTTAGES.

The facilities offered by the Campbell Cottages at White Plains have been very much in demand.

Patients are sent there from the Hospital, the Dispensary, and the Convalescent Relief Department.

The new isolation ward has done away with the tedious periods of quarantine which formerly limited the usefulness of this department.

The cottages, except that for men, are now kept open throughout the year.

During the year 423 children and 227 women received the benefits of the institution. Of the children discharged, 105 were cured, 250 improved, 28 unimproved, and 3 died.

Details of the work done appear elsewhere in this report under the heading "Campbell Convalescent Cottages, Bloomingdale Hospital Report."

GIFTS.

The Hospital has been the recipient during the year of a large number of donations, such as books, toys, flowers, fruit, etc. These gifts while ordinarily inexpensive have as a whole assisted much in rendering hospital life more attractive, especially for the children. We desire to encourage these donations.

We are under renewed obligations to the Employment Society of St. Thomas' Church for a large amount of sewing done without expense to the Hospital.

Respectfully submitted,

THOMAS HOWELL,
Superintendent.

REPORT OF THE MEDICAL BOARD OF THE NEW YORK HOSPITAL FOR THE YEAR ENDING DECEMBER 31, 1910.

To the Board of Governors:

GENTLEMEN:—The number of individuals who received care and treatment in the wards and private rooms of the New York Hospital during the past year was 34,416, as compared with 30,001 treated for the year 1909.

These are divided as follows:

	1910.	1909.
In the wards.....	13,321	11,032
In the private rooms.....	510	440
In the Out-Patient Department.....	17,690	16,720
Treated by the Ambulance Surgeons but not brought to the Hospital.....	2,895	1,809
	<u>34,416</u>	<u>30,001</u>

Of the 13,831 patients, 7,709 were treated in the Accident Room during the hours when the Out-Patient Department was closed. 6,122 patients including the patients remaining in the Hospital at the beginning of the year were treated in the wards and private rooms. Of the number, 1,976 were treated in the Medical wards. The principal diseases and their number is as follows:

Alcoholism.....	34
Arteriosclerosis.....	33
Bronchitis.....	33
Cerebral hemorrhage.....	24
Cirrhosis of the liver.....	16
Endocarditis.....	117
Epilepsy.....	34
Exophthalmic goitre.....	5
Malarial fever.....	34
Typhoid fever.....	101
Gastritis.....	53
Gastroenteritis.....	98
Meningitis.....	26
Myocarditis.....	26

Nephritis.....	57
Neurasthenia.....	17
Pleurisy.....	40
Lobar pneumonia.....	162
Gas poisoning.....	9
Pulmonary tuberculosis.....	44
Articular rheumatism.....	105
Tonsilitis.....	19

In the Surgical Wards 3,465 were treated for the following diseases or injuries:

Fractures of the skull.....	45
Gunshot wounds.....	14
Dislocations.....	19
Fractures of long bones.....	227
Appendicitis.....	295
Hernia.....	262
Cancer.....	70
Other malignant tumors.....	13
Non-malignant tumors.....	107
Concussion of the brain.....	32
Disease of liver and gall bladder.....	27
Disease of kidney.....	25
Salpingitis.....	62
Ectopic gestation.....	15
Disease of prostate and bladder.....	32
Disease of the uterus.....	151
Empyema of pleural cavity.....	26
Hæmorrhoids.....	76
Disease of the rectum and anus.....	104
Stricture of the urethra.....	14

In the private patient pavilion 510 patients were treated. In 1909, 440 patients were treated in the same pavilion. The number of operations performed was 271 as compared with 288 during the preceding year. The number of medical and operative surgical cases treated was 239.

The operative work in the main hospital has increased some 301 cases—1810 operations were performed as compared with 1509 during the year 1909. Our ambulance service has also increased to the extent that 5,237 calls were made with 139 ambulance transfers. This is an increase of 951 calls and 21 transfers over last year's work.

Our daily calls and transfers now average 14 or 15, and this has

necessitated the assignment of the Medical Staff to a part of the ambulance service.

This arrangement is now in full force and all calls and transfers are answered without delay. Of the patients discharged during the year 2,378 were cured, 2,678 were improved, 275 were unimproved, 138 were transferred to other institutions, and 460 died. The work done in the Out-Patient Department may be seen in the following table:

	1910.	1909.
New patients.	17,690	16,720
Total number of visits.	65,698	63,184
Total number of prescriptions.	45,475	43,117

This work is distributed between the Medical and the Surgical Departments of the Dispensary as follows:

SURGICAL DEPARTMENT, daily 10 A.M. to 12 M.
except Sunday:

	1910.	1909.
New patients.	11,238	10,625
Total number of visits.	44,617	43,400

MEDICAL DEPARTMENT, daily, 2 P.M. to 4 P.M.,
except Sundays.

	1910.	1909.
New patients.	6,452	6,095
Total number of visits.	21,633	19,784

The work of the Tuberculosis Department of the Dispensary has progressed most favorably. It has been greatly helped by the two extra nurses assigned to one part of the work by the Department of Health.

The total number of tuberculous patients seen in the Out-Patient Department was 622, of which 498 were regularly treated and 124 were referred to other Hospitals, sanatoria or clinics. Of the number regularly treated 14 died. The total number of visits made by these patients to the Dispensary was 2,214 and the daily average of visits was 7.

The Orthopædic Department of the Dispensary under Drs. Fiske and Steinhardt has greatly improved during the last year and the services of the masseur with his assistants assigned for the first time in 1909 have proved of the greatest value in the disability following dislocations and fractures and in the contractures following cellulitis of the forearm and hand.

The Department of Thermo-therapy and Hydro-therapy have been more consistently used by the patients of the Out-Patient Department than by the patients in the wards.

The work of the Pathological Department of the Hospital during the last year has increased somewhat over that of the preceding year. The number of autopsies performed at the New York Hospital during 1910 was 122 as against 90 in 1909. At the House of Relief there were 39 autopsies in 1910 as against 59 in 1909. The bacteriological examinations were 1150 in 1910 and 947 in 1909. The histological examinations were 806 in 1910 and 705 in 1909. At the New York Hospital during the last year there were 459 deaths with 122 autopsies, i.e., 26.4% of the total deaths. This is 7.2% better than the preceding year. It exceeds all other Hospitals except Roosevelt Hospital, which it practically equals.

In the House of Relief on the contrary the total deaths were 229 with 36 autopsies, i.e., 15% as compared with 27% during the last year. This loss is due to the smaller number of Coroner's cases and to the fact that many of our patients are Italian, Greeks and Hungarians, with whose relatives no one is able to converse fluently enough to obtain the necessary permission. It is urgently requested that some one be employed in the administrative department who can talk intelligently to these people, as autopsies are most essential to the proper advance of the medical and surgical work of the Hospital. It is greatly regretted that both time and expense have prevented our keeping animals in the laboratory. For this reason but few Wassermann reactions have been made during the year. This is a matter of extreme importance and it is hoped that it will receive attention at once.

The new laboratory for the investigation of the problems of metabolism in malignant growths has been adequately equipped, and special chemical research work dealing with the metabolism of cancer patients, the properties of cancer toxins or ferments, and the nature of the cancer-cachexia, has been instituted since last November.

The poor ventilation and the frequent outbreaks of disease in the old Children's Ward necessitated an increase in the space allotted to each bed and a more rigid supervision of the occupants of the wards.

These two conditions have been met by the addition of six separate small wards containing from 2 to 4 beds each, and by the adoption of the most approved individual precautions in the care and the treatment of each patient. The Children's Department is now divided into three sets of wards—Observation Wards, Intermediate Wards, and a Permanent Ward. Each patient upon admission remains eight days in the Observation and Intermediate Wards before transfer to the Permanent Wards.

Special precautions are used in the sterilization of the milk. All nurses now wear gloves in taking rectal temperatures and bathing the patients. We have adopted with some modifications the system of bathing children in use at the Presbyterian Hospital and are pleased with it.

It is efficient, cleanly, and rapid in action. Strict precautions are still maintained in the sterilization of the bed and bed-clothing used in the infectious and contagious cases. Special screens are also to be used for isolating typhoid patients.

The enforcement of these individual precautions is under the direct supervision of the Attending Physician and the Pathologist from whom the Medical and Surgical Internes receive their instructions. The proper enforcement of these rules promises to eradicate the evils for which they were instituted.

The Reception Ward, which was built one year ago, has been fully equipped and thoroughly reorganized. It is now subject to all rules governing other wards with the single exception that a patient at the expiration of 48 hours must be sent home, transferred to another hospital, or sent to a permanent ward in the Hospital.

A full set of nurses has been assigned to this ward by the Superintendent of Nurses and daily rounds are made as in all wards.

This has brought these patients more directly under the Attending Staff and has ensured better care and more careful records.

During the year, an order abolishing the use of cots in the wards was passed by the Executive Committee at the earnest solicitation of the Medical Board. This request was felt necessary since cots are difficult to keep clean, are uncomfortable for patients and require at least two hours per day for transportation to and from the wards by the orderlies. This substitution of beds for cots will secure greater comfort for the sick and will give the nursing staff better control of the ward sanitation. During the latter part of the year two quiet rooms have been fittingly furnished and heated. These much needed rooms are situated near the Reception Ward and are under the constant supervision of the nurse in charge of this ward. Noisy and dangerous patients in the wards are now placed in these rooms, where they receive the best attention given in the Hospital.

The Medical Board is pleased to report that during this year a room devoted entirely to the reception and retention of contagious cases occurring in the wards has been installed with the necessary sterilizing plant. This room undoubtedly ensures a more perfect protection to the other patients than we have heretofore had at our command. During the summer of 1910 arrangements were made by which a number of beds were devoted to patients suffering from advanced cancer. The object was to furnish an opportunity for the systematic study of this disease in the human subject.

The Staff of the Huntington Fund for Cancer Research coöperates with the Medical Board in this work and are at present investigating various problems, such as Metabolism in Cancer, Biochemical Diagnosis, Immunity, Bacterial Infections, and the various methods of treatment which recent experience has suggested.

The Cancer Commission of the New York Hospital was therefore established, and from the funds specially donated for the purpose a salaried physician, Dr. Michaelofsky, has been placed in charge of the patients with a special nurse, and an experienced physiological chemist with one assistant has been assigned to the new chemical laboratory.

The Committee of the Medical Board appointed in 1908 to consider the question of the increased consumption of absorbent gauze and rubber gloves, reports a continued saving in the amounts used.

	1910.	1909.
The number of yards of gauze used in the operating rooms	32,885	29,962
The number of yards of gauze used in the wards	44,638	71,496
Total yards used in the Hospital	77,523	101,458

This table shows a saving of 26,858 yards of gauze in the wards and 2,923 yards increase in the Operating Rooms. This increase is well accounted for by the extra 301 operations performed during 1910. The amount of washed gauze used in 1909 was 35,983 yards. In 1910 this was 23,927 yards. The difference (12,056 yards) is easily accounted for by the fact that 23,935 yards less of fresh gauze were used during 1910 than during 1909. The Accident Room and the Out-Patient Department, which are the principal departments using this washed gauze, have not been obliged to use new gauze up to the present time.

A great saving in rubber gloves has been made during the year. In 1909 1,251 pairs of gloves were used in the Hospital. During 1910 747 pairs were used. The difference, 504 pairs (about \$250) is a very creditable saving.

This economy is undoubtedly due in part to the better quality of gloves purchased and in part to more careful sterilization of the gloves. It is to be noted that this saving has occurred in spite of the fact that 301 more operations were performed in the Operating Rooms.

The work in the Operating Rooms of the Main Hospital requires the services of an additional pupil nurse.

Three hundred more operations were performed this year (1910) than last year. One hundred more operations were performed last

year (1909) than the preceding year (1908). Yet the number of pupil nurses has remained the same since 1907. The detail of nurses is no longer able to effectually carry on the work without unnecessary hardship to the nurse and a consequent poor result in the Operating-Room technique.

The appointment of an additional pupil nurse to this department is thought necessary by the Committee in charge.

The Department of Thermo-therapy and Hydrotherapy in which are treated both medical and surgical cases from the wards and from the Dispensary has been most useful in many of the chronic diseases. Its limited quarters, more than anything else, have hampered its full efficiency. Two expert operators are in daily attendance. The total number of patients treated in 1910 was 2,998 in contrast to 3,071 in 1909. A greater use of this Department should be made by both the Medical and the Surgical Divisions. At present the greater number of patients belong to the Out-Patient Department. As soon as possible a Mechano-Therapeutic Department should be added to our institutional methods of treatment. The Roentgen Ray Department under Dr. Busby has done more work this year than ever before.

The Roentgen Ray apparatus installed last year has been most useful in skiagraphing the denser parts of the body. This was impossible with the old apparatus. The total number of skiagraphs taken this year is 2,800 as against 2,300 last year. Detail of this work is as follows:

Head	28
Neck	15
Thorax	113
Shoulder	76
Upper arm	43
Elbow	102
Forearm	45
Wrist and hands	279
Abdomen	243
Pelvis and hips	140
Thigh	37
Knee	79
Leg	59
Ankle	81
Foot	61

The total number is 1,401, but as most of the cases had two views taken and many, several plates, there were approximately 2,800 exposures made.

During the last month a special orderly has been assigned to this

Department during certain hours of the day. This was much needed and it has greatly expedited the work.

For some time it has been the desire of the Medical Board that teaching of students in the wards and at the clinics be allowed by the Board of Governors. This year an arrangement has been made with the College of Physicians and Surgeons by which its students will be admitted to the wards and will be instructed by the Associate Physicians and Surgeons in the diagnosis, treatment and care of the cases assigned to them individually. Clinics will be given by the Attending Surgeon or Associates at which these students will be shown the mechanical and operative treatment of the cases assigned to them in the wards. It is the intention of the Medical Board in giving these clinics to invite practitioners to view the operations at which the student-externe will assist in unimportant details.

Both Cornell and Columbia Medical Schools will send a certain number of students for this form of instruction. At present Columbia Medical School has sent three men who will serve two months in the wards and will be on duty from 9 to 11 A. M. and from 2 to 5 P. M. When these men have finished their term of service they will be succeeded by others. Next year Cornell Medical School will commence with this form of instruction. We can accommodate 12 to 16 men at a time and we hope that the medical schools will assign that number to us. The work at the House of Relief may be seen in the following table:

	1910.	1909.
Patients treated in the wards	2,792	3,015
Out-Patients	26,557	28,191
Out-Patient visits	56,802	64,526
Ambulance calls	4,993	4,553
Ambulance transfers	1,528	1,480

The total number of surgical cases treated in the wards was 1,205, of which 396 were surgical diseases and 809 injuries. There were 246 major operations performed. The number of deaths from all causes, including disease or injury, with or without operative interference, was 80, as compared with 100 in 1909. The detailed list is as follows:

Fracture of the skull	28
Fracture of the pelvis	1
Fracture of the vertebræ	4
Rupture of the kidney	1
Rupture of the æsophagus	1
Cerebral hemorrhage	1
Stab wound of the heart	1
Burns	4

Stab wound of the lung	1
Gunshot wound of the chest	4
Gunshot wound of the abdomen	3
Gunshot wound of the head	3
Gunshot wound of the pharynx	1
Internal injuries (undiagnosed)	9
Pyæmia	1
Septicæmia	1
Sarcoma	2
Carcinoma	3
Peritonitis (non-traumatic)	11

The total number of Medical cases treated in the wards was 1,553.
The total number of deaths upon the Medical service was 129.

The Medical diseases treated, together with the number of deaths, may be seen in the following table:

Alcoholism	147	Deaths,	2
Delirium tremens	65		
Poisoning from illuminating gas	16	"	1
Poisoning from cocaine	5		
Poisoning from mercuric bichloride	2		
Poisoning from morphine	2		
Poisoning from ether	1		
Poisoning from chloroform	1		
Poisoning from phenol	1	"	1
Poisoning from ammonia	1		
Poisoning from lead	1		
Poisoning from nitrobenzol	1		
Diphtheria	2		
Syphilis	6		
Meningitis	11	"	4
Amœbic dysentery	1		
Rheumatic fever	58		
Typhoid fever	31	"	8
Pulmonary tuberculosis	63	"	9
Tonsilitis	9		
Bronchitis, acute and chronic	62		
Lobar pneumonia	76	"	29
Pleurisy	16		
Bronchial asthma	12		
Gangrene of the lung	1	"	1
Endocarditis, chronic	38	"	6
Other diseases of the heart	54	"	8
Angina pectoris	2	"	1
Aortic aneurism	2		

Acute gastritis	86	Deaths,	1
Enteritis	43	“	1
Gastric carcinoma	8	“	1
Intestinal parasite	1		
Cirrhosis of the liver	12	“	4
Uræmia	26	“	16
Nephritis, acute and chronic	97	“	13
Diabetes	4		
Pernicious anæmia	1		
Hemophilia	3		
Scurvy	1		
Cerebral hemorrhage	40	“	23
Epilepsy	117		
Syncope	20		
Hysteria	51		
Nervous diseases	13		
Submersion	29		
Heat exhaustion	28		
Thermic fever	3	“	1
Sunstroke	7		
Skin diseases	5		
Malaria	37		
Unclassified	58		

The erection of an open air ward upon the roof of the House of Relief which is now under consideration by the Executive Committee of the Board of Governors will be a most desirable addition to this institution. If we are to remain in this institution we should have such a ward where pneumonia, gas poisoning and other acute diseases, medical and surgical, can be treated under the most appropriate surroundings.

LEWIS A. CONNOR,
Secretary.

FRANK HARTLEY,
President.

REPORT OF THE SUPERINTENDENT OF THE TRAINING SCHOOL.

To the Board of Governors of the New York Hospital:

GENTLEMEN:—I herewith submit the report of the thirty-fourth year of the Training School.

The Staff of the Training School on duty at the close of the year is as follows:

Officers of Instruction:

Superintendent	1
Assistant Superintendent	1
Clerical Assistant	1
Night Supervisor	1
In charge of Private Patients' Building	1
In charge of Out-Patient Department	1
Visiting Nurses (Out-Patient Department)	2
Operating Room Nurses	3
Head Ward Nurses	9

Pupils:

Seniors	36
Intermediates	13
Juniors	41

The Training School consists of ninety pupils distributed as follows:

Hospital Wards, public and private	70
House of Relief	10
Lying-In-Hospital	6
Sloane Maternity Hospital	4

During the year 1,260 applications were received and considered, with the following result:

Accepted and entered on probationary duty	58
Accepted as pupils in the School	43
Resigned	3

The general health of the pupils has been excellent. The total days of illness was 505, a decrease of 104 from last year. The pupils

are encouraged to use the roof garden of the Nurses' Home at all seasons of the year. This place, always comfortable with easy chairs and hammocks, has been made especially attractive by the addition of a hedge of evergreen, which is not only pleasing to the eye, but serves a useful purpose in screening from observation from the high buildings which have been erected in our neighborhood. This feature was added through a special donation by your Board and we hereby express our appreciation. The room in the Private Patients' Building, assigned to the use of nurses during illness, was occupied 604 days, of which 419 were by graduate nurses and 185 by pupils.

Forty-one pupils finished the course, passed the final examinations and were awarded diplomas in 1910. The graduation exercises were held March 3d, in the Governors' Room in the Administration Building.

Mr. William W. Hoppin, Chairman of the Training School Committee, presided in the absence of Mr. George L. Rives, President of the Hospital. Reverend William T. Manning, D.D., Rector of Trinity Church, delivered a most interesting address to the Graduating Class. The exercises were followed by a reception in the Nurses' Home which was largely attended by the graduates and their friends.

Owing to the increased importance given to diet as a factor in the treatment of disease, it was deemed necessary to add a resident Dietitian to the teaching force. Miss Stone, a graduate of Pratt Institute, Brooklyn, was appointed to the position and our pupils are receiving excellent training in this branch of practical work.

The alterations in the interior of the main hospital building, leading to the enlargement of the service in some of the wards and elsewhere, have made demands upon the School which could be met only by an increase of the number of pupils. This measure has been authorized and accommodations for the additional pupils provided by assigning for their use the fifth floor of the Private Patients' Building.

It is gratifying to note that the Hospital has undertaken to do its share of the great work in Cancer Research. Special beds have been assigned to cancer patients in the wards; special physicians are in attendance on them, and two graduate nurses have been engaged whose services are confined to this new department of work. We are watching its development with great interest.

The work of the Visiting Nurses in the Out-Patient Department increases year by year both in volume and interest. Its value cannot be estimated. Mrs. Jameson, assisted by a Nurse from the

City Department of Health, has continued her invaluable work with tuberculosis patients.

Miss E. Price has been constant and faithful in her attendance upon the Children's Clinic and in following up the patients to their homes, where careful instruction is given to the parents in the care of children in the direction of cleanliness, feeding and general treatment.

Many children were sent to the Campbell Cottage at White Plains and many with their mothers were given outings to the country during the summer. The following table shows some of the details of the work:

Visits to homes of tubercular patients	994
Quarts of milk dispensed	6,885
Dozens of eggs dispensed	1,776
Visits to homes of children	1,098
Children sent to Campbell Cottage	255
Children of tubercular parents sent to mountains	35
Summer outings to mothers (with children)	252

It gives me great pleasure to place on record my appreciation of the assistance and co-operation of the graduate nurses engaged in the service of the Hospital in the different departments and also the cordial response which has been made by the pupils to our efforts to increase the general efficiency of the School.

Respectfully submitted,

ADELINE HENDERSON,
Superintendent Training School.

REPORT OF THE MEDICAL SUPERINTENDENT OF THE SOCIETY OF THE NEW YORK HOSPI- TAL, BLOOMINGDALE, WHITE PLAINS, NEW YORK.

To the Board of Governors:

GENTLEMEN:—In compliance with a By-law of your Honorable Board, the following report of the operation of the Psychopathic Department of the Hospital for the year 1910 is respectfully submitted:

STATISTICS FOR THE YEAR 1910.

	Men.	Women.	Total.
There were under treatment January 1, 1910	161	186	347
There were admitted during the year	65	66	131
There were treated during the year	226	252	478
The discharges were: Recovered	12	19	31
Improved	19	20	39
Unimproved	9	15	24
By death	17	9	26
Total	57	63	120
There were under treatment December 31, 1910	169	189	358
The average number under treatment was	168	184	352
The lowest number was: Men, in January	157	...	...
The lowest number was: Women, in December	...	174	...
The lowest total number was, in January	...	...	334
The highest number was: Men, in October	174	...	...
The highest number was: Women, in March	...	193	...
The highest total number was, in March	...	...	361

There were 131 cases, 65 men and 66 women, admitted during the year. There were 4 fewer patients than cases, 3 men and 1 woman having been discharged and readmitted during the year. Twenty-four patients, 12 men and 12 women, had been discharged from the institution prior to January 1, 1910. One man had been discharged four times, 2 men twice, and 9 men had been discharged once. One woman had been discharged seven times, 2 women three times, 2 women twice, and 7 women had each been discharged once.

Of those readmitted for the first time, 3 men and 2 women had been discharged as recovered, 6 men and 4 women as improved, and 1 woman as unimproved.

One man had been discharged twice as recovered, and 1 man once as recovered and once as improved; 1 man three times as recovered 1 man twice as improved, and 1 man four times as improved. One woman had been discharged six times as recovered and once as improved, 2 women twice, and 2 women three times as recovered.

One hundred and two of the admissions, 51 men and 51 women, were first attacks, of which 71, 33 men and 38 women, were admitted first to Bloomington Hospital. Deducting from the whole number of admissions 29 cases that had been admitted in previous years, and 71 admissions in first attack, leaves 31 cases that have either been treated at home or at some other institution previous to admission here.

Forty-one patients were admitted three months or less after the first symptoms of mental disease were noticed by their friends; 16 between 3 and 6 months, 6 between 6 and 12 months, and 68 more than a year.

DISCHARGES.

The total number of discharges during the year 1910 was 120; 57 men and 63 women. The number of recoveries was 31; 12 men and 19 women. They were 26 per cent. of all discharges, including deaths,—21 per cent. of the men who were discharged or died, and 38 per cent. of the women who were discharged or died.

Fourteen patients, 6 men and 8 women, recovered from the first attack, 5 men and 2 women from the second, 5 women from the third, 1 man and 1 woman from the fourth, 1 woman from the eighth, and 1 woman from the ninth attack.

In the 31 cases that recovered, the average duration of the disease from invasion to recovery was 11 months and 6 days; of the men 8 months and 29 days, and of the women 12 months and 1 day. The average duration of treatment was 5 months and 15 days; of the men 3 months and 10 days, and of the women 6 months and 26 days. The disease was reported to have existed before admission an average of 5 months and 11 days; in the men 5 months and 19 days, and in the women 5 months and 5 days. The longest period of treatment in those recovered was 9 months and 12 days in the case of 1 man, and 2 years and 11 months in the case of 1 woman; the shortest was 3 months and 3 days in 1 man, and 14 days in 1 woman.

Two alcohol habitues, both men, were discharged as recovered.

Two cases of morphine habit, 1 man and 1 woman, were discharged as recovered.

Thirty-nine cases, 19 men and 20 women, were discharged as improved. In the cases of 4 men, it seemed probable, at the time of their discharge as improved, that they would have recovered if continued under treatment.

Of the 24 patients, 9 men and 15 women, who were discharged unimproved, it seemed improbable that any of them would have recovered if they had continued under treatment.

PERCENTAGE OF RECOVERIES.

The question often arises as to what percentage of the insane recover, and whether the percentage has increased with modern knowledge and methods.

A glance at the patients admitted in 1910 shows that 88, 48 men and 40 women, were incurable from the fact of their having organic brain diseases, or defects, as paresis, senility and undevelopment. The remainder of those admitted were 43 patients, 17 men and 26 women, who might recover. Comparing these with the actual recoveries of the year, we find a percentage of 72, 73 per cent. in the women and 71 per cent. in the men who recovered, as compared with patients admitted who might be regarded as recoverable.

GENERAL REMARKS.

There were 9 more admissions this year than last.

The average number of patients in the institution was 352, 9 more than the average of the preceding year.

The number of weeks board and treatment furnished for patients was 18,386. The average expenditure per patient was \$12.66 per week, which includes the total cost of maintaining the property at White Plains, and the patients upon it, and is for all salaries and wages, repairs, supplies, and maintenance of every kind, except that our high-paying patients repay us for the exclusive services of their attendants, and we deduct this sum from the total expense.

Forty-five women were beneficiaries of the John C. Green Memorial Fund during the year 1910. The amount of income received from that Fund and expended for these women in 1910 was \$7,661.18. The total charitable expenditures during the year 1910 in caring for and treating patients (preferably acute and presumably hopeful cases) was \$50,557.64. Two hundred and seven individuals shared in this charitable assistance, some being entirely and others partially supported. The sum of \$42,886.46 was expended for this purpose from the earnings of Bloomington Hospital during the year 1910, from which earnings charitable assistance to patients was given to the extent mentioned above. Over 9 per cent. of the patients treated contributed nothing whatever to their

support; 48.6 per cent. of the patients paid sums varying from nothing to the bare cost of their care. Only 51.4 per cent. paid a rate which secured a surplus for the institution. The total support and partial assistance rendered to patients unable to pay for their entire cost to the Hospital was equivalent to maintaining 80 free beds.

The graduates of the Training School for Attendants, including the nine who graduated this year, number 107 since the school was first started in 1894, of whom 7 men and 19 women remain in the employ of the institution.

The year 1910 was a very successful one for Bloomington Hospital, both from a medical and a financial standpoint.

The work of Dr. Amsden, special pathologist of the Hospital, for the past year, is described by him as follows:

"Herewith I submit a general statement of the work, aside from the more definitely routine work, with which I have been occupied for the past seven months.

"Soon after returning from abroad I began collecting the equipment necessary for the Wassermann reaction. By the end of the summer our outfit was completed and since September the Wassermann test has been a part of the routine clinical work.

We do this test according to the original method of Wassermann—the method employed also at the Munich clinic. In especial cases experience has shown the advisability of making use, in addition, of Noguchi's modification of this test. By this combination I believe that a maximum of accuracy is secured. Up to the present time we have done 193 reactions involving 78 cases, a part of which were in the New York Hospital and House of Relief. The results tally closely with those currently published. This test, together with the results obtained from examination of the spinal fluid, marks a distinct advance in precision of diagnosis and treatment.

I have also given especial attention to the application of the more recent neuropathological methods to material from our autopsies. Although we have relatively few post mortem examinations, this fact makes it possible to carry out a complete study of them. We are, as a means of control, employing the same methods on suitable material obtained elsewhere.

"In addition we have continued the collection of data bearing upon the interrelation of psychosis and mental make-up or personality. The importance of this study, particularly in hospitals dealing with the better educated classes, should, we believe, be forcibly emphasized. It is more and more evident that consideration of this data not only makes it possible to handle cases with greater precision, but it indicates also in recoverable cases the direction in which training of the patient against subsequent difficulty

may most efficiently be pushed. Moreover it appears hardly less than a duty to make this data, so easily accessible in hospitals of this class, generally available for whatever bearing it may have on the problems of limitation and prevention of mental deviation."

The Convalescent Cottage for men patients from the New York and allied hospitals was open from May 1st to October 15th, and during that time 90 men spent from a few days to several weeks at this cottage, for whom we furnished 1,386 days board.

On May 26th a number of Governors of the Society visited Bloomingtondale Hospital, and participated with the members of the Bloomingtondale Committee in the graduating exercises of our Training School for Attendants, at which time two men and seven women were graduated, and given certificates of efficient pursuit of their studies in fitting them to attend upon the insane.

Last summer the Hospital hired a bungalow overlooking the Long Island Sound, at Rye Beach, which was utilized for the daily picnic parties during the summer on all fine days, and 15 patients stayed for periods varying from a day to three weeks. The cottage was very much enjoyed, and was of great benefit to the patients.

The shore cottage has been found so useful and enjoyable to the patients that the Governors have secured a plot of ground on the shore containing about one-third of an acre, with a shore line of about 150 feet, which is to be improved in time for the coming summer, and on account of its accessibility, and the adjoining very beautiful bathing beach, is likely to be a very valuable addition to the facilities of Bloomingtondale Hospital for treating patients.

The occupation department has continued to prove valuable in the moral treatment of patients. A considerable demand has existed for the fancy work, which has appealed to various people who visited the institution, so that there is every encouragement to pursue it. The following is a somewhat detailed statement of its operation:

"During the year 1910, 52 patients were employed in the occupation department; the variety of occupation and amount done is shown in the following list. In addition instruction was given to a few patients in design, composition and color.

Reed baskets	270
Raffia knotted articles	140
Raffia sewed baskets	55
Woven rugs	5
Woven cushion covers	41
Woven draperies, bags, bureau and table scarfs	69
Hammered brass pieces	5
Bead decorated leather bags	2

Of these articles by far the greater number have already been sold, the total income thus derived being \$431.58.

The expenditure for materials during the year was \$291.92, considerable of which is still on hand."

No changes have taken place in the medical staff during the year, except that Dr. Allen V. Laing, Clinical Assistant, resigned on August 1st and was succeeded by Dr. C. Ross Miller, who in turn was succeeded by Dr. Eugene T. Morrison.

Attached to this is a report of Miss Alice C. Ellison, Assistant Superintendent of the Campbell Convalescent Cottages, which shows the amount of work done at these cottages during the past year.

SAMUEL B. LYON,
Medical Superintendent.

CAMPBELL CONVALESCENT COTTAGES, FRONT ELEVATION, 1910

CAMPBELL CONVALESCENT COTTAGES, ADMINISTRATION BUILDING, 1910

REPORT OF THE ASSISTANT SUPERINTENDENT OF THE CAMPBELL CONVALESCENT COTTAGES.

To the Board of Governors:

GENTLEMEN:—The number of admissions this year exceeds that of 1909 by more than two hundred. While our purpose is to obtain results, rather than numbers, it is gratifying when the two are combined.

Facilities for isolating contagious cases have been made so convenient, that no serious delays have interfered with our routine in admitting patients. The isolation quarters have proved efficient at all times, and have been very comfortable during the winter.

The children have, on the whole, done well, and many who came to the cottages in shocking condition went home strong and happy. It is pleasant to reflect that, in many instances, marked improvements in mental and personal conditions have supplemented the physical benefits received.

GENERAL REMARKS.

While the Convalescent Cottages cannot personally follow the patients who have been discharged, it is at this point that the visiting dispensary nurse and the Social Service Department render valuable work, as they are able to keep in touch with patients who have passed beyond our reach. The latter branch of the hospital has been of great assistance in providing employment and (when possible) clothing for needy women patients who have been discharged from this institution.

In connection with the future of children who are discharged from the Cottages, the clothing problem has been a very important feature. While the children are in our care, their clothing is furnished by the institution, but many a child, on arrival, is so poorly clad that it is often impossible to send him away wearing his own garments. This is particularly important in the fall and winter, as children who come to the Cottages during the summer are frequently unable to receive warm clothing from their homes, and we have had difficulty in supplying their needs after they have been in the Cottages longer than the summer season.

At present, through the kindness of one of the members of the Board of Governors, we are enabled to provide the most necessary articles of clothing for the poorer children.

IMPROVEMENTS

The beauty and usefulness of the Cottages have been greatly augmented during the past year. An iron fence has replaced the old wooden one, and additional shade trees and groups of shrubs have been planted. A large awning provides the children with a shaded grassy spot, which is very restful on warm days.

The sun-parlor in which the children formerly played when indoors having been converted into a schoolroom, it was necessary to find a substitute. To this end the long veranda in front of the cottage has been provided with a portable enclosure. The equipment of the children's cottage will soon have been made more useful by the addition of a steam sterilizer for clothing and a modern bathing table for babies.

The women's cottage has also been benefited. All the walls have been painted, while a fireplace, pictures, rugs, curtains and a writing-desk have made the sitting-room very homelike.

The women patients' physical comfort has also been borne in mind, and warm army blankets and a cement courtyard on the sunny side of the cottage have made it possible for the women to enjoy outdoor life during the winter.

Perhaps the greatest step which has been made in the advancement of the children's department has been in establishing a kindergarten and school department. It is absolutely necessary, where so large a number of children are gathered, to provide mental occupation—which cannot be contributed by the nursing staff.

October 1st the kindergarten was opened with Miss Margaret O'Brien in charge. Miss O'Brien was engaged only as a kindergarten teacher, but realizing the needs of the older children she has voluntarily conducted a class with them.

We have frequently been forced by urgent parents to send home sickly children, to whom it meant much to receive care and outdoor life, the parents insisting that their children could not afford to forfeit their schooling. While we cannot give the older children an equivalent to regular school work, we have so far succeeded that, in one or two instances, children who had been expected to fail in their school examinations were not left behind.

The kindergarten department has attractions for all, and it is very interesting to note the eagerness with which dull, backward little children take part in basket-weaving and clay modeling.

It was largely due to the efforts of the school children that the Christmas season was enjoyed by the entire household. Beside the large Christmas tree stood a small one, prettily decorated by the children, and on which they had hung little gifts for friends. The

CAMPBELL CONVALESCENT COTTAGES, CHILDREN'S PAVILION, 1910

CAMPBELL CONVALESCENT COTTAGES, PLAY COURT, 1910

women patients were also remembered, and were present at a very pleasant entertainment furnished by the girls and boys.

As our work has developed needs have arisen, and we are very grateful to those whose earnest support has been of great assistance to us in carrying on this branch of the hospital service, which has insisted upon growing.

CAMPBELL CONVALESCENT COTTAGES.

TO THE LEGISLATURE OF THE
STATE OF NEW YORK

The Governors of the Society of the New York
Hospital respectfully present their Annual Re-
port of the state of the Institutions under their
charge for the year 1911, as required by law.

ANNUAL REPORT

OF THE

GOVERNORS OF THE SOCIETY OF THE NEW YORK HOSPITAL FOR THE YEAR 1911.

In conformity with the provisions of its charter, granted by Royal authority June 13, 1771, in the reign of King George III, the Governors of the Society of the New York Hospital present their Annual Report, consisting of the report of the Treasurer and of the several institutions under their control and management, as follows:

The Hospital at Fifteenth Street, the Private Hospital at Sixteenth Street, the House of Relief at Hudson Street, the department for the treatment of mental diseases, known as Bloomingdale Hospital, and the Convalescent Cottages at White Plains, Westchester County.

The number of individuals who received care and treatment in all departments during the past year was 64,677 as compared with 67,504 for the year 1910, as appears in the Statistical Report, divided as follows:

	1911	1910
NEW YORK HOSPITAL, FIFTEENTH-SIXTEENTH STREETS:		
In Wards.....	12,386	13,321
Private Rooms.....	550	510
Out-Patient Department.....	17,143	17,690
Treated by Ambulance Surgeons and not brought to the Hospital.....	4,289	2,895
	<u>34,368</u>	<u>34,416</u>
HOUSE OF RELIEF, HUDSON STREET:		
In Wards.....	2,655	2,792
Out-Patient Department.....	23,671	26,557
Treated by Ambulance Surgeons and not brought to the Hospital.....	2,693	2,521
	<u>29,019</u>	<u>31,870</u>
BLOOMINGDALE HOSPITAL, WHITE PLAINS:		
Psychopathic Department.....	498	478
CONVALESCENT COTTAGES, WHITE PLAINS:		
Men.....	66	90
Women.....	254	227
Children.....	472	423
	<u>792</u>	<u>740</u>

The statistical reports annexed hereto will show that the work of the Hospital has continued on practically the same lines during the year 1911 as during the year 1910. (There have been slight variations, but on the whole the numbers at any one time in the various departments of the institution showed a persistent increase.) The total number of patients treated during the year (excluding the Out-Patient Department) has slightly diminished, but, on the other hand, the total days of Hospital care has increased. The number of patients in the Bloomingdale Hospital reached larger figures than ever before; so also the ambulance service has been much increased, the average number of calls being eighteen a day at the Sixteenth Street Hospital, and fourteen at the House of Relief.

While the efficiency of the institution, it is believed, has been fully maintained, the average cost of caring for patients has been somewhat reduced. It is interesting to note that at a time when it is popularly believed that the cost of living has been increased, the daily cost per capita for provisions for all persons supported by the Hospital has diminished from about thirty-four cents in 1910 to twenty-nine cents in 1911.

A comparatively new phase of the work of the Society is in the Convalescent Relief Department which has been gradually extended and is accomplishing an incalculable amount of good. As the work of this department is better understood, more cases are brought under their jurisdiction and the work of the nurses employed is every year materially greater. Special attention is called to the details in regard to this work given in the appended report of the Superintendent.

During the past year the Society has acquired practically all of the block between Fifty-fourth and Fifty-fifth Streets and Eleventh and Twelfth Avenues—the completion of the purchase from the numerous different owners having required a good deal of time. The necessary funds for this purpose have been obtained in part from the sale of certain land belonging to the Society adjacent to the Bloomingdale Hospital, but in greater part from the sale of securities held in the Treasury. The land in Westchester County was not productive so that its sale did not affect the income of the Society; but the sale of securities has materially diminished the income upon which the Society has had to rely. The result is, that the year 1911 closes with a deficit.

In view of the constantly increasing demands upon the institution, the expenses for the coming year will undoubtedly be increased. All branches of the institution have been managed with economy, and it would probably not be practicable, without sacrifice of efficiency, to reduce further the per capita expenses. In fact, it will probably be necessary, in order to keep our work fully up to

the most approved standards to expend much larger sums in the management of some of our departments. The result will be that we must seek aid from such sources as we can reach to enable us to carry on our work.

The preparation of plans for the new Hospital buildings at Fifty-fourth Street has been diligently carried on by our architects and expert advisers with the assistance of the Medical Board, and it is hoped that they will soon be in a condition to exhibit to those who may be minded to contribute to so excellent a purpose. It is the intention of the Governors that they shall comprise the most improved and modern methods of hospital construction and the best appliances for caring for all classes of the sick and injured. In order to accomplish this purpose very large sums of money will have to be expended, but the Governors of the Society, as stated in their last report, feel an abiding confidence that the oldest hospital in this City will be supported in this step forward, by all who appreciate its one hundred and forty years of conservative management.

Dr. Samuel B. Lyon, Medical Superintendent of Bloomingdale Hospital, at White Plains, N. Y., desiring relief from the arduous duties of his office, tendered his resignation, which was accepted with regret. In accepting Dr. Lyon's resignation, the Board of Governors placed on record their appreciation of his long, devoted and efficient service and appointed him Medical Superintendent Emeritus.

Dr. William L. Russell, late Superintendent of the Long Island State Hospital, was appointed to succeed Dr. Lyon, resigned.

The resignation of Dr. Percival R. Bolton as Attending Surgeon to the Hospital was accepted with regret. Appropriate resolutions were adopted expressing their appreciation of Dr. Bolton's professional services covering a period of nearly twenty-one years.

The Governors sincerely regret the sudden death of Dr. Raymond W. Brown, March 23, 1911, while in the active discharge of his duties as a member of the House Staff at the House of Relief.

Attention is called to the fact that the Statistical Report covers all the institutions under the management of the Society.

HENRY W. CRANE,

Secretary.

GEORGE L. RIVES,

President.

†The difference between the item of "Total Operating Charges" at Bloomingdale Hospital, and the total of such charges as set up on page 19 of the Treasurer's Report published herewith, viz., \$279,065.30, is accounted for by the fact that certain charges were transferred from Operating Expense to Capital Investment. There was also an allowance made for the cost of maintenance of special attendants to patients, said amount being transferred and charged against the total receipts from patients' board for the year 1911.

REPORT OF THE SUPERINTENDENT OF THE NEW YORK HOSPITAL AND HOUSE OF RELIEF.

To the Board of Governors:

GENTLEMEN:—I beg to submit the following report for the year 1911:

The cost of maintaining the New York Hospital was practically the same as in 1910, but through charging off to the House of Relief its proportionate share of administration expenses and the wages paid pupil nurses employed in that Institution, it appears to be less.

The average daily cost of caring for patients was \$2.60, compared with \$2.68 in 1910.

The largest increases in expenditures were for medical and surgical supplies, which increased \$2,433.17, for fuel, which increased \$2,215.01; for housekeeping labor and supplies, which increased \$2,841.71, and for X-Ray, which increased \$1,273.52.

HOSPITAL RECEIPTS.

The Hospital receipts were \$3,123.99 greater than in 1910, not including payments by patients for medical services and special nurses. The receipts from private rooms were \$3,244.13 less than last year, owing to a reduction in the number of rooms allotted to this department. The receipts from ward patients, on the other hand, showed an increase of \$6,094.81.

We received \$2,694 from the Cancer Commission, which accounts in part for the increased income from Hospital wards.

PATIENTS TREATED.

Compared with 1910 there was a decrease in the number of admissions to the Hospital from 5,934 to 5,608. But owing to the more serious illnesses of those admitted, necessitating a longer average stay in the Hospital, the number of days' care furnished increased from 86,874 to 91,474, or over five per cent.

The work in the Emergency Ward decreased over seven per cent.

In the Out-Patient Department the number of visits was greater than ever before. The daily average number of patients treated in this department was 230, compared with 218 in 1910.

The number of private patients treated during the year was 550, compared with 510 last year.

ADDITIONS AND BETTERMENTS.

The number of beds in the surgical wards was increased by 17.

The refrigerating plant was thoroughly overhauled.

The washing machines in the laundry were repaired and worn parts renewed.

The boilers were equipped with new grates, thereby making it possible to burn a cheaper grade of coal during the warm months.

A considerable amount of painting was done both at the Hospital and at the House of Relief.

An electric ambulance was added to the ambulance equipment at the House of Relief.

The floors of the upper wards at the House of Relief were resurfaced and linoleum treads laid.

Gas toasters were placed in the various dining-rooms and in all wards to the great satisfaction of patients and employees.

Owing to an increase in the staff of internes from 14 to 18, it was found necessary, in order to provide them with sleeping accommodations, to close the fourth floor of the Private Patient Building to patients.

ADDITIONAL ACCOMMODATIONS FOR PRIVATE PATIENTS AND NURSES.

In order to provide additional accommodations for nurses the house number 16 West Sixteenth Street was purchased. Possession was given September 1st. Accommodations are provided for 20 nurses.

The house was overhauled, repaired and furnished throughout. It is heated and lighted from the Hospital plant.

Connection was made between this building and No. 14 West Sixteenth Street, which is also occupied by nurses.

The nurses who were occupying the rooms on the fifth floor of the Private Patient Building moved into the extension. The vacation of this floor by the nurses gave the Hospital 10 additional rooms for private patients, making 32 in all.

COST OF CARING FOR PATIENTS.

The cost of caring for patients is somewhat less than it was last year. Taking into consideration the Hospital's numerous activities, which include an expensive ambulance service, it would appear that the work done is commensurate with the expenditures.

The gradual decrease in per capita per diem cost would appear to be due, in part, at least, to an increasing daily census.

The per capita per diem expenditures for the past five years have been as follows:

Year	Ward Patients	Private Patients	All Patients	Average Day Census
1907.....	\$2.83	\$6.81	\$3.29	187
1908.....	2.74	6.39	3.25	194
1909.....	2.74	5.54	3.07	198
1910.....	2.44	4.55	2.68	206
1911.....	2.31	5.29	2.60	215

CONVALESCENT RELIEF DEPARTMENT.

The work of this department was materially greater than in 1910. The total number of cases advised and aided during the year was 908. Of these 245 were from the Out-Patient Department and 15 from the House of Relief.

The Out-Patient Department is increasing its demands on this department and preparations are being made to adequately meet these demands.

Miss Irene H. Sutcliffe continues to direct this work. She has one paid assistant. We also have two graduate nurses doing convalescent relief work in the Out-Patient Department. One confines herself to tuberculosis cases and the other to children. Both of them visit the homes of patients and give practical instruction to the patients and their families in hygiene, feeding, nursing, etc.

The following statement of the disposition made of cases shows the scope and character of the service rendered by the Convalescent Relief Department.

Referred to Convalescent Homes.....	395
Referred to the country.....	108
Referred to Charity Organizations.....	55

Referred to other hospitals.....	25
Fare paid.....	80
Surgical Belts and Shoes.....	20
Treatments and Dressings.....	334
Work obtained for.....	30
Food and Emergencies.....	25
Refused help after arrangements were made.....	30

On both Thanksgiving and Christmas, dinners were distributed to the families of the patients. A Christmas Tree and an entertainment were also provided for them, over 200 attending.

HYDRIATIC DEPARTMENT.

In this department treatment is furnished free of charge to ward, private room, and out patients.

Men and women are treated on alternate afternoons. Expert operators are in constant attendance.

The average daily number of treatments in 1911 was 7 against 9 in 1910.

The number treated during the year is as follows:

	Male.	Female.	Total.	From Wards.	From O. P. Dept.	Total Treat- ments.	Average Day Treat- ment.
January.....	31	21	52	8	44	249	10
February.....	24	20	44	5	39	190	8+
March.....	29	22	51	3	48	251	9+

December.....	22	16	38	..	38	151	6+
Total.....	274	204	478	50	428	2,201	7+

HOUSE OF RELIEF.

This Institution continues to do most excellent work. Great numbers of patients are cared for in limited quarters, and at comparatively small expenditure. The doors are never closed to the sick and injured, regardless of whether or not they belong to the so-called emergency class.

The number of bed patients treated in 1911 was 137 less than in 1910, but the number of days' board furnished was increased by 2,291.

The total operating expenses was \$9,310.88 greater than in 1910. This was due to various causes. For the first time this Institution is charged with its proportionate share of administration expenses, and the wages of pupil nurses are charged to its pay-roll instead of the New York Hospital pay-roll.

The replacing of a horse ambulance with an electric one increased the expenditure of this department \$2,000.

Fairly extensive alterations and extensions were made on the roof of the House of Relief in order to provide modern facilities for open air treatment of patients. The cost of this work including equipment was about \$3,700. Accommodations are provided for 10 patients.

Seventy-three per cent. of those who were admitted to the New York Hospital wards received gratuitous treatment (not including 7,135 treated in the Emergency Ward, all of whom were treated without charge).

At the House of Relief 94.4 per cent. were treated free.

AMBULANCE SERVICE.

The ambulance work at the Hospital has increased rapidly during the past two or three years.

In 1908 we responded to a daily average of 8 calls; in 1909 the daily average number responded to was 11; in 1910 it was 14; and in 1911 it was 18.

We now have three electric ambulances at the Hospital. At the House of Relief there are two horse ambulances and one electric ambulance. We find the electric vehicles much more satisfactory than the horse drawn ones, especially in hot weather.

During one hot day in July nearly 90 calls were answered, between the two stations. An electric ambulance responded to 30 calls in 24 hours.

The number of calls at the Hospital was greater than those of last year by 1,293 and at the House of Relief by 166.

The average daily number of calls at the House of Relief was 14 compared with 13 last year.

HOSPITAL BUREAU OF STANDARDS AND SUPPLIES.

This Hospital retains its membership in the Hospital Bureau of Standards and Supplies. We feel that much has been gained through the standardization of the various commodities. Considering qualities, the prices obtained through the Bureau have been very satisfactory.

GIFTS.

The Hospital has been the recipient during the year of a large number of donations, such as books, toys, flowers, fruit, etc. These gifts while ordinarily inexpensive have as a whole assisted much in rendering hospital life more attractive, especially for the children. We desire to encourage these donations.

We are under renewed obligations to the Employment Society of St. Thomas's Church for a large amount of sewing done without expense to the Hospital. For statistics see Statistical Report.

Respectfully submitted,

THOMAS HOWELL,
Superintendent.

REPORT OF THE MEDICAL BOARD OF THE NEW YORK HOSPITAL FOR THE YEAR ENDING DECEMBER 31, 1911.

To the Board of Governors of the New York Hospital:

GENTLEMEN:—The number of individuals who received care and treatment at the New York Hospital during the past year was 34,368, as compared with 34,416 for the year 1910.

Of the above, 7,135 were treated in the Accident Room during the hours when the Out-Patient Department was closed. 5,801, including patients remaining in the Hospital at the beginning of the year, were treated in the wards and private rooms. Of that number, 1,966 were treated in the Medical Wards. Some of the principal diseases and their number are here recorded:

Amygdalitis	13
Aneurysm, aortic	7
Arterial sclerosis	40
Bronchitis	39
Carcinoma of stomach	19
Cirrhosis of liver	13
Diabetes mellitus	12
Endocarditis	91
Gastritis	14
Gastro-enteritis	54
Goitre, exophthalmic	9
Heat stroke	12
Hemorrhage, cerebral	11
Malaria	45
Meningitis	27
Myocarditis	13
Nephritis	112
Neurasthenia	17
Pleurisy	27
Pneumonia, lobar	162
Pneumonia, other types	17
Poliomyelitis, anterior	6
Rheumatic fever	68

Syphilis	45
Trichiniasis	5
Tuberculosis, pulmonary	45
Typhoid fever	81
Ulcer of stomach	22

In the Surgical Wards 3,285 were treated. Some of the principal diseases and injuries were:

Abscess, ischio-rectal	29	Deaths, 1
Appendicitis	320	" 19
Calculus of bladder	3	
Calculus of ureter	3	
Concussion of brain	10	
Carcinoma of breast	21	" 1
Carcinoma of liver	2	" 1
Carcinoma of œsophagus	1	" 1
Carcinoma of uterus	7	
Cholangitis	3	
Cholecystitis	5	" 3
Cholelithiasis	65	" 3
Diseases of prostate and bladder	17	
Diseases of rectum and anus	56	
Diseases of uterus	62	
Dislocations	12	
Endometritis	53	
Fistula in ano	37	
Fracture, Colles'	6	
Fracture of clavicle	9	
Fracture of femur	19	
Fracture of humerus	16	
Fracture of patella	10	
Fracture of pelvis	6	" 2
Fracture of radius and ulna	7	
Fracture of ribs	25	" 6
Fracture of skull	30	" 11
Fracture of tibia	4	
Fracture of tibia and fibula	27	
Fracture of vertebræ	2	" 1
Gunshot wound of abdomen	8	" 4
Gunshot wound of chest	3	" 1
Gunshot wound of lung	2	" 2
Gunshot wound of thigh	4	
Goitre, exophthalmic	29	

Hemorrhoids.....	82		
Hernia, femoral.....	15	Deaths,	1
Hernia, inguinal.....	224	"	1
Hernia, umbilical.....	12	"	5
Hernia, ventral.....	14	"	3
Hodgkin's disease.....	4		
Nephrolithiasis.....	6		
Nephroptosis.....	7	"	1
Neuralgia, trigeminal.....	3	"	1
Obstruction, intestinal.....	7	"	5
Osteomyelitis of femur.....	1		
Osteomyelitis of tibia.....	1		
Peritonitis.....	19	"	6
Pleurisy, suppurative.....	34	"	8
Pregnancy, extra uterine.....	17	"	2
Pyelonephritis.....	20		
Pyosalpingitis.....	54	"	2
Retroversion of uterus.....	35		
Salpingitis.....	71		
Stricture of œsophagus.....	1		
Stricture of urethra.....	14		
Tumors, malignant.....	93	"	3
Tumors, benign.....	95		
Ulcer of Stomach.....	15	"	4
Varicocele.....	32		
Varicose veins.....	16		
Wounds of chest (stab).....	1		
Wounds of heart (stab).....	1		

In the private patients' pavilion, 550 patients were treated, of which 526 were admitted this year and 24 remained over from last year. In 1910, 510 patients were treated. The number of operations performed was 379, including 312 major and 67 minor operations. In 1910, 271 operations were performed.

The operative work in the main Hospital has increased 84 cases. One thousand eight hundred and ninety-four operations were performed in 1911, as compared with 1,810 in 1910.

The Surgical Service in the Out-Patient Department has fallen off 154 patients and the visits have increased 963. The Medical Department has fallen off 393 and the visits have increased 1,921.

The work of the Tuberculosis Department of the Dispensary has diminished somewhat in the adult cases treated. The total number of adult patients was 454, of which 347 were regularly treated and 107 were referred to other hospitals, sanatoria or to the

country. Of this number, 18 died. The total number of visits made by these patients to the Dispensary was 2,158. The number of children under observation was 85, of which 40 positive cases were sent to hospitals and sanatoria.

The Orthopædic Department, under Drs. Fisk and Steinhardt, has greatly improved during the year. The services of a masseur with his assistants, assigned since 1909 to this department, have proven of the greatest value in the treatment of the disabilities following dislocations, fractures and contractures from cellulitis. As soon as possible it is hoped that the Governors will establish a Mechano-therapeutic Department, properly installed with apparatus and attendants for the use of both the Out-Patient Department and the main Hospital.

The Department of Hydro- and Thermo-therapy, in which both medical and surgical cases are treated, has been of inestimable value in the treatment of the more chronic cases. Its limited quarters have greatly handicapped its full efficiency. Two expert operators are in daily attendance. The number of patients treated in 1911 was 2,201; in 1910, 2,998. The greater number of patients come naturally from the Out-Patient Department, as our in-door service, both medical and surgical, deals with the more acute rather than the more chronic conditions.

The work of the Pathological Department has increased somewhat over that of the preceding year. We regret to note that the number of autopsies performed at the New York Hospital in 1910 was 122, or 26.4 per cent. of the total deaths, while in 1911 it was 109, or 20.8 per cent. of the total deaths. At the House of Relief we are pleased to note that while in 1910 there were 36 autopsies, or 15 per cent. of the total deaths, in 1911 there were 57, or 30 per cent. of the total deaths.

	1911.	1910.
The bacteriological examinations were	1,188	1,150
The histological examinations	804	806
The number of vaccines	60	
The number of other examinations	30,655	27,970

This shows an increase of over 2,000 of the usual examinations plus 600 Wassermann Reactions and inoculations of Guinea pigs for diagnosis. During the past year, the urgent need of an additional assistant has become more and more apparent, and the recent appointment of such an assistant has greatly relieved the situation. We are pleased to report that owing to an arrangement made with Dr. Amsden of the Bloomingdale Staff, we are able now to obtain, upon request of the Attending Surgeons, Wassermann Reactions

within twenty-four hours. It is a great desideratum, as formerly patients were obliged to remain several days before the result of a test was obtained. It obviates one of the causes for the increase of Hospital days for patients.

It is with great pleasure that we report that the system enforced in the Children's Ward by the Medical Board one year ago has been a successful one. The rigid supervision exercised by the Attending Physicians and the Pathological Department, and the precautions required of the nurses in handling the children, have resulted in a rapid, clean and efficient system.

The Reception Ward, which was fully equipped and thoroughly reorganized two years ago, still continues one of our most active and best managed wards. It has a full quota of nurses and daily rounds are made by the Attending or Associate Staff. A new and practical rule has been established in this ward this year, namely, that all patients admitted after 7 P.M., requiring operation on the same night, shall be prepared in the ward and sent thence to the operating room. This avoids disturbing the sick patients in the other wards after 7 P.M. During the year 1,745 patients were admitted to this ward; 59 were transferred to Bellevue Hospital; 469 were sent to the wards. About one in every $3\frac{1}{2}$ patients admitted is sent to the wards.

During the last sixteen months, 34 cases of cancer have been carefully studied by the Cancer Commission in conjunction with the Huntington Fund for Cancer Research. The effects of several experimental remedies have been carefully observed, mainly the ascitic fluid of resistant cancer patients, the normal serum employed intraperitoneally, the mixed toxins of streptococcus and bacillus prodigiosus, Gwyer's thymus extract, thorium, radium, X-ray irradiations combined with local heat and cancer vaccines. While nothing in the way of a permanent relief has been obtained in the use of these remedies, it is believed that the cancer vaccines have a more distinct influence in reducing pain, hemorrhage and the size of a tumor than the ascitic fluids. Especially is this the case when breast-cancer vaccine is used in uterine cancer.

Systematic chemical study of the metabolism of cancer patients has been carefully pursued and specific characters were found in the metabolism of an advanced case of the disease. A careful study of the glycyl-tryptophan test for gastric cancer, as well as of the cytolytic effect of normal serum upon cancer cells, was carried out in the wards and Laboratory and the results have been already published. We regret to hear that the Commission, owing to the enforced separation of the laboratory and clinical staff from each other and from the patients, and because a specially trained corps of nurses cannot be obtained for these patients, deems it wise to

suspend its clinical work until such time as larger facilities and a more complete organization can be provided.

There has been during the year a great improvement in the working force of the operating rooms. Three graduate nurses are now in charge of these rooms, one at night and two during the day. This enables us for the first time to keep patients operated upon at night in the recovery rooms under a graduate special nurse until the next morning, when they are sent to their respective wards. This tends toward the comfort of the sick ward patient who is not, as formerly was the case, disturbed by noisy patients recovering from the anæsthetic or the hurrying nurses in attendance.

The clinical teaching of students in the wards and in the operating rooms has been carried on by representatives of Cornell and Columbia Universities upon Medical and Surgical Attending and Associate Staffs. The Cornell University representatives, Drs. Conner, Hitzrot and Downes, have taught sections 240 hours, during the year. The Columbia University representatives, Drs. Pool and Turnure, have taught sections 180 hours. Two sections of three students each have been assigned to the 1st and 2d divisions of the Surgical side by Columbia University. During the first half of the session, Drs. Hitzrot and Downes have looked after these students in the wards; during the latter half of the session, Drs. Pool and Turnure have done the same.

The value and importance of having a capable graduate nurse in charge of every ward cannot be overestimated.

There is an urgent demand at the New York Hospital for an open-air ward such as has been given the House of Relief. At present we have no place where our patients may obtain this form of treatment. The roofs of the passage-ways between the wards and the administration buildings are utilized in summer for this purpose. They are not available in winter, fall or spring; nor can they be used in windy or stormy weather because there is no protection on the sides. A permanent roof with skylights, movable sides and the proper accessories of a fully equipped ward must be erected in order to obtain the value of this kind of treatment. The open-air ward at the House of Relief has been of the greatest value to the medical and surgical services. The same would be the case if we had one at the New York Hospital.

An event of much importance to the medical service of the hospital was the dividing of the service into two medical divisions, with a separate house staff of four men for each division. This change was made necessary by the steadily growing activities of the service and has resulted in increased efficiency in the care of patients and in the investigation of disease.

The total number of surgical cases treated in the wards of the

House of Relief was 1,299. This is an increase of 94 over last year. Of this number 710 were surgical injuries and 589 surgical diseases. The detailed list is as follows:

INJURIES

Burns and scalds	23		
Concussion of brain	16	Deaths,	4
Contusions	172		
Gunshot wounds	18	"	4
Hemorrhage	8	"	1
Incised and stab wounds	34	"	3
Lacerated wounds	102		
Wounds of joints and muscles	40		
Rupture of the aorta	1	"	1
Rupture of the urinary bladder	1	"	1
Rupture of the duodenum	1	"	1
Rupture of the kidney	1		
Rupture of the liver	1		
Rupture of the lung	1	"	1
Rupture of the spleen and pancreas	1	"	1
Rupture of the urethra	4		
Undiagnosed internal injuries	6	"	4
Fracture of the skull	45	"	11
Fracture of other bones	236	"	4

DISEASES

Abscess	22		
Adenitis	18		
Appendicitis	42	Deaths,	5
Of bones and joints	37		
Empyema, thoracic	7		
Erysipelas	4		
Of female genitals	48	"	2
Of intestinal tract, hernia	127		
Of intestinal tract, obstruction	10	"	1
Of intestinal tract, perforation	10	"	1
Of intestinal tract, kidney	8		
Of liver and gall-bladder	16	"	1
Of prostate, bladder and urethra	48		
Syphilis	19		
Tetanus	1	"	1
Obstetrical conditions	25		
Of rectum and anus	30		

Tumors, cancer	20	Deaths, 2
Tumors, benign	41	
Tumors, other malignant	5	
Unclassified diseases	50	

The death rate from all causes, at the House of Relief, including injury with or without operative interference, was 49 in 1,299, or 3.77 per cent. The total number of major operations performed was 390. This is an increase of 144 over 1910 and of 208 over 1909. The total number of medical cases treated in the wards was 1,356, 197 less than last year. The detailed list is as follows:

DISEASES

Filariasis	1		
Malaria	34		
Typhoid fever	18	Deaths, 2	
Scarlet fever	1		
Mumps	1		
Cerebrospinal fever	4	"	2
Meningococcus carrier	1		
Diphtheria	1		
Dysentery, bacillary	1		
Influenza	10		
Rheumatic fever, acute	65		
Tuberculosis, chronic pulmonary	48	"	1
Tuberculosis, acute pneumonic	2	"	2
Gonococcus infection of joint	8		
Alcohol poisoning, acute	93	"	4
Alcohol poisoning, chronic	43		
Psychosis, intoxication (alcoholic)	52		
Illuminating gas poisoning	15	"	1
Corrosive sublimate poisoning	4		
Cocaine poisoning	4		
Morphine poisoning	1		
Opium poisoning	2	"	1
Carbolic acid poisoning	3	"	1

Hysteria	38		
Neurasthenia	12		
Epilepsy	77		
Other nervous diseases	34		
Skin diseases	20		
Malingering	3		
Unknown	25	"	6

The death rate is 118 in 1,356 cases, or 8.7 per cent.

During this year an open-air ward at the House of Relief has been erected. It covers an area of 720 square feet and is easily accessible to fully equipped linen closets, pantry, kitchenette and toilet-rooms. A permanent roof with the proper skylights for light and air covers it, while the sides and front are open but can be closed during stormy weather. This ward was opened December 13, 1911, and is now fully supplied with the necessary nurses and orderlies. The ward accommodates 10 beds and is equipped for the treatment of actively sick patients. Up to the present time there have been 24 medical and 15 surgical cases treated in this ward. This much needed and greatly appreciated ward promises to be the most useful in the Hospital.

The Genito-urinary Clinic at the House of Relief under Dr. Whiting has increased some 200 new patients during this year. The daily attendance is 88 as compared with 51 last year. The three rooms used for this clinic are inadequate. Three physicians are installed in each room. This renders it not only difficult but sometimes impossible to treat patients rapidly and to collect data and to write the histories in proper form.

The Out-Patient Department, at the House of Relief where 23,671 new patients are treated, has been well taken care of by Dr. Bolling and the House Staff. Owing to many changes taken place in the neighborhood of this hospital, the Dispensary has fallen off 2,886 cases this year.

The Röntgen Ray Department, at the House of Relief, under Mr. Veeder, has taken 339 pictures, and as in most instances two exposures are made in each case, approximately 530 pictures were taken. These comprise:

Head.....	11
Neck.....	2
Thorax.....	15
Upper extremity.....	181
Lower extremity.....	91
Abdomen.....	39
	339

The Board of Governors, at the time of the resignation of Dr. Bolton from the Attending Staff, divided the surgical work of the Hospital into three permanent services: two surgical services at the New York Hospital and one surgical service at the Hudson Street Hospital. This change to continuous service has been desired for many years.

The Medical Board regrets greatly the loss of the valued services of Dr. Percy Bolton, who resigned this year. Dr. Bolton served the Hospital as House Surgeon from 1891 to 1892, and as Attending Surgeon from 1900 to date. The loss of his rare and acute discernment in diagnosis and his excellent judgment in the operative field of surgery cannot but be felt in our institution.

FRANK HARTLEY,
President.

REPORT OF THE SUPERINTENDENT OF THE TRAINING SCHOOL.

To the Board of Governors of the New York Hospital:

GENTLEMEN:—I herewith submit the report of the thirty-fifth year of the Training School.

The Staff of the Training School on duty at the close of the year is as follows:

Officers of Instruction:

Superintendent.....	1
Assistant Superintendent.....	1
Clerical Assistant.....	1
Night Supervisor.....	1
In charge of Private Patients' Building.....	1
In charge of Out-Patient Department.....	1
Visiting Nurses (Out-Patient Department).....	2
Operating Room Nurses (day).....	3
Operating Room Nurses (night).....	1
Head Ward Nurses.....	9
Graduate Nurses in charge of floors of Private Patients' Building.....	3

Pupils:

Seniors.....	33
Second Seniors.....	13
Intermediates.....	25
Juniors.....	25

The Training School consists of ninety-six pupils distributed as follows:

Hospital Wards, public and private.....	74
House of Relief.....	12
Lying-In Hospital.....	6
Sloane Hospital for Women.....	4

During the year, 1,200 applications were received and considered, with the following result:

Accepted and entered on probationary duty.....	81
Accepted as pupils in the School.....	44
Resigned.....	16
Declined.....	21

The total days of illness was 660. The room in the Private Patients' Building, assigned to the use of nurses during illness, was occupied 369 days, of which 179 were by graduate nurses and 190 by pupils.

Thirty-five pupils finished the course, passed the final examinations and were awarded diplomas in 1911. The graduation exercises were held March 2d in the Governor's Room in the Administration Building. Mr. Howard Townsend, Vice-President, presided in the absence of Mr. George L. Rives, President of the Hospital.

The address was delivered by Dr. George L. Peabody, for many years on the Attending Staff of the Hospital and now on the Consulting Staff. Dr. Peabody's long and intimate relations with the School and his warm interest in all that ministered to its growth and development made him a peculiarly acceptable speaker, and the School deeply appreciated this added evidence of his continued interest. In a very interesting way he traced the history of the School from the day of small things to the present condition of maturity and efficiency, and spoke words of kindly counsel to those who were about to go out to their life work. The exercises were followed by a reception in the Nurses' Home which was largely attended by the graduates and their friends.

The necessity of occupying the fifth floor of the Private Patients' Building as a dormitory for nurses was relieved during the year by the purchase of the house No. 16 West 16th Street. This made it possible to restore to the private patient service the rooms which had been temporarily occupied by the nurses and also, provided accommodation for a few additional pupils. While we are grateful for this increased space, we cannot but express the regret that it is still necessary to distribute the pupils in so many different buildings, as it seriously affects the work of supervision and discipline. We look forward to the time when the School can be entirely housed in its own building with accommodation in accordance with modern standards.

The appointment of a graduate nurse for night duty in the operating room has increased the efficiency of this service.

The course of instruction in Dietetics, begun during the previous year and given by a trained instructor, was continued during this year with marked benefit. A thorough knowledge in this department cannot fail to increase largely a nurse's capacity for service.

We are glad that we have been able to respond in some measure to the call which has been made in recent years to the hospitals

throughout the country to the course which has been termed "Social Service." We began this comparatively new branch of hospital work not only as legitimate but as of highest importance, and note with pleasure its continued activity.

Closely allied to this branch of work is that of the Visiting Nurses in the Out-Patient Department. An adequate knowledge of what has been accomplished cannot be conveyed by a tabulated statement, but the following table will offer some suggestion in that direction:

Visits to homes of patients	1,553
Quarts of milk dispensed	7,285
Dozens of eggs dispensed	1,776
Children sent to Campbell Convalescent Cottage, White Plains	302
Children of tubercular parents sent to mountains	35
Summer outing to mothers (with children)	215

Our thanks are heartily extended to all those who in various ways have seconded our efforts to maintain and increase the efficiency of the Training School. The work of the pupil nurses has been most satisfactory and we appreciate their devotion and loyalty to the School.

Respectfully submitted,

ADELINE HENDERSON,
Superintendent Training School.

THE SOCIETY OF THE NEW YORK HOSPITAL.

REPORT OF THE MEDICAL SUPERINTENDENT OF BLOOMINGDALE HOSPITAL, WHITE PLAINS, NEW YORK.

To the Board of Governors:

GENTLEMEN:—The following report of the operations of Bloomingdale Hospital during the year ending December 31, 1911, is respectfully submitted:

GENERAL STATISTICS FOR THE YEAR ENDING DECEMBER 31, 1911.

	COMMITTED CASES.			VOLUNTARY CASES.		
	Men.	Women.	Total.	Men.	Women.	Total.
Remaining January 1, 1911 . . .	151	172	323	18	17	35
Admitted during the year:						
First admissions	24	22	46	13	19	32
Readmissions	9	7	16	11	23	34
Transfers from other institutions for the insane	6	4	10	..	..	..

ADMISSIONS.

There were 140 cases, 64 men and 76 women, admitted during the year. There were 9 fewer patients than cases, 4 men and 5 women having been discharged and readmitted during the year. Twenty-three patients, 8 men and 15 women, had been discharged from the institution prior to January 1, 1911. Three men had been discharged twice, and 5 men had been discharged once. One woman had been discharged four times, 2 women three times, 3 women twice, and 9 women had each been discharged once.

Of those readmitted for the first time, 3 men and 4 women had been discharged as recovered, 2 men and 2 women as much improved, 2 women as improved, and 1 woman as unimproved.

Two men had been discharged twice as recovered, and 1 man twice as improved; three men once as recovered, and 2 men once as improved.

One woman had been discharged twice as recovered, 1 woman once as recovered and once as improved, 1 woman once as improved and once as unimproved, 1 woman three times as recovered, 1 woman twice as recovered and once as improved, 1 woman twice as recovered and twice as improved.

Ninety-four of the admissions, 49 men and 45 women, were first attacks, of which 71, 32 men and 39 women, were admitted first to Bloomingtondale Hospital. Deducting from the whole number of admissions 32 cases that had been admitted in previous years, and 71 admissions in first attack, leaves 37 cases that have either been treated at home or at some other institution previous to admission here.

Forty-seven patients were admitted three months or less after the first symptoms of mental disease were noticed by their friends; 26 between 3 and 6 months, 14 between 6 and 12 months, and 53 more than a year.

Sixty-six patients were received on voluntary application, 24 men and 42 women. There were 23 more voluntary cases than last year. Twenty-one patients, 8 men and 13 women, had previously been inmates of the hospital and were willing, when again in trouble, to seek its aid. Better provision for separating voluntary patients and convalescents from the other patients would serve as extremely useful purpose.

DISCHARGES.

The total number of discharges during the year 1911 was 121; 57 men and 64 women. The number of recoveries was 39,* 19 men

* This includes 2 inebriates and 1 drug habitué discharged as not insane.

and 20 women. This was 32 per cent of all discharges, including deaths—33 per cent was of the men discharged or died, and 31 per cent was of the women discharged or died.

Twenty-one patients, 8 men and 13 women, recovered from the first attack, 2 men and 3 women from the second, 5 men and 1 woman from the third, 1 woman from the fourth, and 1 woman from the ninth attack.

In the 39 cases that recovered, the average duration of the disease from invasion to recovery was 12 months and 21 days; of the men 11 months and 17 days, and of the women 14 months and 1 day. The average duration of treatment was 7 months and 21 days; of the men 7 months and 15 days, and of the women 8 months and 8 days. The disease was reported to have existed before admission an average of 5 months; in the men 4 months and 2 days, and in the women 5 months and 24 days. The longest period of treatment in those recovered was 3 years 4 months and 17 days in the case of 1 man, and 5 years 6 months and 21 days in the case of 1 woman; the shortest was 1 month in 1 man, and 28 days in 1 woman.

Two alcohol habitués, 1 man and 1 woman, not insane, were discharged as recovered.

One case of morphine habit, not insane, a man, was discharged as recovered.

Thirteen cases, 8 men and 5 women, were discharged as much improved. In the cases of 5 men and 7 women, it seemed probable, at the time of their discharge as much improved, that they would have recovered if continued under treatment. Twenty-two cases, 13 men and 9 women were discharged improved. In the case of 1 woman, it seemed probable that she would have recovered if she had continued under treatment.

Of the 25 patients, 8 men and 17 women, who were discharged unimproved, it seemed probable that 1 woman would have recovered if she had continued under treatment.

PERCENTAGE OF RECOVERIES.

The number of patients discharged as recovered during the year was 39, 19 men and 20 women, this being 8 more than the number who recovered last year. This was 25 per cent of all discharges including deaths, being 29 per cent of the men who were discharged or who died, and 26 per cent of the women who were discharged or who died.

The percentage of recoveries on admissions for the year was 28 per cent; for the men 30 per cent and for the women 26 per cent.

DEATHS.

The number of deaths during the year was 22, 13 men and 9 women, this being 4 less than the number who died last year. This was 4.41 per cent of the whole number treated; 5.57 per cent of the men and 3.39 per cent of the women.

Five men died of general paralysis, 2 men of cerebral hemorrhage, 1 man of lobar pneumonia, 1 man of broncho pneumonia, 1 man of general peritonitis, 1 man of pulmonary tuberculosis, 1 man of asphyxiation (suicide), and 1 man of pernicious anæmia.

Two women died of lobar pneumonia, 1 woman of broncho pneumonia, 1 woman of general paralysis, 1 woman of cerebral hemorrhage, 1 woman of cerebral paralysis, 1 woman of pulmonary hemorrhage, 1 woman of pernicious anæmia and 1 woman of mitral insufficiency.

Six autopsies were made during the year, being 27 per cent of the deaths.

MEDICAL SERVICE.

The work of the medical staff has been to some extent reorganized during the year. Dr. Campbell has been placed in general charge of the clinical and scientific work. Staff conferences are now held regularly twice a week, at which all new cases and others in regard to which a conference of the physicians is considered advisable are presented. During the coming year we hope to increase the number of medical officers in accordance with the budget adopted by the Governors.

The laboratory work has been carried on as heretofore by Dr. Amsden. In addition to regular clinical and post-mortem laboratory work, a chemical examination of the water supply has been made every two weeks during the latter part of the year. A bacteriological examination of the water is made at the same time at the laboratory of the New York Hospital. Dr. Amsden occasionally assists the New York Hospital physicians by applying the Wassermann test. The mutual relations between the laboratories is much appreciated by us.

Fortunately there has been no outbreak of infectious disease in the hospital during the year. Many serious physical conditions have, however, been met with among the patients. Eight serious surgical operations were necessary. These were attended to at the White Plains Hospital, to which the patients were transferred for the purpose. Although no serious difficulties arose because of the mental state of the surgical cases, it would, I believe, be advisable to make provision for some surgical work at the hospital.

The dental work at the Hospital has been attended to as heretofore by Dr. D. Austin Sniffen. During the year, 86 patients were treated by the dentist, the total number of visits being 484. Fifty-four teeth were extracted, and 276 fillings, crowns, plates, and treatments represent the work attended to. Arrangements have been made for systematic examinations and care of the mouths and teeth of all the patients hereafter.

NURSING SERVICE.

The average daily number employed in the nursing service during the year was 128, the average number of men being 62 and of women 66. One hundred and forty-eight men and 77 women entered the service during the year and 143 men and 69 women left. Means should, I believe, be taken to improve the standard and the stability of the nursing service. No single feature of the organization of the hospital has a more important bearing on the care and treatment which can be given the patients. Some increase in the average wages paid and some reduction of the work hours would be helpful. An improved system of training and supervision and suitable nurses homes for men and women, where the living conditions would be more attractive than at present would, however, probably do more than anything else to bring to the work a higher grade of efficiency.

On May 25th a number of the Governors of the Society visited the hospital and participated with the members of the Bloomington Committee in the graduating exercises of the training school. Certificates were given to 2 men and 2 women who had completed the prescribed course and passed the examinations required. Two men and 6 women passed the junior requirements and entered the senior class, which now consists of 7 members, one of the men having left the service since the class was formed. Fifteen men and 12 women entered the junior class during the year, of whom 5 men and 2 women still remain in the class, the others having left the service or dropped out of the class. The above statement concerning the nursing service shows the need of making a special effort to place it on a better footing.

OCCUPATION AS TREATMENT.

Occupation and training in occupation have, as heretofore, continued to be a feature in the treatment of the patients. The proportion of the patients who have engaged in some form of occupation has been considerably increased during the year. Mrs. Amsden has given instruction to several of the men and women attendants, who have been thereby enabled to apply better methods in increasing

the activity of the patients in wholesome pursuits. The number of patients to whom special training in occupation was given during the year was 70. The number of articles made was 886.

A creditable exhibit of the handiwork of the patients was presented at the Westchester County Fair. This attracted much attention and was of value in informing the public in regard to the treatment of mental diseases.

"SHORE REST."

The cottage at Oakland Beach to which the name of "Shore Rest" has been given was opened for patients on August 29th, and remained open until November 6th. In the short portion of the summer during which it was available, 22 patients were given the benefit of a stay at the shore. The total number of days board furnished was 429. A day's outing at a time was also provided for 93 different patients, who made the trip to the cottage from the hospital by automobile. The total number of days outing thus provided being 330. Dr. Lyon generously placed at the disposal of the hospital his forty-foot launch, and forty-eight trips on the Sound, with an average of 6 patients on each trip, were made. All the patients who went to the cottage either for a day at a time or for a more extended stay were benefited, and several were much helped toward recovery. The prediction in regard to the Oakland Beach property, then recently purchased, which was made by Dr. Lyon in the report for last year, that it was "likely to be a very valuable addition to the facilities of Bloomingdale for treating patients," has been entirely fulfilled.

GENERAL REMARKS.

The average number of patients in the institution was 351, 1 less than the average of the preceding year.

The number of weeks board and treatment furnished for patients was 18,247. The average expenditure per patient was \$13.43 per week, which includes the total cost of maintaining the properties at White Plains and at Oakland Beach, and the patients upon them, and is for all salaries and wages, repairs, supplies, and maintenance of every kind, except that our high-paying patients repay us for the exclusive services of their attendants, and we deduct this sum from the total expense.

Forty-five women were beneficiaries of the John C. Green Memorial Fund during the year 1911. The amount of income received from that Fund and expended for these women in 1911 was \$7,685.25. The total charitable expenditures during the year 1911 in caring

for and treating patients (preferably acute and presumably hopeful cases) was \$57,031.63. Two hundred and seven individuals shared in this charitable assistance, some being entirely and others partially supported. The sum of \$49,346.38 was expended for this purpose from the earnings of Bloomington Hospital during the year 1911, from which earnings charitable assistance to patients was given to the extent mentioned above. Over 9 per cent of the patients treated contributed nothing whatever to their support; 47.8 per cent of the patients paid sums varying from nothing to the bare cost of their care. Only 52.2 per cent paid a rate which secured a surplus for the institution. The total support and partial assistance rendered to patients unable to pay for their entire cost to the Hospital was equivalent to maintaining 81 free beds.

NEEDS OF THE HOSPITAL.

The additions made by the Governors to the budget pay-roll for the coming year will permit of an increase in compensation in some positions, and also in some elaboration of the organization, which is much needed to increase the efficiency of the work. This will gradually be brought about as suitable persons to fill important positions can be secured.

Provision has also been made for increasing the laboratory equipment. Better facilities for certain treatment features which are now considered essential, and which have already been developed here to some extent, are also needed. The first floor of the women's gymnasium which is now occupied by only a few patients would, if slightly altered, answer admirably for such purposes as occupations, electrotherapy and mechanotherapy. There are rooms in the men's gymnasium which can be used for the men's occupations. This building is, however, not in good repair, and could with advantage be replaced with a modern building well equipped for physical training, occupations, and other treatment measures.

The hospital is already provided with hydrotherapeutic equipment and provision has been made by the Governors for tubs for prolonged baths, which are being installed. A suitable room equipped for surgical work would also be useful.

A large number of changes in the nursing force during the year and the condition of the training classes are sufficient evidence of the need of measures for bringing about more stability and better standards in this service. Nothing would contribute more to this end than to put the hospital in a position to house the members of the nursing service in suitable homes apart from the patients with whom they are in intimate relations during their duty hours.

Dining-rooms where the members of the nursing service may have their meals apart from the patients and employees of other departments are also needed.

The buildings and equipment of the hospital have reached an age and degree of wear and tear when many renewals will soon have to be made. The boiler and power plant, the heating and lighting equipment, the laundry and kitchen equipment and much of the plumbing all require thorough overhauling and such renewals and alterations as are needed to place them in good condition and to bring them up to modern requirements as to efficiency and economy of administration. The buildings have, as a rule, been kept in good repair, but considerable interior painting, and renewals or renovation of furniture and carpets are needed.

An extension of the hospital so that buildings for voluntary and convalescent patients somewhat removed from the present building would add materially to the resources in dealing with the lesser degrees of mental disease, for the treatment of which the provision made is everywhere inadequate.

The following changes in the medical staff have taken place during the year: Dr. Samuel B. Lyon, after twenty-five years' service, retired from the position of Medical Superintendent and was succeeded by Dr. William L. Russell on July 1st. Dr. Theodore I. Townsend, First Assistant Physician, resigned to take effect February 1, 1912, and was given leave of absence from July 1st to that date. Dr. C. Macfie Campbell was appointed First Assistant on August 1st. Dr. Lou Weldon resigned from the position of Medical Intern on August 8, 1911 and was succeeded by Dr. Milton A. Harrington on September 18, 1911.

In conclusion I beg to express my appreciation of the honor of my appointment to the position of medical superintendent and the generous support which has been given me by the Bloomingdale Committee and your Honorable Board.

Respectfully submitted,

WILLIAM L. RUSSELL,

Medical Superintendent.

REPORT OF THE CAMPBELL CONVALESCENT COTTAGES, WHITE PLAINS, N. Y.

December 31, 1911.

To the Board of Governors:

GENTLEMEN:—The convalescent work during the year has steadily increased, and while we experienced a drawback in the form of isolation, owing to contagious and infectious sickness during the early months, the demand for accommodation for children has been steady throughout the year. Many times, we have been obliged to place portable cots in the wards.

While we have many children who are not bed patients, their condition and needs sometimes present a more serious aspect than is the case with those who recover satisfactorily from a definite illness. The Out-Patient Department of the hospital has become closely allied to the Cottages, and through its activity many sickly children in neglected circumstances are watched over for years, and are returned to us from time to time. In many cases, it is only owing to such vigilant care that the children are able to grow up.

During the past year, the children on the whole, have done well, and in some instances have exceeded our expectations.

Our system of treating children is expanding, and the experience gained in this work, which is quite unlike the ordinary hospital routine, is very valuable.

Many of our women patients have showed remarkable improvement, a number having gained in weight at the rate of a pound a day, during a stay of two weeks, and a few having made the surprising gain of from twenty to twenty-five pounds in a month.

We feel that our women patients owe much to the Social Service Department, which takes a keen interest in providing them with prompt and effectual means of convalescing, and which continues its assistance after they have been discharged from the Cottages.

IMPROVEMENTS.

Toward the latter part of last winter, an enclosure was attached to the children's veranda, in order that they might have more indoor play room. This enclosure has been supplied with steam-heating, making it possible to dry the room in wet weather, and

also providing a comfortable place in which the children may receive their visitors on Sunday. In the past, the parents and children congregated in the women's sun-parlor, which was entirely inadequate. The present arrangement appears to be very satisfactory.

Our means of transportation has been greatly simplified by the automobile, which began its service early last summer. There are now no long delays in the basement of the hospital, and in the railway-station, when trains have been missed, and we are relieved of the embarrassment of finding ourselves on the train with many sick children, and babies in arms, for whom accommodation cannot be found.

Patients may now be brought from the hospital in any kind of weather, and the comfort with which a very sick patient may be transferred to the hospital has been demonstrated several times.

The automobile has also been a source of great pleasure to both the women and children, many of whom had never before been in a country place, while the children have been able to visit the Zoological Park.

Even during the winter months, the patients have had many pleasure trips, warm automobile-blankets adding to their comfort.

The kindergarten and school departments having proved how essential they were to the mental occupation of the children, it was decided to prolong the school term into the summer months. During the summer, the school work is carried on in an open pavilion, most of the winter practical work being replaced by gardening and nature studies. The children's gardens were a source of great pleasure to them last summer, and we contemplate allowing them to experiment with hardy vegetables during the coming year.

Some of the girls and boys very readily learn the art of basket-weaving, and do very creditable work. If they remained longer in the Cottages, they would be able to offer a very pleasing exhibit. As it is, they made several articles for Christmas purposes, and contributed a variety of baskets to the Nurses' Bazaar.

The school class which is conducted for the older children, is necessarily of a limited character, but has the advantage of being practically individual instruction, and even a small amount of school work is of value to these children, many of whom, at the age of nine and ten years, can neither read nor write.

In connection with the school work, we have introduced dumb-bell and breathing exercises, as a corrective for stooped shoulders and hollow chests, a child who carries himself erect, or has a developed chest being a curiosity here.

The pavilion for babies which was constructed last summer, has in reality become a summer ward. It is equipped with beds, tables

and portable mattresses, an arrangement which permits all the babies and young children to have their meals and after dinner sleep outdoors, which means an extra two hours daily in the open air.

Not the least of our additions to our equipment during the past year, are the bathing-table for babies, and the steam-sterilizer. Formerly, a small sterilizer of old-fashioned style was used, and a few articles at a time were laboriously sterilized. Our modern arrangement has become an important factor in the general plan of disinfection. The bathing-table speaks for itself, and has long since been invaluable.

The nurses have taken much pleasure in the tennis-court which was laid for them during the summer.

Through the kindness of friends, the attractiveness of the Cottages increases, many bright pictures having been added to our collection. A complete list of donations is appended.

LIST OF DONATIONS FOR 1911.

Mr. George L. Rives	Pictures.
Mr. Howard Townsend	Mirroroscope.
	\$5.00 for kindergarten.
Mr. W. P. Brown	Yearly subscription for magazines for nurses.
	Books for women.
Bloomington Committee	Woolen caps and dressed dolls. (Work of Bloomington Occupation Department).
Mr. David B. Ogden	Christmas toys.
Mr. Augustine J. Smith	Tennis balls.
	Books for women.
Mrs. W. R. Brown	Toys.
	\$5.00.
Mr. F. Clowes	\$10.00.
Mrs. W. Murray	Christmas books.
Miss Blanchard	Books and toys.
Mr. A. Cappell	Magazines.
Mrs. L. Chapman	Toys.

Respectfully submitted,

ALICE C. ELLISON,

Assistant Superintendent.

GOVERNORS

OF

THE SOCIETY OF THE NEW YORK HOSPITAL.

The following is a list of the names of Governors from its organization to the first of January, 1911, with the date of their respective elections and the length of time they continued in office:

GOVERNORS.	Elect- ed.	Re- signed.	[Served the Institution.	
A.				
Charles Ward Apthorp.....	1770	1784	14 years	
William Axtell.....	1770	1784	14 years	
John Alsop.....	1784	1788	4 years	
Gilbert Aspinwall.....	1799	1809	} 15 years	Died in office, 1819.
Gilbert Aspinwall.....	1811	1812		
Gilbert Aspinwall.....	1815			
John Atkinson.....	1800	1809	9 years	
John Aspinwall.....	1814	1817	3 years	
John Adams.....	1818	1854	36 years	
Stephen Allen.....	1823	1839	} 24 years	Died in office, 1852.
Stephen Allen.....	1835			
Augustine Averill.....	1848	1857		
John Jacob Astor.....	1860	1864	4 years	
George W. Abbe.....	1877		2 years	Died in office, 1879.
William W. Astor.....	1879	1882	3 years	
James W. Alexander.....	1904	1905	1 year	
B.				
Gerardus William Beekman.....	1770	1777	7 years	
George Bowne.....	1770	1784	} 26 years	
George Bowne.....	1785	1797		
William Bayard.....	1777	1784		
William Bayard.....	1800	1802	9 years	
Robert Bowne.....	1784		34 years	Died in office, 1818.
Aaron Burr.....	1784	1792	8 years	
James Beekman.....	1785	1787	2 years

STATE OF NEW YORK

No. 34.

IN SENATE

MARCH 28, 1913.

TO THE LEGISLATURE OF THE STATE OF
NEW YORK

The Governors of the Society of the New York Hospital respectfully present their Annual Report of the state of the Institutions under their charge for the year 1912, as required by law.

NEW YORK HOSPITAL AS IT APPEARED IN 1869

ANNUAL REPORT OF THE GOVERNORS OF THE SOCIETY OF THE NEW YORK HOSPITAL FOR THE YEAR 1912.

To the Legislataure of the State of New York:

In conformity with the provisions of its charter, granted by Royal authority June 13, 1771, in the reign of King George III, the Governors of the Society of the New York Hospital present their Annual Report, consisting of the report of the Treasurer and of the several institutions under their control and management, as follows:

The Hospital at Fifteenth street, the Private Hospital at Sixteenth street, the House of Relief at Hudson street, the department for the treatment of mental diseases, known as Bloomingdale Hospital, and the Convalescent Cottages at White Plains, Westchester county.

The number of individuals who received care and treatment in all departments during the past year was 67,037 as compared with 64,677 for the year 1911, as appears in the statistical reports hereto annexed. These numbers may be classified as follows:

	1912	1911
TREATED IN THE CITY OF NEW YORK:		
In wards and private rooms.....	17,790	15,591
In out-patient departments	39,929	40,814
Treated by ambulance surgeons and not brought to the hospitals	7,798	6,982
TREATED IN WESTCHESTER COUNTY:		
In the psychopathic department.....	535	498
In the convalescent homes	985	792
	<u>67,037</u>	<u>64,677</u>

In consequence of the increased amount of work performed, and the increased cost of supplies of all sorts, the expenses were largely increased in all departments of the institution. It has also been necessary during the past year to make some extensive renewals, notably at Bloomingdale, where the electric wiring system has been overhauled and other important additions and improvements are in progress.

On the other hand, the payments for patients' board, and the receipts from the out-patient departments and sundries, have likewise increased; and we have also (for the first time) received payments from the city of New York for our local ambulance service.

ANNUAL REPORT OF GOVERNORS.

The following comparative table shows the totals of current expenditures and receipts from income:

	1912	1911	Increase
Expenditures	\$705,924 96	\$654,644 97	\$51,279 99
Receipts from patients, etc.	418,475 14	379,007 88	39,467 26
Operating cost	\$287,449 82	\$275,637 09	\$11,812 73
Rents, interest and sundry receipts	246,897 41	264,600 19	17,702 78*
Deficit	\$40,552 41	\$11,036 90	\$29,515 51

The Society during the past year has received the following gifts and legacies:

From Mrs. George G. DeWitt, for endowing a bed in memory of her late husband	\$5,000 00
From the Estate of Catherine E. Daly, for endowing a bed	5,000 00
From Estate of Charles Bathgate Beck, final distribution of the residuary estate of the testator	20,282 08
From Mrs. Charles E. Sherman and others to constitute the Thomas Newbold Lawrence Fund, given by his nieces and nephews, the annual income therefrom to be used in the work of the social service of the New York Hospital, in memory of Thomas Newbold Lawrence of New York, son of John Burling Lawrence, who, from 1808 to 1845, was a governor of this Hospital	10,000 00
From Mr. J. Woodward Haven (one of the governors), to establish a dental clinic in connection with the out-patient department	2,000 00

In addition, the Society received on the last day of the year the sum of \$250,000 from Mr. George F. Baker, one of the Governors. This generous gift is intended to effect an affiliation between the

* Decrease.

NEW YORK HOSPITAL — WEST FIFTEENTH STREET
Completed 1877

New York Hospital and Cornell University Medical College, with the object of promoting medical research, aiding the care of patients in the Hospital and furthering the education of students in the college.

It is believed that by bringing to the study of the cases in the Hospital the aid of the facilities provided by the fully organized and equipped college laboratories, more accurate knowledge of the diseases can be gained and better treatment can be given to the individual patients; and the opportunities for the study of disease can be utilized by bringing to the aid of the attending staff the equipment and specialized training of the college staff in the departments of physiology, pathology and chemistry. At the same time the training of the students can be aided by their admission to the wards for observation of patients, under the direction of the Hospital staff.

Arrangements to carry into effect Mr. Baker's intentions have been made with the authorities of Cornell University, and it is expected that the plan will shortly be in full operation.

In the last annual report it was stated that the Society had acquired practically all the block between Fifty-fourth and Fifty-fifth streets and Eleventh and Twelfth avenues for a new site for the main hospital. The property, however, was not fully paid for until the early part of the year 1912, and these payments have necessitated the sale of income-producing property, which has caused a falling off in receipts of rents, interest, etc., as noted above.

The preliminary studies for the buildings intended to be erected on this property have been completed and tentative plans have been prepared. These plans exhibit a hospital of about four hundred beds with all the useful adjuncts of out-patient department, laboratories, etc., which (by relatively small additions and alterations) can be easily expanded into a six hundred bed hospital. The final development of the plans has been delayed, partly because of the uncertainty as to the action of the city authorities in regard to proposed changes along the water front in that neighborhood.

Early in the year Mr. Elbridge T. Gerry, one of the governors of the Hospital, resigned after a service of over thirty-four years;

and Dr. Frank Hartley, one of the attending staff, resigned on the 1st of December, after a service of over twenty years.

The Society has also lost by death Mr. George G. DeWitt, who had been a governor since 1892; and Mr. William W. Hoppin, a governor since 1878, who died on January 3, 1913 — just after the close of the year. Resolutions adopted by the board in relation to the deaths of these gentlemen are appended hereto.

Attention is called to the fact that the statistical reports annexed cover all the institutions under the management of the Society.

HENRY W. CRANE,	G. L. RIVES, <i>President.</i>
<i>Secretary.</i>	

NEW YORK, February 4, 1913.

IN MEMORIAM.

GEORGE GOSMAN DEWITT.

DIED JANUARY 12, 1912.

George Gosman DeWitt, a governor of the New York Hospital for the past twenty years, died on January 12, 1912, at his home in this city, in the sixty-seventh year of his age.

After graduating from Columbia College and the Columbia Law School, Mr. DeWitt entered the law office of his uncles, and with them, and subsequently as the senior member of the firm which succeeded them, he continued successfully the oldest established law practice in the city of New York. His clients were numerous, and he represented with fidelity and skill for over forty years many large and complicated interests. He was a director of several of the most important banking institutions in this city, and also a trustee of Roosevelt Hospital and of Columbia College.

Elected a member of the Board of Governors of this Society in 1892, he served with diligence and fidelity upon the various committees of the board and took an active interest, up to the time of his death, in the welfare of the institution.

No memorial of Mr. DeWitt would be complete without a reference to the kindly and genial disposition which has made his death felt as a personal loss in many and varied circles in this city.

On motion, it was

Resolved, That the foregoing memorial be entered upon the minutes of the governors of the Society and that a copy be sent to the widow of Mr. DeWitt.

[*Extract from the minutes of the board of governors, February 6, 1912.*]

WILLIAM WARNER HOPPIN.

DIED JANUARY 3, 1913.

William Warner Hoppin, who died at his home in this city on Friday, January 3, 1913, was born in Providence on December 15, 1839. He graduated from Brown University in 1861 and soon

afterwards entered the College of Physicians and Surgeons in this city, and obtained the degree of M. D. in the spring of 1864. He served as assistant surgeon in the United States Army during the last months of the Civil War and was also for a time an interne of this Hospital. He felt, however, attracted toward the legal profession and entered the Columbia Law School, from which he graduated in 1869; and thus his education peculiarly fitted him to be of service in dealing with the problems which must always confront those charged with the responsibilities of a large metropolitan hospital.

Mr. Hoppin was elected a governor in the year 1877 to take the place of his father-in-law, Mr. James W. Beekman. During the period of more than thirty-five years, in which Mr. Hoppin served the Hospital as governor, he was always keenly interested in its welfare, and his warm and sympathetic nature led him to look constantly upon the humanitarian aspects of its work. He naturally also took a profound interest in its educational work, and particularly in the training of nurses, in which this Hospital has been so pre-eminently successful.

The members of the board of governors will greatly miss his valuable and enlightening comments on the subjects under their consideration, and will always retain the recollection of his most sympathetic and kindly nature.

Resolved, That the foregoing be entered upon the minutes of the board and that a copy be sent to the widow of our late associate.

[*Extract from the minutes of the board of governors, January 7, 1913.*]

THE NEW YORK HOSPITAL AND ITS PRESENT SURROUNDINGS - 1912

REPORT OF THE SUPERINTENDENT OF THE NEW YORK HOSPITAL AND HOUSE OF RELIEF.

To the Board of Governors:

GENTLEMEN.— I beg to submit the following report for the year 1912.

The cost of maintaining the New York Hospital was \$11,825.14 greater than in 1911.

The pay-roll was increased \$5,940 by the creation during the year of a number of additional salaried positions, including the following: assistant in clinical pathology, housekeeper in Nurses' Home, X-ray technician, general mechanic, night operating-room nurse and anaesthetist. But owing to several reductions and changes the net increase in salaries and wages was only \$4,850.38.

The amount expended for nurses and attendants increased \$1,859.04.

The greatest increase was in the steward's department for provisions. The quantities purchased were not much greater than in 1911, but owing to increase in prices the total cost was \$5,790 greater.

The prices paid for meat, poultry, butter and eggs were much larger than in 1911. The average price paid for meat was 21 per cent. greater, for poultry 7 per cent., for butter 14 per cent., and for eggs 17 per cent.

Owing to the more general use of the X-ray in making diagnoses the expense of this department is increasing rapidly. In 1912 the increase was \$1,422.

HOUSE OF RELIEF.

The expenses of the House of Relief were \$1,739 greater than in 1911. This increase was due partly to the increased prices paid for provisions and partly to larger expenditures for maintenance of real estate and buildings.

The receipts from patients and ambulance service were \$3,592.12 greater than in 1911.

HOUSE OF RELIEF — 67 AND 69 HUDSON STREET
Completed 1894

The roof ward has been occupied for over a year and has amply demonstrated its usefulness. Ten patients are accommodated in this ward.

AMBULANCE SERVICE.

The work in this department is increasing from year to year. In 1909 the total number of calls responded to was 4,286, as compared with 6,971 in 1912. As our ambulance district has not been increased since March, 1909, this is a remarkable increase.

A fourth electric ambulance was added to the equipment of the 15th-16th Street Hospital late in the year. At the House of Relief one electric and two horse ambulances are maintained.

The city of New York began during the year to pay the Hospital for its ambulance service. Up to this time the Hospital had received no assistance from the city in maintaining this service, which is entirely free. Practically all of our calls come through police headquarters.

The average daily number of calls at the Hospital was 19, as compared with 18 in 1911, 14 in 1910, 11 in 1909, and 8 in 1908.

ADDITIONS AND BETTERMENTS.

In order to lessen fire risk the shafts of the passenger elevator in the Private Patient Building, and the elevator in the House of Relief were enclosed with wire glass, and the outside fire escape at the House of Relief was extended to the roof.

Stand pipes were installed in the Nurses' Home, and in the buildings at Nos. 14 and 16 West 16th street.

The quarters assigned the X-ray department becoming cramped another room was placed at the disposal of the department. It is equipped for storing plates and demonstrating radiographs. The work in this department is increasing from year to year and the space allotted to it is insufficient.

By heating the water used in the Hospital with exhaust steam instead of live steam, and by making other minor changes, a considerable saving in coal has been effected. It is estimated that the annual saving will be about 1,200 tons.

In order to make our private service more attractive telephones were installed in all the private rooms. As this department had

ten more rooms at its disposal than it had last year the work in it showed a considerable increase.

A system for signaling officers and internes was installed during the year and has proved very satisfactory. It consists of fourteen annunciator boards located in the wards, laboratories, lounging room, etc. Each board has thirty numbered drops. Each official position is represented by a number. The drops are operated by a board located in the Hospital office. As a drop falls a slight clicking sound is produced, thus directing attention to the board. The numbers are large enough to be read at a distance of from 80 to 100 feet.

PATIENTS TREATED.

The number of admissions to the Hospital was 5,619, an increase of 11 over the admissions of 1911. The number of patients treated in the emergency room was 9,022, an increase of 26 per cent. over 1911.

There was an increase of over 2 per cent. in hospital days. The number of days' care furnished in the private rooms was 9,407, an increase of 17 per cent. over 1911.

There was a decrease of 124 in new patients treated in the out-patient department, but the total visits in this department was 2,609 greater than in the preceding year.

The total number of patients treated in all departments of the Hospital, not including those treated by the ambulance surgeons, was 31,882, an increase of nearly 6 per cent.

DENTAL CLINIC.

Through the generosity of one of the governors a dental clinic was established in connection with the out-patient department. A dentist is on duty three mornings of each week from 9:30 to 12 o'clock. Adults as well as children are treated in this clinic.

The clinic was started March 28th. The number of patients applying for treatment was 244. There were 26 oral surgery operations, 24 of which consisted of opening abscesses and removing necrosed bone, and two were on fractured jaws. There were 391 treatments, 324 fillings, and 411 extractions.

HYDRIATIC DEPARTMENT.

In this department treatment is furnished to ward, private room and out patients.

Men and women are treated on alternate afternoons. Expert operators are in constant attendance.

The average daily number of treatments in 1912 was 8 + against 7 + in 1911.

The number treated during the year is as follows:

	Male.	Female.	Total.	From Wards.	From O. P. Dept.	Total Treat- ments.	Average Day Treat- ment.

HOSPITAL BUREAU OF STANDARDS AND SUPPLIES.

This Hospital retains its membership in the Hospital Bureau of Standards and Supplies. We feel that much has been gained through the standardization of the various commodities. Considering qualities, the prices obtained through the Bureau have been very satisfactory.

GIFTS.

This Hospital has been the recipient during the year of a large number of donations, such as books, toys, flowers, fruit, etc. These gifts, while ordinarily inexpensive, have as a whole assisted much in rendering hospital life more attractive, especially for the children. We desire to encourage these donations.

We are under obligations to the Employment Society of St. Thomas' Church and the Friends' Employment Society for a large amount of sewing done without expense to the Hospital. For statistics, see Statistical Report.

Respectfully submitted,

THOMAS HOWELL,

Superintendent.

**REPORT OF THE MEDICAL BOARD OF THE NEW
YORK HOSPITAL FOR THE YEAR ENDING
DECEMBER 31, 1912.**

To the Board of Governors of the New York Hospital:

GENTLEMEN.—The number of individuals who received care and treatment during the past year was 36,700, as compared with 34,368 for the year 1911.

Of the cases treated in the medical wards, some of the more important diseases are here recorded together with their numbers:

Arteriosclerosis	21
Bronchitis	69
Cirrhosis liver	14
Fever, rheumatic	94
Fever, typhoid	58
Fever, malaria	34
Myocarditis	30
Nephritis	110
Pleurisy	64
Pneumonia, lobar	160
Poisoning, illuminating gas	17
Stomach, ulcer of	26
Syphilis	32
Valvular diseases, chronic cardiac	83

Of the patients treated in the surgical wards, some of the more important injuries and diseases are here recorded together with their numbers:

Appendicitis	400
Cholelithiasis	31
Endometritis	71
Exophthalmic goitre	38
Extrauterine gestation	13
Fractures	115

Gunsbot wounds	13
Hernia	136
Pleurisy, suppurative	25
Rectum	115
Salpingitis	132
Tumors, benign	108
Tumors, malignant	90
Ulcers of stomach	20
Uterus, displacement of	54
Varicocele	30

The operative work in the main hospital has increased during the past year. In 1911, 1,894 operations were performed. In 1912, something over 2,000.

The work in the several divisions of the out-patient department has been performed in a satisfactory manner. The departments of hydro- and thermo-therapy continue to be most useful not only to out-door patients, but also to many ward cases.

The efficiency of the X-ray department has been greatly increased. More and better work has been done, especially in the diagnosis of diseases of the stomach and intestines. The results of past work are now easily accessible for reference and study. The establishment of a room where X-ray plates can be examined and compared, with proper illumination, has been convenient and valuable. Dr. A. H. Busby is to be congratulated upon the results of his efforts in this department.

A chronic and well rounded complaint on the part of the entire medical profession is that so few autopsies are permitted. The pathological changes found in the bodies of the dead have been expressed during life by groups of signs and symptoms constituting the phenomena of disease. Correctly to transpose these signs and symptoms into terms of pathological changes in the tissues, is the whole art of diagnosis. If young men are to become good diagnosticians, they must learn to know not merely the presence of certain signs and symptoms, but also what such signs and symptoms mean. Such knowledge can only be fully acquired by the study of gross pathology. An interne on a hospital staff learns

more by the careful study of one obscure case followed by autopsy, than by the study of twenty such cases where he must accept merely a clinical diagnosis, often made incorrectly by someone else.

During the past year general anæsthetics have been given (on the public side of the Hospital) by two women physicians, Doctor Alma Vedin and her assistant; in some cases also by members of the house staff. More than 2,000 patients received a general anæsthetic. Nitrous oxide followed by ether has been the routine method.

The open drop method of giving ether has been used during the later part of the operation. Chloroform has been used a few times. Nitrous oxide alone and nitrous oxide with oxygen have also been given in a small number of minor cases. Novacain alone, or with adrenalin has been used as a local anæsthetic in a moderate number of cases, chiefly herniæ. During the year the Janeway intratracheal-insufflation apparatus has been used in forty-two cases with gratifying results. The anæsthesia has been quiet and easy, the patients regained consciousness very quickly, and the after sickness has been slight. In twenty-five cases naso-pharyngeal insufflation has been used.

Upon the whole the employment of women doctors as anæsthetists has been an improvement upon former methods.

The continued employment of graduate nurses in charge of the wards has been and must always be of great advantage to the service. The service in the operating room has been good; this is due in large measure to the employment of three graduate nurses in charge of the work, a plan which has abundantly demonstrated its great value.

The clinical instruction of students in the wards and in the operating room has been continued during the past year. Students from Cornell and Columbia Universities have been taught, the former by Doctors Conner, Downes and Hitzrot, the latter by Doctors Pool and Turuure. During the coming year it is expected that such clinical teaching will be carried on still more actively.

Of the cases treated in the medical wards at the House of Relief, some of the more important diseases are here recorded, together with their numbers:

Arteriosclerosis	53
Bronchitis	37
Cirrhosis liver	19
Fever, rheumatic	57
Fever, typhoid	21
Fever, malaria	55
Myocarditis	32
Nephritis	38
Pleurisy	33
Pneumonia, lobar	81
Poisoning, illuminating gas	26
Stomach, ulcer of	3
Syphilis	25
Valvular diseases, chronic cardiac	43

Of the patients treated in the surgical wards at the House of Relief, some of the more important injuries and diseases are here recorded, together with their numbers:

Appendicitis	35
Cholelithiasis	15
Endometritis	4
Fractures	414
Gunshot wounds	39
Hernia	92
Pleurisy, suppurative	5
Rectum	27
Salpingitis	21
Tumors, benign	16
Tumors, malignant	22
Ulcer of stomach	10
Uterus, displacement of	4
Varicocele	6

Roof Ward, House of Relief.—This ward has proven to be of great therapeutic value to the surgical as well as to the medical division. Although closed from May 27th to October 24th, 109

medical patients and 52 surgical patients were treated there during the balance of the year. Research work upon the effect of cold air upon the circulation and the composition of the blood was also carried out. The value of this roof ward is to be measured by the results obtained from open air treatment and these must be seen and watched to be appreciated. Suffice it to say that the improvement shown in many cases has been little short of marvellous. In the opinion of the medical board, everything should be done to maintain this ward in the highest state of efficiency.

Autopsies.—There were 184 deaths at the House of Relief during 1912, and 76 autopsies, a percentage of 40 +. This compares very favorably with the autopsy record of 1911, which was 30 per cent. of the deaths.

It is with profound regret that we are obliged to record the resignation of Dr. Frank Hartley from the attending staff of the Hospital. Dr. Hartley has served as attending surgeon since 1892 with untiring industry and great distinction. During this period he has performed, we believe, a larger number of difficult and dangerous operations than any other member of the attending staff and with results unsurpassed in any hospital. We feel that this tribute may be paid to his ability without fear of contradiction. His retirement from active duty is therefore a very serious loss to the institution.

ALEXANDER B. JOHNSON,

President.

REPORT OF THE SUPERINTENDENT OF THE TRAINING SCHOOL.

To the Board of Governors of the New York Hospital:

GENTLEMEN.— I herewith submit the report of the thirty-sixth year of the Training School for Nurses.

The staff of the Training School on duty at the close of the year is as follows:

Officers of Instruction:

Superintendent	1
Assistant Superintendent	1
Clerical Assistant	1
Night Supervisor	1
In charge of Private Patients' Building	1
In charge of Out-Patient Department	1
Operating Room Nurses (day)	3
Operating Room Nurse (night)	1
Head Ward Nurses	9
Graduate Nurses in charge of floors of Private Patients' Building	3
Matron Nurses' Home	1

Pupils:

Seniors	35
Second Seniors	18
Intermediates	20
Juniors	22

The Training School consists of ninety-five pupils distributed as follows:

Hospital wards, public and private	73
House of Relief	12
Lying-In Hospital	6
Sloane Hospital for Women	4

NEW YORK HOSPITAL—Nurses' Home
Suite of Rooms

During the year 1,000 applications were received and considered with the following result:

Accepted and entered on probationary duty.....	69
Accepted as pupils in the School.....	44
Resigned	16
Declined	9

The total days of illness was 672. The room in the Private Patients' Building assigned to the use of the nurses during illness was occupied 587 days, of which 317 were by graduate nurses and 270 by pupils. And I take this opportunity, in behalf of the nurses who have enjoyed the privileges of this room, to thank the governors of the Hospital for their generosity in donating it to their use.

Thirteen years have passed since death has occurred to a pupil of the Training School, and it is with heartfelt sorrow that I have to record the death of Jane L. Osborne, a member of the Intermediate Class, who died suddenly on February 23rd, at her home in Schenectady, N. Y., where she had gone for a vacation. Miss Osborne had endeared herself to all by her personal charm and earnest devotion to her work, and the sadness caused by her loss was deeply felt. A deputation from the school attended the funeral to pay a last mark of respect to her memory.

The graduation exercises were held on Wednesday, March 4th, in the governors' room in the Administration Building, at which thirty-two pupils were awarded diplomas. Mr. George L. Rives, president of the Hospital, presided. Reverend Charles L. Slatery, D.D., rector of Grace Church, addressed the pupils, many of whom were known to him personally as regular attendants of Grace Church. The address was most interesting, and the high ideals depicted were an inspiration for the best endeavor. The exercises were followed by a reception in the Nurses' Home which was largely attended by the graduates and their friends.

On May 13th, a demonstration of practical work was held by the pupils of the graduating class in the amphitheatre, and the large audience who witnessed it showed much enthusiasm while the different methods used in the Hospital were demonstrated.

A series of monthly lectures has been established for the benefit of the graduate nurses engaged in the hospital work. These are given by representative specialists and have proved a most successful undertaking.

We extend our hearty thanks to all those who have advanced the development and helped to maintain the efficiency of the Training School.

Respectfully submitted,

ADELINE HENDERSON,

Superintendent Training School.

REPORT OF THE SOCIAL SERVICE DEPARTMENT.

The social service work of the nurses connected with the tuberculosis and children's clinics, out-patient department, was combined in August with the work done under the name of "Convalescent Relief," making one department, with a nurse in charge.

Miss Irene Sutcliffe still continues her work and interest. The Association of Tuberculosis Clinics offered in October a nurse, temporarily, to reorganize the work for children of tuberculous parents. This offer was accepted and good work in that direction is being done.

An auxiliary, with Mrs. Arthur Iselin, president, and Mrs. Cornelius N. Bliss, Jr., secretary and treasurer, has been formed to aid the work of this department. Its assistance has been most valuable. Funds for this work have in part been provided for this year by the governors, and the rest raised through the auxiliary by annual dues and donations.

Thanksgiving dinners were given to forty-five families, and Christmas dinners to forty families. Christmas Day a tree and entertainment were provided for the children connected with the department. Candies and gifts were distributed to about three hundred children. Clothing was also given to seventy-five needy persons.

The following is a statement of the work during the year, including all divisions:

Visits made to patients, institutions, etc.	3,467
Referred to co-operative agencies	180
Sent to convalescent and fresh air homes.....	918
Sent to tuberculosis hospitals and sanatoria.....	61
Clothing given to	189
Eggs dispensed	dozen 2,051
Milk dispensed	quarts 8,688

Respectfully submitted,

HANNAH LOUISE JOSEPHI,

(*In Charge.*)

THE SOCIETY OF THE NEW YORK HOSPITAL.

REPORT OF THE MEDICAL SUPERINTENDENT OF BLOOMINGDALE HOSPITAL, WHITE PLAINS, NEW YORK.

To the Board of Governors:

GENTLEMEN.—The following report of Bloomingdale Hospital for the year ending December 31, 1912, is respectfully submitted:

GENERAL STATISTICS FOR THE YEAR ENDING DECEMBER 31, 1912.

BLOOMINGDALE ASYLUM — 1821
DEPARTMENT FOR MENTAL DISEASES.
Site now Occupied by Columbia University

ADMISSIONS.

The number of cases admitted during the year was 156, of which 80 were men and 76 were women. Twenty-five of the men and thirty of the women were received as voluntary patients. The number of persons admitted was 5 less than the number of cases, 2 men and 3 women having been discharged and admitted for a second time before the end of the year.

One hundred and twenty of the cases admitted, of whom 65 were men and 55 women, were suffering from a first attack. Fifty-nine cases were admitted 3 months or less after the beginning of the disorder, 17 between 3 and 6 months, 12 between 6 and 12 months, and 68 more than a year.

DISCHARGES.

The number of patients discharged was 175, of which 80 were men and 95 women. Forty-five of the cases discharged had recovered, 16 were much improved, 29 were improved, 27 were unimproved, and 22 died. Thirty-six were transferred to other institutions for the insane.

Of those who were recovered, 22, of whom 8 were men and 14 were women, had suffered from a first attack; 6, of whom 1 was a man and 5 were women, from a second attack; 9, of whom 4 were men and 5 were women, from a third attack; 4, of whom 3 were men and 1 was a woman, from a fourth attack; 3, of whom 2 were men and 1 was a woman, from a fifth attack; and 1, a woman, recovered from a ninth attack.

The average duration of the disorder from its onset to discharge of the patient from the hospital recovered was 15 months and 23 days; the average duration of hospital treatment was 9 months and 19 days; and the average duration before admission was 6 months and 4 days.

Of the 45 cases who were discharged much improved and improved, eventual recovery seemed probable at the time of discharge in 6 cases, and 2 of these are known to have since recovered.

The percentage of recoveries based on the admissions was 29 per cent. — for the men 22 per cent., and for the women 35 per

cent. Twelve of the men and 13 of the women who recovered had been admitted as voluntary patients.

The number of deaths was 22, 16 men and 6 women. This was 4.11 per cent. of the total number under treatment during the year, and 12.57 per cent. of the total number discharged. Autopsies were held on 13 of the patients who died, this being 59 per cent. of the deaths. The causes of death were as follows:

Men:

of general paralysis	6
of cerebral hemorrhage	3
of lobular pneumonia	1
of lobar pneumonia	1
of broncho-pneumonia	1
of infarction of lung	1
of pericarditis and cardiac dilatation	1
of appendicitis with abscess after operation.....	1
of intestinal obstruction and cerebral arteriosclerosis..	1

Women:

of lobar pneumonia	1
of cerebral softening	1
of hyperthyroidism and cardiac asthenia.....	1
of diabetes and cardiac asthenia	1
of spinal sclerosis and colitis	1
of exhaustion psychosis	1

MEDICAL ACTIVITIES.

The medical staff was increased by two additional members during the year, and the facilities for treatment were improved. In consequence there was some increase in efficiency in the methods of study and treatment of the patients. In addition to the regular semi-weekly staff conferences, which are given up to the presentation and consideration of individual cases, a number of special conferences have also been held for the consideration of administrative questions, or for the discussion of set topics with frequently the reading of papers. To some of these conferences the physicians

living in the vicinity of the hospital were invited, and a number attended. In May, one of the regular meetings of the Medical Society of the County of Westchester was held at the hospital, which was well attended. We are indebted to Professor Hoeh, Dr. Dunlap, and Dr. Lambert of the New York State Psychiatric Institute, and to Dr. Kennedy of the New York Neurological Hospital for their aid in making these meetings successful and useful.

The laboratory work has been continued as heretofore under the direction of Dr. Amsden. In addition to working up the autopsy material and attending to the usual clinical work, systematic analysis of the drinking water has been made, and repeated examinations of the milk from the hospital dairy. Bacteriological examinations of the water and of the milk have been made at the laboratory of the New York Hospital. For these and for much helpful advice in regard to safeguarding the water and the milk supply, we are indebted to Dr. Elser.

The sanitary condition of the hospital has been quite satisfactory during the year. There has been no case of epidemic disease. Two cases of tuberculosis were transferred to other institutions where special provision for the separate care of such cases was available, and, at the close of the year there is no known case of this disease among the patients. As an additional precaution against any possible danger from water-borne disease, arrangements have been made for distributing separately to all the dining-rooms, the kitchen, and to the ice-making plant the water from the deep-driven well, which is practically entirely free from bacteria of any kind. For furnishing sanitary milk, a small well-equipped milk house has been erected in connection with the hospital dairy.

Ten serious surgical operations were performed on patients during the year. For the operations six of the patients were transferred to the New York Hospital or to the White Plains Hospital. Six patients suffered from accidents which resulted in fractures. Considerable minor operative surgery has also been attended to. The need of better facilities for surgical work at the hospital is clearly apparent, as it is not always advisable or even safe to

transfer patients suffering from surgical conditions to other hospitals.

The tubs for prolonged baths which were installed during the year have furnished a useful addition to the therapeutic resources. The connection which was made with the White Plains water supply system rendered it possible to continue the use of the prolonged baths and other hydrotherapeutic measures during the summer drought.

The use of handicrafts and other occupations in treatment has been somewhat extended during the year. An assistant to Mrs. Amsden was employed, and her services have been devoted principally to instructing patients who are not well enough to go to the workrooms. The average number of women employed or under training in some handicraft daily was 125, being 77 per cent. of the average daily number of women patients in the hospital. Workrooms for the men were also opened. An instructor was secured early in the year but after a few weeks he resigned to accept a position in the University of Porto Rico. He was succeeded by a Mr. R. Ellinger Blithe, who had previously been superintendent of the Preparatory Trade School in New York city. The rooms for the men are equipped for joinery, basketry, rug making, brass hammering and piercing, leather work, jig-sawing, broom making, and chair caning. Although they have been in operation since September 1st only, the average number of patients employed daily has steadily increased so that, at the end of the year, it is 25. The growth of the work in applying in the treatment of the patients, the wholesome effect of employment at simple and interesting manual work has gone beyond the space available for workrooms for either the men or the women. During the fine weather a party of men, sometimes as many as twenty, has found pleasant and healthful occupation on the lawns and in the shrubbery.

The use of physical training as a treatment measure has been placed on a more efficient footing during the year. Instructors who devote their whole time to the work have been employed. For the women, Miss Gratia Eldridge, a graduate of the Teacher's College of Columbia University, was employed, and for the men, Mr. Peter Petterson, who had previously been an army officer.

BLOOMINGDALE ASYLUM, 1881
DEPARTMENT FOR MENTAL DISEASES
Site now Occupied by Columbia University

The work in the women's service has been carried on for a longer time and has been more fully developed than the work among the men. Measurements are made and records kept of the progress of the physical condition of the patients. The gymnasiums are used during the winter months and for the rest of the year the grounds furnish ample opportunities for outdoor games as well as for more formal exercises.

Disorders of the mouth and teeth have as heretofore been attended to by Dr. D. Austin Sniffen. The work has been more extensive than during the year preceding, as systematic examinations were made of all the patients and their mouths kept in sanitary condition. One hundred and sixty different patients were examined and 672 treatments were given.

THE NURSING SERVICE.

The average number of persons employed daily in the nursing service for the men and women patients was 136, half of the number being men and half were women. One hundred and twenty-three men and 60 women entered the service during the year and 121 men and 65 women left. Included in the nursing service were a number of persons who were employed only in domestic work connected with the care of the patients. Hereafter these will be placed in a separate group, as they can scarcely be properly regarded as engaged in the actual care of the patients. In September, the position of superintendent of nursing, for which provision had been made in the budget pay-roll adopted by your board, was filled by the appointment of Miss Adele S. Poston. Miss Poston is a graduate of the Training School for Nurses of the Passavant Memorial Hospital of Jacksonville, Illinois, and for five years previous to her appointment at Bloomingdale Hospital had been superintendent of the training schools connected with the State hospitals of Illinois. Since her appointment, courses of instruction for all who enter the nursing service have been organized. The two years' course has also been continued, and plans have been made for a three years' course, part of which will be spent in general nurse training and experience, and those who complete it will be given a diploma.

On May 20th a number of the governors and some of the medical staff of the New York Hospital visited the hospital and joined

with the members of the Bloomingdale committee in the closing exercises of the training school. Certificates were given to one man and four women who had completed the course and passed the examinations required. An interesting and helpful address was made by Dr. Stewart Paton of Princeton.

IMPROVEMENTS IN EQUIPMENT AND PLANT.

A special appropriation of \$100,000 for extraordinary improvements and renewals, which was made by the board of governors, was apportioned by the Bloomingdale committee as follows:

Two nurses' dining-rooms	\$20,000
Laundry equipment	12,000
Electric lighting	30,000
Garage	5,000
Milk house	3,000
Kitchen floor	2,000
Improvement of employees' quarters	13,000
Furniture and carpets	10,000
Extra painting	3,000
Alteration to balconies	2,000
	\$100,000

Considerable progress has been made in carrying out the work specified. One of the dining-rooms for nurses will soon be completed. This will serve an extremely useful purpose by providing a place for nurses' meals apart from the other employees of the hospital. The laundry has been reequipped and has been increased in efficiency with a reduced labor cost. The electric wiring has been overhauled and any danger from fire due to defects has been removed. A new dynamo and engine have been purchased. The milk house has been completed. A contract has been placed for replacing the kitchen floor. The employees' quarters on the fourth floor are being plastered and in other ways made more sanitary and comfortable. Much painting has been done both inside and outside, and some new carpets and furniture have been purchased with a view to increasing the comfort and suitability of the

BLOOMINGDALE HOSPITAL
DEPARTMENT FOR MENTAL DISEASES
WHITE PLAINS, NEW YORK
Completed 1894

patients' halls and apartments. The balconies of Halls 7 and 8 are being overhauled for the purpose of permitting more light to enter the rooms looking out on them and of opening them more fully to the air.

In addition to the improvements made possible by the special appropriation, several less expensive improvements were made out of the current funds. The fire protection of the hospital was improved by adding to the equipment of a forty-gallon chemical extinguisher on wheels, an additional hose cart, a large number of portable extinguishers and a hose rack for the standpipes. Fire-proof doors for the elevators and in the basements between the different sections of the building have been provided for. The fire department has also been reorganized and frequently drilled in the use of the apparatus. The patients and employees are also exercised weekly in leaving the buildings in an orderly and expeditious way on signal. The front portico has been waterproofed and the terra cotta railing renewed. The laboratory has been improved structurally and some new equipment added. A small psychological laboratory has been fitted up. The medical books are being brought together in a suitable room which is being fitted up as a library for the medical staff and for physicians living in the vicinity of the hospital who may wish to use it. A pipe line was laid connecting the hospital with the White Plains water system. The hot water supply of the hospital was improved and made more economical. Five tubs suitably equipped for the administration of prolonged baths were installed. The transportation facilities were improved by increasing the efficiency of the automobile service.

FINANCIAL AND GENERAL.

The total number of patients who were under treatment during the year was 535. Forty-five of these were cared for without charge, and 182 paid the hospital less than the average weekly per capita cost of ordinary maintenance. These 182 patients constituted 43.8 per cent. of the total number treated and the cost to the hospital for their care and treatment was \$63,592.76, which was equivalent to the expense of maintaining 80 free beds at an average

cost of \$14.91 per week, which was the average weekly expenditure required for the care of each patient under treatment during the year. This per capita expenditure includes the cost of maintenance for the properties at White Plains and Rye Beach, salaries and wages, supplies, ordinary repairs, and all other ordinary expenses. It does not include the expenditure for extraordinary renewals and improvements which were made from special appropriations, nor does it include expenditures for special or exclusive nursing which was specially paid for by individual patients. This is the method which has heretofore been employed in figuring the per capita cost. If, however, the expenditure for special nursing, which was really a charge to ordinary maintenance, be included, the average weekly per capita cost was \$16.57. The number of patients who paid less than this amount was 298, or 55 + per cent. of the total number treated, and the cost to the hospital for their support in excess of what they paid was \$83,917.53, which was equivalent to the support of 96 free beds instead of 80. The John C. Green Memorial Fund brought in an income of \$7,697.25, which was used in accordance with the terms of the gift in the support of 46 women.

The income received from the patients who are fully paid for is of immense value in enabling the hospital to maintain a higher standard of treatment for all the patients than would otherwise be possible. In the application of its funds to the relief of those who are unable to pay the full cost or who must be cared for without charge, the highest good can be accomplished in the treatment of as large a number as possible of patients who are suffering from conditions in which cure or at least restoration to home and some measure of efficiency can be reasonably expected. This policy has been aimed at in carrying on the work of the hospital during the year. As room was required for new patients, the removal of many who were past the stage in which improvement could be expected was requested. In a number of instances the patients removed were transferred to the State hospitals. The need of applying private benevolence to providing simply humane care for insane persons is not now as great as it was when the Society first undertook the treatment of this class of sick persons. There were then and for years afterwards, no public institutions for the

BLOOMINGDALE HOSPITAL,
DEPARTMENT FOR MENTAL DISEASES
WHITE PLAINS, NEW YORK
Front. Showing Administration Building

insane, and the only place in the State where hospital treatment for persons suffering from a mental disorder could be obtained was the New York Hospital and later Bloomingdale Asylum. Now, however, there are fourteen State hospitals where free care and treatment can be obtained by any citizen of the State who may be in need of it. What private benevolence can still do to good purpose is, however, to provide for a high grade of treatment for many cases in which the circumstances are such that private rather than public care is clearly indicative irrespective of the ability of the patient to pay for it either entirely or in part. In providing for this class of cases, the hospital is performing an important social service. There is also great need for the application of private funds to the solutions of the problems of cure and prevention of mental disorders, and private hospitals with liberal resources are needed to supplement the excellent work of the State hospitals which is likely to be limited by the necessity of providing for mere numbers and by the changes and defects of public administration.

NEEDS OF THE HOSPITAL.

The needs of the hospital which were enumerated in the report of last year were, as shown by what has been stated in this report, in many instances promptly provided for by your honorable board. Among the most important of those which remain are the detached home for the members of the nursing force, a new gymnasium and workshops for the men patients, and some new buildings for the separate treatment of voluntary and convalescent patients. Needs involving less expenditures have been from time to time brought to the attention of the Bloomingdale committee and have as far as possible been provided for from the current funds. Many renewals and much overhauling are still needed to place the buildings and equipment in condition to meet the present requirements of institutional work.

The usual weekly dances and entertainments were given during the winter months. From May until October the cottage at Oakland Beach was open and parties went over daily by automobile. Suitable patients remained at the cottage for varying periods and

much benefit was derived from the seaside life. The launch was in commission most of the summer. Religious services were conducted as usual by the chaplain, Rev. Frederick B. Van Kleck, and his assistants. The death during the year of the Rev. William L. Evans, who had for ten years officiated at most of the services, occasioned much sorrow and regret.

The following changes in the medical staff have occurred during the year: Dr. Sanger Brown II was appointed assistant physician on June 12, 1912. Dr. Evelyn Dickinson was appointed medical interne on June 13, 1912, and resigned on November 7, 1912. The position was filled by the appointment of Dr. T. S. Keyser, to take effect January 1, 1913.

I am much indebted to the members of the medical staff and to the officers and employees generally for the hearty and efficient co-operation which they have given in the administration of the hospital, without which all my own efforts would have been in vain.

The sympathetic and wise supervision and direction of the Bloomingdale committee and the generous support which has been given by your honorable board has gone far to make the task of the medical superintendent comparatively easy and pleasant.

Respectfully submitted,

WILLIAM L. RUSSELL,

Medical Superintendent.

REPORT OF THE CAMPBELL CONVALESCENT COTTAGES, WHITE PLAINS, N. Y.

To the Board of Governors:

GENTLEMEN.—The following is the report of the women and children's service for the year 1912:

The number of children during the past year shows an increase over any previous year. There were many interesting cases and happy recoveries. Almost any city child would be benefited to some extent by a stay in the country, but the children we have received in the past have not been merely poor or pitiable, but physically in need, making the medical attention given them open to good result.

Dr. L. B. Chapman (New York Hospital), now resident in White Plains, was appointed to the position of attending physician, to succeed Dr. H. E. Schmid, who had resigned. Dr. Chapman's natural understanding of our own hospital, and his co-operation with it, add to the efficiency of our service in the cottages.

Contagion occurred several times during the year. Arrangements have been made with the board of health by which we are permitted to transfer our cases of diphtheria and scarlet fever to the Willard Parker Hospital, and cases of measles to the Riverside Hospital, or to the Kingston Avenue Hospital, Brooklyn. The cases of chickenpox and of clinical diphtheria, which would not have been considered suitable cases for a contagious hospital, were cared for in our own isolation cottage.

While we have been more unfortunate in the matter of contagion than in former years, we have employed more minute precautionary methods than ever before. We are told that our system of examining and admitting children is more exacting than in other convalescent homes. Other institutions have reported more contagion than usual, and if ours appears to have had the largest share, it must be borne in mind that contagion is less active during the summer months, and ours is one of the few convalescent homes for children which are open the entire year. Also, our

CAMPBELL CONVALESCENT COTTAGES, PLAY GROUND — WHITE PLAINS, NEW YORK

circulation of children is constant, many admissions being made every week.

In locating and preventing the spread of contagion, our pathological work is sometimes no small consideration. Our ordinary examinations are made by Dr. George S. Amsden, who has charge of the Bloomingdale laboratory, and who undertakes as much of our emergency work as possible, the remainder being sent to our own hospital laboratory.

The summer season was protracted into the autumn months, so that the children have had long days of outdoor life. Basketball — on a mild scale — is played on what was the nurses' tennis court, and the flower gardens of the past were used to grow the children's vegetables, which matured and were used on the patients' tables.

The summer school is of a lighter nature than in winter, and during July and August includes nature studies, hygiene and gardening. In connection with the hygiene, it seems well worthy of mention that a little girl of ten years, remembering what she had learned, was able to restore to life her young brother and sister, who were at the point of death from asphyxiation by gas.

The most important improvement added to the cottages during the year has been the installing of a fire equipment, which included fireproof doors in the cellar, hydrants in front and rear of the cottages, fire extinguishers, electric gongs, and connection with the Bloomingdale stables and the flats occupied by the farm hands.

While there have been fewer admissions among the women patients than last year, an increased number have remained longer than the specified two weeks. Many of the women require so much treatment, and spend so many days in bed, that they have barely begun to convalesce properly at the expiration of the fortnight. Others have improved very satisfactorily in the same time.

The women's convalescence presents obstacles unknown to the children. They are not so amenable to advice or instruction, and their ailments are much more difficult to treat. As for actual care and nursing, the women's department is a very busy one.

Chronic cases requiring constant nursing and care.

The friends of the cottages are increasing in number, and we wish to thank all those who encourage and assist us — particularly

the Bloomingdale committee, whose support and advice throughout the year, and whose kindness to our children at Christmas are greatly appreciated.

Respectfully submitted,

ALICE C. ELLISON,

Assistant Superintendent.

LIST OF DONATIONS FOR 1912.

Mr. Howard Townsend.....	\$10.00 for Christmas.
Mr. Waldron P. Brown.....	\$10.00 for Christmas.
	Yearly subscriptions for nine magazines for nurses.
Mr. Richard Trimble.....	Wire for court-yard fence.
Mr. Frank K. Sturgis.....	\$10.00 for Christmas.
Mr. David B. Ogden.....	Christmas toys.
Dr. Wm. L. Russell.....	Easter plants.
Mrs. Frank K. Sturgis.....	Christmas cards for children.
Miss H. V. C. Ogden.....	Christmas toys.
Mrs. L. B. Chapman.....	Christmas toys.
Mrs. George S. Amsden.....	Clothing.
Miss Blanchard	Clothing.
Miss Hearn	Clothing.
Mrs. Longstreet	Woolen slippers for children.
Mr. T. F. Clowes.....	\$10.00.

GOVERNORS

OF

THE SOCIETY OF THE NEW YORK HOSPITAL.

The following is a list of the names of Governors from its organization to the first of January, 1913, with the date of their respective elections and the length of time they continued in office:

GOVERNORS.	Elect- ed.	Re- signed.	Served the Institution.
A.			
Charles Ward Apthorp.....	1770	1784	14 years
William Axtell.....	1770	1784	14 years
John Alsop.....	1784	1788	4 years
Gilbert Aspinwall.....	1799	1809	} 15 years
Gilbert Aspinwall.....	1811	1812	
Gilbert Aspinwall.....	1815		
John Atkinson.....	1800	1809	9 years
John Aspinwall.....	1814	1817	3 years
John Adams.....	1818	1854	36 years
Stephen Allen.....	1823	1830	} 24 years
Stephen Allen.....	1835		
Augustine Averill.....	1848	1857	
John Jacob Astor.....	1860	1864	4 years
George W. Abbe.....	1877		2 years
William W. Astor.....	1879	1882	3 years
James W. Alexander.....	1904	1905	1 year
B.			
Gerardus William Beekman.....	1770	1777	7 years
George Bowne.....	1770	1784	} 26 years
George Bowne.....	1785	1797	
William Bayard.....	1777	1784	
William Bayard.....	1800	1802	9 years
Robert Bowne.....	1784		34 years
Aaron Burr.....	1784	1792	8 years
James Beekman.....	1785	1787	2 years
Theophylact Baehle.....	1785	1797	12 years
Thomas Buchanan.....	1785	1800	15 years
Francis Basset.....	1785	1787	2 years
William Backhouse.....	1787	1792	5 years
Nicholas Bayard.....	1794	1798	4 years
John Barrow.....	1795	1807	12 years
Samuel Bowne.....	1796	1797	1 year
Walter Bowne.....	1800	1805	5 years
Dr. Samuel Bard.....	1801	1802	1 year
Rev. Abraham Beach.....	1801	1806	5 years
Thomas Buckley.....	1802	1842	40 years
John Bogert.....	1804	1817	13 years
John L. Bowne.....	1810	1815	5 years
Abraham Barker.....	1813	1816	3 years
Robert H. Bowne.....	1815	1827	12 years
William Bayard, Jr.....	1818	1823	5 years
John L. Buckley.....	1842	1855	13 years

LIST OF GOVERNORS — (Continued).

LEGACIES TO THE HOSPITAL.

The Hospital has been greatly aided by this form of generosity. No precise words are necessary to a valid legacy to the corporation. The following clause, however, may be suggested:

“I give to THE SOCIETY OF THE NEW YORK HOSPITAL the sum of dollars.”

If land or any specific personal property such as bonds, stocks, &c., is given, a brief description of the property should be inserted instead of the words “the sum of.....dollars.”

The Society of the New York Hospital.

NEW YORK HOSPITAL—BROADWAY, OPPOSITE PEARL STREET
Opened for Patients January 3, 1791

TO THE LEGISLATURE OF THE
STATE OF NEW YORK

The Governors of the Society of the New York
Hospital respectfully present their Annual Re-
port of the state of the Institutions under their
charge for the year 1913, as required by law.

NEW YORK HOSPITAL AS IT APPEARED IN 1869

ANNUAL REPORT

OF THE

GOVERNORS OF THE SOCIETY OF THE NEW YORK HOSPITAL FOR THE YEAR 1913

In conformity with the provisions of its charter, granted by Royal authority June 13, 1771, in the reign of King George III., the Governors of the Society of New York Hospital present their Annual Report, consisting of the report of the Treasurer and of the several institutions under their control and management, as follows:

The Hospital at Fifteenth Street, the Private Hospital at Sixteenth Street, the House of Relief at Hudson Street, the department for the treatment of mental diseases, known as Bloomingdale Hospital, and the Convalescent Cottages at White Plains, Westchester County.

The following condensed financial statement shows the need of the Society for increased means, if it is to continue its charitable service to the public upon the same scale as heretofore:

Current expenditure, 1913.....	\$709,265.82
Current income, 1913.....	670,650.35
Excess of current expenditure.....	\$38,615.47
In addition, the Society has expended for necessary repairs and renewals and permanent improvements during the year 1913.....	
	57,269.32
Total excess of expenditures.....	<u><u>\$95,884.79</u></u>

The corresponding figures for the two preceding years are as follows:

Total excess of expenditures, 1912.....	\$86,602.34
Total excess of expenditures, 1911.....	96,270.72

The excess of expenditures over receipts in the three years amounts therefore, to \$278,757.85.

The amounts which have been charged as above during three years to the cost of necessary repairs and renewals and permanent improvements, include some additions to the fixed plant of the Society—especially the purchase of an additional house in Sixteenth Street for housing nurses, and the summer cottage near Rye Beach for the use of inmates of the Bloomingdale Hospital. But the greater part of such expenditures has been made for the purpose of bringing the several hospital buildings up to modern standards. The main building on Fifteenth Street dates back to 1877; the Hudson Street Hospital and the Bloomingdale Hospital to 1894. These structures were among the very best of their day, but there have been vast improvements in hospitals since that day, and extensive renovation is a necessity in all buildings twenty or thirty years old. More thorough protection against fire, modern electric wiring, and better opportunities for fresh air treatment of the sick—both in Westchester County and in the City—are some of the objects on which it has been absolutely necessary to spend large sums; and still more must be spent in order to bring our extensive plant up to the requirements of the present time.

The ordinary current expenses of management also continue to grow, in spite of the most careful attention to economy on the part of our Superintendents. The increase appears to be due to a variety of causes—among which may be noted the growing cost of food and other supplies, and the greater amount of relief which is every year afforded by this Society to those who are sick in body or mind.

The number of individuals who received care and treatment in all departments during the past year increased to 67,490, the largest figure in the history of the Society. The cases may be classified as follows:

Treated in the City of New York:

In Wards and Private Rooms.....	18,484
In Out-Patient Departments	39,888
Treated by Ambulance Surgeons but not brought to the hospitals	7,753

Treated in Westchester County:

In the Psychopathic Department	504
In the Convalescent Homes	861
Total.....	67,490

It should be explained that the persons treated in Westchester County are largely sufferers from chronic mental diseases or are convalescents spending several weeks in the country. The number

NEW YORK HOSPITAL—WEST FIFTEENTH STREET
Completed 1877.

of days treatment would therefore show a much larger percentage in Westchester County than appears from the foregoing statement.

It is also proper to call attention to the fact that of the 67,490 persons cared for in all departments, 64,422, or 95 per cent., were treated free (persons in the Out-Patient Departments, however, pay a nominal price for drugs and dressings supplied).

Considering the vast number of persons cared for, the urgent necessity for extensive renewals in our buildings, and the constantly increasing cost *per capita* of meeting the needs of those who come to us for treatment, we are again compelled to urge upon the public the claims of this ancient charity. We shall probably again expend in the present year nearly a hundred thousand dollars more than our current income; and we repeat that if we are to continue to perform our full duty to the sick and needy, and are to improve to the utmost the many opportunities for public service which lie before us, additional means are imperatively necessary.

The Governors of the Society will welcome and gratefully acknowledge gifts in any amount, whether in the form of legacies or otherwise.

During the past year over 12,000 Ambulance calls were answered, the largest number of any Hospital in the city.

During the year, a donation of Five Thousand Dollars was received from Harrison E. Gawtry, for endowing in perpetuity a bed in the hospital in memory of his wife, Louise Brown Gawtry.

GEORGE L. RIVES,

President.

HENRY W. CRANE,

Secretary.

TOWNSEND AND DIX, Accountants.

New York, January 29th, 1914.

EDWARD W. SHELDON, Treasurer.

CORNELIUS N. BLISS, JR.,
AUGUSTINE J. SMITH,
ARTHUR ISELIN, } Auditing Committee

REPORT OF THE SUPERINTENDENT OF THE NEW YORK HOSPITAL AND HOUSE OF RELIEF.

To the Board of Governors:

GENTLEMEN:—The cost of maintaining the New York Hospital in 1913, was \$260,549.71 against \$266,137.88 in 1912, a decrease of \$5,588.17.

The cost of maintaining the House of Relief in 1913, was \$54,154.97 against \$54,399.26 in 1912, a decrease of \$244.29.

At the New York Hospital the total receipts from patients, special nurses, ambulance service, sales, etc., during 1913, were \$1,229.37 larger than during the preceding year. The income from private patients fell off \$1,946.70.

The activities of the Hospital during 1913 were greater than in any preceding year. The number of admissions to beds was larger than in 1912 by 343 or 6%, but owing to the shorter average stay—13 days in 1913 compared with 14 days in 1912—the total number of days' board and care furnished was 1,471 less.

In the Out-Patient Department there was an increase in visits of 2,245.

In the Emergency Department 9,812 patients were treated compared with 9,022 in 1912, and 7,135 in 1911.

The demands on the Social Service Department are becoming greater each year. There are now four paid workers in this Department.

There are now over 100 pupils in the Training School Department. This Department is doing excellent work and we are constantly receiving inquiries from other institutions for graduates to fill executive positions.

AMBULANCE SERVICE.

The work in this department again shows an increase. In 1909 the New York Hospital responded to 4,286 calls, in 1910 to 5,237 calls, in 1911 to 6,530, in 1912 to 6,971, and in 1913 to 7,509.

The ambulance work at the House of Relief continues about the same year after year. In 1913, 5,005 were responded to, and in 1912, 5,232.

We now have seven electric and two horse-drawn ambulances, two electrics having been purchased during the year from the Presbyterian Hospital.

The average daily number of calls responded to from the New York Hospital was 20—, and from the House of Relief, 14.

ADDITIONS AND BETTERMENTS.

As the laboratory, X-Ray and supplies departments were becoming cramped it was decided late in the year to take the necessary steps toward increasing and modernizing them. The plan adopted calls for the occupation of the first floor of the help's dormitory by the X-Ray Department, the second floor by the laboratory, and the third floor by the sewing, bandage making and record departments.

The supplies department will be transferred to the basement of the Nurses Home.

Two residences on the north side of 16th Street, opposite the Hospital, have been leased and will be used for housing nurses. Nos. 14 and 16 West 16th Street, and the ninth floor of the Private Patient Building, now occupied by nurses, will shortly be turned over to the female help now living in the help's dormitory.

In order to facilitate the transportation of clothing to and from the laundry two galvanized iron chutes were installed leading from the wards to the courtyard, and a bridge was constructed connecting the isolation ward elevator and the laundry building. Connection by means of doors was made between wards O and M and the laundry building. Not only do these changes render the work of transporting clothing to and from the laundry much more simple, but they would be of great service in case of fire in either the Hospital building or the help's dormitory.

A tile floor was laid in the waiting room in the office building.

A flight of marble steps was constructed in the operating room.

Part of the lobby between wards G and H was partitioned off to provide a teaching room for medical students.

A fire alarm system was installed at the House of Relief and a fire expert engaged to conduct weekly drills.

A room was built over the ambulance driveway at the House of Relief and is used by the nurses as a dressing room. The room formerly used for this purpose by the nurses was made a part of the private patient room, which was too small.

A large amount of painting was done both at the House of Relief and the 15th and 16th Street Hospital.

Two large metal washers, three over-driven extractors, and a small mangle are being installed in the laundry. The old equipment, which had been in constant service for about fifteen years, had become badly worn and unfit for further service. The equipment is now thoroughly up-to-date. The work of this department has increased greatly in recent years. At present about 7,000 pieces pass through the laundry daily.

It was noted in last year's report that by heating the water used

BLOOMINGDALE HOSPITAL

DEPARTMENT FOR MENTAL DISEASES

WHITE PLAINS, NEW YORK

Completed 1891

in the Hospital with exhaust steam, and by making other minor changes in the heat, light and power plant, a considerable saving in coal was anticipated. The results have proved the prediction well founded.

In 1913 our consumption of coal was 4,060 tons as contrasted with 5,521 tons in 1911.

INCLUDED IN CITY BUDGET.

The Board of Estimate and Apportionment of the City of New York has included the New York Hospital and the House of Relief in the Municipal Budget for the year 1914.

This means that the City will pay the Hospital for caring for certain sick and injured persons. The rates fixed by the City are \$1.10 a day for medical cases, \$1.25 a day for surgical cases, and 45 cents a day for children under five years.

HYDRIATIC DEPARTMENT.

In this department treatment is furnished to ward, private room and out patients.

Men and women are treated on alternate afternoons. Expert operators are in constant attendance.

The average daily number of treatments in 1913 was 8-|-, the same as last year.

The number treated during the year is as follows:

	Male.	Female.	Total.	From Wards	From O. P. Dept.	Total Treat- ments	Average Day Treat- ment.
January.....	16	24	40	1	39	252	9+
February.....	15	29	44	3	41	190	8+
March.....	11	26	37	2	35	198	7+
April.....	16	24	40	1	39	213	8+
May.....	8	20	28	..	28	175	6+
June.....	3	19	22	..	22	76	3+
July.....	20	25	45	5	40	233	9+
August.....	25	28	53	4	49	289	11
September.....	21	26	47	1	46	240	9+
October.....	18	25	43	1	42	166	6+
November.....	17	27	44	2	42	227	9+
December.....	23	26	49	..	49	283	10+
Total.....	193	299	492	20	472	2,542	8+

DENTAL CLINIC.

The dental clinic, made possible through the generosity of one of the Governors of the Hospital, is rapidly extending its work. A dentist is on duty four mornings of each week from 9:30 to 12 o'clock. Adults as well as children are treated. No charges are made. The number of patients treated in 1913 was 2,439. There were 33 oral surgery operations, 890 extractions, 801 treatments, 536 amalgam fillings, 214 cement fillings, 5 gutta percha fillings, and 162 cleanings.

GIFTS.

This Hospital has been the recipient during the year of a large number of donations, such as books, toys, flowers, fruit, etc. These gifts, while ordinarily inexpensive, have as a whole assisted much in rendering hospital life more attractive, especially for the children. We desire to encourage these donations.

We are under obligations to the Employment Society of St. Thomas's Church, the Friends' Employment Society, and the New York House and School of Industry for a large amount of sewing done without expense to the Hospital. For statistics, see Statistical Report.

Respectfully submitted,

THOMAS HOWELL,

Superintendent.

HOUSE OF RELIEF—67 AND 69 HUDSON STREET

Completed 1894

REPORT OF THE MEDICAL BOARD OF THE NEW YORK HOSPITAL FOR THE YEAR ENDING DECEMBER 31, 1913.

To the Board of Governors of the New York Hospital:

GENTLEMEN:—As will be seen from the figures given elsewhere, there has been during the year 1913 a distinct increase in the activities of the Hospital as shown by the gain in the number of patients treated in the wards and in the emergency and out-patient departments, and by the increased number of operations and of ambulance calls. In the House of Relief during the same period there has been a slight decrease in the number of patients admitted and in the number of ambulance calls.

Of the cases treated in the Medical Wards of the Hospital, some of the more important diseases are here recorded with their numbers:

Arteriosclerosis.....	31
Bronchitis.....	65
Fever, malarial.....	29
rheumatic.....	89
typhoid.....	73
Liver, Cirrhosis of.....	22
Myocarditis.....	23
Nephritis.....	103
Pleurisy.....	58
Pneumonia, lobar.....	236
Stomach, ulcer of.....	24
Syphilis.....	82
Tuberculosis, pulmonary.....	88
Valvular disease, chronic cardiac.....	128

Among the patients treated in the Surgical Wards, the numbers of the more important injuries and diseases are as follows:

Appendicitis.....	451
Cholelithiasis.....	66
Endometritis.....	65
Exophthalmic goitre.....	37

Fractures.....	197
Gunshot Wounds.....	15
Hernia.....	349
Pleurisy, suppurative.....	39
Rectum.....	72
Salpingitis.....	97
Stomach, ulcer of.....	20
Tumors, benign.....	139
malignant.....	114
Uterus, displacements of.....	53
Varicose Veins.....	21

The number of operations is as follows:

Operations in the main Hospital.....	2238
Operations in the Private Patients Building.....	442
Operations at the House of Relief.....	392

Clinical instruction in the wards and in the operating room has been given to the students of Cornell University by Doctors Conner and Gibson and their associates, and during a portion of the year these students served as clinical clerks in the medical and surgical wards. In addition, public clinics have been held for the profession in general by Doctors Murray and Gibson.

The records of the Pathological Department for the current year show a very considerable increase in almost every branch of its work and testify to the constantly growing efficiency and importance of this department of the hospital. The work has been accomplished under many difficulties because of the very cramped quarters of the laboratory and it is very gratifying to know that arrangements have been completed by which the laboratory is to be very greatly increased in area and in working facilities.

The total number of autopsies performed during the year at the Hospital and House of Relief is 158; which represents approximately 26% of the number of deaths of the two institutions.

The demands upon the Social Service Department are increasing steadily and the Medical Board welcomes the opportunity to testify to the great assistance rendered by that department in ministering to the needs of both the ward and the out patients.

Attention should be called also to the splendid results achieved in the convalescence and care of patients at the Campbell Convalescent Cottages at White Plains.

Among the cases treated in the Medical Wards at the House of Relief, the numbers of the more important and common diseases are as follows:

Arteriosclerosis.....	77
Bronchitis.....	58
Diarrhoeal diseases.....	37
Fever, rheumatic.....	48
typhoid.....	17
malarial.....	29
Gout.....	8
Liver, cirrhosis of.....	23
Myocarditis.....	45
Nephritis.....	47
Pleurisy.....	17
Pneumonia, lobar.....	71
Poisoning, by illuminating gas.....	25
Stomach, ulcer of.....	10
Syphilis.....	42
Valvular disease, chronic cardiac.....	49

Of the patients treated in the Surgical Wards at the House of Relief, some of the more important injuries and diseases are here recorded together with their numbers:

Appendicitis.....	43
Cholelithiasis.....	7
Diseases of the female genital organs.....	30
Fractures.....	463
Genito-urinary Diseases in the male.....	29
Gun-shot or stab wounds necessitating operation.....	8
Hernia.....	78
Intestinal Obstruction.....	10
Peritonitis, general.....	7
Pleurisy, suppurative.....	7
Stomach, perforated ulcer of.....	15
Tumors, malignant.....	6
benign.....	12
Typhoid perforations.....	2

The Genito-urinary clinic at the House of Relief has given 7,956 treatments, and admitted 1,267 new patients during the past year. This compares favorably with former years, although a number of night clinics for the treatment of Genito-urinary diseases have been recently organized. Since an additional room for endoscopic and cystoscopic work has been assigned to the clinic, more thorough and satisfactory work has been accomplished in all departments.

The roof ward at the House of Relief continues to benefit greatly the patients who are permitted to enjoy the open air treatment.

Report of
Medical Board.

We are obliged to record with great regret the death of two of our most eminent consulting surgeons, Doctor Frank Hartley and Doctor Charles McBurney; both of them were distinguished and both of whom left their mark on the surgery not only of this city and country but of the world.

ALEXANDER B. JOHNSON,
President.

REPORT OF THE TRAINING SCHOOL FOR NURSES

The Staff of the Training School on duty at the close of the year is as follows:

Officers of Instruction:

Directress.....	1
Assistant Directress.....	1
Clerical Assistant.....	1
Night Supervisor.....	1
In charge of Private Patients Building.....	1
In charge of Out-Patient Department.....	1
Operating Room Nurses (day).....	3
Operating Room Nurses (night).....	1
Head Ward Nurses.....	9
Graduate Nurses in charge of floors of Private Patients Building.....	3
Dietitian.....	1
Matron Nurses' Home.....	1

Pupils:

Seniors.....	34
Second Seniors.....	20
Intermediates.....	22
Juniors.....	28

The Training School consists of 104 pupils, distributed as follows:

Hospital wards, public and private.....	81
House of Relief.....	13
Lying-In Hospital.....	6
Sloane Hospital for Women.....	4

During the year 953 applications were received and considered, with the following result:

Accepted and entered on probationary duty.....	61
Accepted as pupils in the School.....	50
Resigned.....	7
Declined.....	4

Five pupils resigned during the year for various reasons.

The general health of the pupils has been excellent. The total days of illness was 924, the increase over previous years being due to extended illness in three cases. The rooms in the Private Patients Building assigned to the use of the nurses were occupied 745 days, of which 480 were by graduate nurses and 265 by pupils.

The graduation exercises were held Wednesday, March 5, 1913, in the Governors' Room in the Administration Building, when thirty-five pupils were awarded diplomas. Mr. George L. Rives, President of the Hospital, presided. Mr. George P. Ludlam, Superintendent Emeritus, delivered an unusually interesting address, describing the development of the training school from its small beginning to the present time. Mr. Ludlam received a hearty welcome. His keen interest in the growth and development of the school has always endeared him to the former graduates, who were present in large numbers on this occasion. The exercises were followed by a reception in the Nurses' Home, which was attended by the graduates and their friends.

But little has transpired in the year that has just passed to differentiate it from the years that have preceded. And yet, as one looks back over these years and notes how large a place in the world's work has been filled by the pupils of our School who have finished the course here and gone out to face life's responsibilities, he cannot fail to be impressed with the thought of the potentialities resting in a body of one hundred and four intelligent, conscientious, efficient young women who are still under training and preparing themselves to meet the call to duty, from whatsoever source it may come.

Reflections like these have led to a study of the list of our graduates, with a view to classification, and the following table will answer the question so frequently asked as to what is to be the future of our pupils:

Total number of graduates.....	785
Died.....	69

NEW YORK HOSPITAL—Nurses' Home
Suite of Rooms

Those still in the work may be classified as follows:

Connected with hospitals or training schools:

Superintendents, teachers, head ward Nurses and social service workers.....	154
--	-----

Not connected with hospitals or training schools:

Physicians.....	12
Heads of Social Settlements.....	2
Sanitary Inspector.....	1
State Inspector of Training Schools.....	1
School Teachers.....	3
Missionary.....	1
Deaconess.....	1

The remainder are pursuing their calling as nurses in private practice, except such as are living at home, having retired from the work, very many of whom are married.

Yet even these totals fail to carry an adequate idea of the greatly enlarged sphere of activity which awaits the trained nurse. A peculiarity of the training is that while it is primarily technical, it also exercises all the mental and moral faculties, and presents at the close a finished product in the shape of young women thoroughly competent to fill positions where expert knowledge, trained judgment, self-possession and a devotion to duty are essential qualifications.

It is gratifying to report that the dearth of applicants, so generally complained of, has not as yet been experienced by us, so we enter a new year with well grounded hopes and expectations of maintaining the high ideals and lofty aims which have ever characterized our School and contributed so largely to its success.

Respectfully submitted,

ADELINE HENDERSON,

Directress of Nurses.

REPORT OF THE SOCIAL SERVICE DEPARTMENT

To the Board of Governors of the New York Hospital:

GENTLEMEN:—I beg to submit the following report of the Social Service Department, for the year 1913.

The past year shows not only an increase in the work accomplished, but also a growth in the co-operation between our Department and the doctors and nurses of the Hospital, which we believe to be very necessary in accomplishing the greatest good for the patients under our care.

Through the most valuable help of the Auxiliary, without which we could do very little, through conferences with them and by means of the relief fund which they furnish, we have been able to work towards, and to achieve many satisfactory results. The Auxiliary and the Department itself, strive always to work in close combination with the organized relief agencies, and from them too, we have had some splendid aid.

Considerable follow-up work has been undertaken at the request of several of the Physicians and Surgeons of the Hospital.

In January, the nurse in charge was provided with a much needed assistant. In the autumn, Miss Sutcliffe took personal charge of the Social Service work at the House of Relief, filling a want long felt there.

On account of the expansion and rapid increase of the work of the Department, an additional member to the staff was provided last November, from a private source, for one year. We believe we should be forced to fall far short in both the quality and quantity of the work now accomplished in our office without the aid of this additional worker, and are therefore deeply appreciative of this generosity towards the Department.

The number of workers on the staff of the Social Service Department is at present six. This number includes the nurse at the House of Relief, the nurse of the Tuberculosis Clinic, and the nurse of the Children's Clinic.

Special dinners were given to the families of those whom illness had connected with the Hospital, at both Thanksgiving and Christmas. On New Year's Eve, a tree and entertainment were arranged for the children of the Out-Patient Department and for the children of sick patients in the Hospital. Over three hundred were present.

We wish to thank the Trustees of the Haven Fund for the sum of money given to the Superintendent of the Hospital, to be used

for cases coming for aid to this Department. It has been of invaluable assistance to us.

We wish, also, to express our thanks and appreciation to those friends of the Department who have helped our people with gifts of clothing, books, toys, etc.

The following statements of work done during the year, together with amounts of money received and spent, include all divisions of the Social Service Department:

Number of new cases.....	2,862
Visits made to patients, institutions, etc.....	4,739
Accompanied to trains, homes.....	183
Referred to co-operative agencies.....	491
Sent to convalescent and fresh air homes.....	1,382
Sent to tuberculosis hospitals and sanatoria and preventoria.....	99
Clothing given to families.....	204
Eggs dispensed.....dozen	2,297
Milk dispensed.....quarts	9,912
Referred to hospitals and dispensaries.....	299
Surgical appliances and supports given to.....	34
Thanksgiving baskets given.....	43
Christmas baskets given.....	56
Letters written.....	778

ADMISSIONS.

The number of cases admitted was 144, of which 58 were men and 86 were women. The number of persons was 7 less than the number of cases. Nineteen men and 43 women, 62 in all, or 43 per

cent. of the total admissions, were received as voluntary patients. The total number of men admitted was 22 less than in 1912, and the number of women was 10 greater.

One hundred and twelve of the cases admitted were suffering from a first attack. Twenty-five cases were admitted 3 months or less after the beginning of the attack, 26 between 3 and 6 months, 17 between 6 and 12 months, and 43, or about 30 per cent. of the total number admitted, had been ill for more than a year before they were received. In view of the reluctance with which a mental hospital is utilized, some encouragement may be found in the fact that the proportion of cases received after the illness had lasted for as long a period as six months or more was 10 per cent. less than in 1912.

DISCHARGES.

The number of patients discharged was 154, of which 71 were men and 83 were women. Thirty-six of these cases were classed as recovered, 24 much improved, 27 improved, 12 unimproved, 17 died, and 33 were transferred to other institutions. Of those classed as recovered, 9, or 25 per cent., had suffered from previous attacks. The average duration of the disorder from the earliest symptoms observed until the discharge of the patient from the hospital as recovered was 11 months and 4 days. The average duration of hospital treatment of the cases discharged as recovered was 5 months, which is much less than 1912. Among those discharged as much improved and improved, there were at least 13 in whom at the time of discharge eventual recovery could be reasonably expected.

The percentage of recoveries based on the admissions was 25 per cent.—for the men, 22.4 per cent.; for the women, 26.7 per cent. The greater prevalence of general paresis among the men accounts in part for the lower recovery rate. The recovery rate was slightly less than in 1912. This is more than compensated for by the greatly increased number of cases discharged much improved and improved. In all 87 patients were discharged to their homes, and, in most instances, to some degree of social efficiency. This number is equal to 60 per cent. of the number admitted. In the treatment of the patients much attention is paid to establishing healthy interests and activities, and, in discharging them, to co-operate with the friends of the patients in finding an environment for them in which they will not be exposed to conditions which had formerly precipitated the attack or which will too much tax their powers of adjustment. In some instances patients have been aided and encouraged to find positions before they left the hospital. Discharged patients are also invited to visit the hospital occasionally or to call

BLOOMINGDALE ASYLUM—1821

DEPARTMENT FOR MENTAL DISEASE*

ite now Occupied by Columbia University

at the New York office, and many do. This method of making the ultimate aim of treatment the readjustment of the patient as a social unit is in accordance with the Social Service methods which have been so generally adopted in hospital work, and present indications are that it can be still further applied, with advantage to the patients and to the usefulness of the hospital. The patients received at this hospital belong, as a rule, to the more intelligent classes of society. Nearly all the men are engaged in mercantile or professional work, and of the women received last year 35 per cent. were self-supporting workers. Their restoration to usefulness is, therefore, a distinct contribution to the welfare of society.

The number of deaths was 17—9 men and 8 women. This was 3.36 per cent. of the total number of patients under treatment during the year, and 10.36 per cent. of the number discharged.

MEDICAL SERVICE.

The number and character of the admissions and discharges is a fair guide to the medical activity of the hospital. The patients under active treatment require a great deal of medical and nursing attention. In no class of medical work is so much time required for the examination of a patient. The work of the medical staff has been especially hard during the year because of vacancies which could not be immediately filled. The cases have, however, been carefully studied and brought before the staff conferences, which have been held regularly twice a week and occasionally oftener. The evening conferences have been continued as during last year and have been well attended by the physicians of White Plains and vicinity. For contributions to the programs of these conferences we are indebted to Dr. August Hoch, of the Psychiatric Institute, Wards Island; Dr. Henry A. Cotton, of the New Jersey State Hospital; Dr. Arthur W. M. Ellis, of the Rockefeller Institute, and Dr. John A. Fordyce, of New York City.

Much work has been done in the laboratory during the year. In addition to the ordinary examinations of excretions, sputum, blood, etc., 1,342 Wasserman tests were made, and a number of cultures examined for the Campbell Cottages as well as for our own hospital. The water and milk have been examined as heretofore, for aid in which we are again indebted to Dr. Elser and the laboratory of the New York Hospital. Eleven autopsies were held and 580 slides made for microscopic examination. The percentage of autopsies to deaths was 64.7 per cent. The staff of the laboratory was increased by detailing one of the nurses, who also assists the dentist two days a week. For carrying on more active research in special problems

relating to mental disease, a special research fund would be of great service.

A few serious surgical operations were performed during the year, and considerable minor surgery was attended to. The more important surgical work has been done by Dr. J. Fielding Black, of White Plains. The more serious cases have, as heretofore, been transferred for operation to general hospitals. This is attended with additional expense and is not always entirely safe. A surgical operating room at the hospital would be extremely useful.

The only new treatment feature introduced during the year was the use of salvarsan by the intra-spinal serum method in the treatment of general paresis. The occupation departments have been further developed, and two men and four women now devote their whole time to the employment of the patients. The number of patients who received their attention during the year was 252, of whom 69 were men and 183 were women. The output of the departments is a guide to their activity but is not so important as the results with the patients, in whom the work may be a means of re-establishing healthy interests and activities. In the women's department 10,452 articles were made and 5,719 were mended. In the men's department 614 articles were made and 409 mended. Although many of the articles are sold, the receipts scarcely pay for the material used. In the printing shop, 5,604 pieces of printed matter were prepared. The men also did some work on the lawns and in the gardens. Some of the men and women cultivated small gardens of their own. The usefulness of the occupation departments in the treatment of patients has been fully demonstrated. The shops are, however, quite inadequate. The women's rooms are sleeping rooms which have been taken over from Hall 1. They do not furnish space enough and are not well lighted or ventilated. The men have two rooms in the gymnasium building, which are not sufficiently extensive for the growing needs. An additional work-room has, during the year, been fitted up on Hall 6. This is also a school room and is used in the treatment of a group of young patients who have been brought together in a specially arranged section of the hall for intensive treatment.

In the departments of physical education, the number of patients who received attention during the year was 271, of whom 146 were men and 125 were women. These departments have also demonstrated their usefulness. Some new equipment was added during the year. Two additional tennis courts were provided. The greatest need is for a new gymnasium for the men.

The dental work has been attended to, as heretofore, by Dr. D. Austin Sniffin, of White Plains. The individual patients attended

BLOOMINGDALE ASYLUM—1881

DEPARTMENT FOR MENTAL DISEASES

Site now Occupied by Columbia University

to during the year was 237, which was 77 more than in 1912, and a reduction of the number of extractions from 148 to 52 is an indication of the better condition of the patients' teeth, which has resulted from the systematic methods which were introduced last year.

The sanitary condition of the hospital has been satisfactory during the year. There has been no case of epidemic disease. The death-rate was unusually low. No case of active tuberculosis has been admitted, and the hospital has been kept almost free from this disease. The water supply has been further safeguarded by waterproofing the wells for six feet from the surface of the ground, and the water from the deep-driven well is now distributed to every dining room, to the kitchen and to the ice-making plant. The new milk house has furnished means of applying sanitary methods in handling the milk, and a bacterial count is made weekly to maintain the standard. The cows have been tested with tuberculin, and those which reacted have been disposed of. The brooks and pools about the property were cleaned and drained from time to time during the summer, and oil was spread on the lake, with a view to reducing the number of mosquitoes, of which there were, in fact, very few.

THE NURSING SERVICE.

The average daily number of persons employed in the nursing service during the year was 121, of whom 56 were men and 65 were women. Twenty-eight persons were employed as ward maids and men, pantry maids and men, and porters, in connection with the nursing service and the comfort and care of the patients and their quarters. The courses in the training school have been still further extended during the year. The affiliation with the New York Hospital training school has permitted the establishment of a three-years' course, nine months of which is to be given at the general hospital and three months at the Manhattan Maternity. Nine probationers have entered the course. The two-years' course has been continued, and at the end of the year there were 34 in the class. The school has been registered by the State Department of Education.

On May 22, the annual visit to the hospital of the Board of Governors was made, and the graduation exercises of the training school were held on the same day. Two men and 3 women were given certificates. The address to the graduates was made by Dr. William M. Polk, Dean of Cornell University Medical School.

IMPROVEMENTS IN EQUIPMENT AND PLANT.

The nurses' dining-room was completed during the year and is a source of great satisfaction. The nurses' quarters were also greatly improved by being almost completely remodelled and refurnished. The cement floor of the main kitchen was removed and replaced with tile, which is much more sanitary. The wooden tables and cupboards were removed from the kitchen and metal ones substituted. Some additional equipment was also provided. The sorting room of the laundry was enlarged. A new garage was erected. Work was begun towards remodelling the second floor of the carriage room at the stables, as quarters for the employees of the stables and farm. The iron guards were removed from all the windows of two halls occupied by patients and were replaced with fly screens, which were much more needed. The fence dividing the hospital property from that of the Burke Foundation was completed. Considerable interior and exterior painting was done during the year.

FINANCIAL.

The total number of patients who were under treatment during the year was 504. Of these, 45 were cared for without charge. This was a larger proportion than in 1912. The number who paid less than the average weekly per capita cost of maintenance was 290, being 57.5 per cent. of the total number treated. The cost to the Society of the care and treatment of these patients was \$89,018.74, which is equivalent to the maintenance of 94 free beds. Of this amount \$7,591.70 was received from the John C. Green Memorial Fund, which was applied, in accordance with the terms of the Memorial, to the support of 49 women. The average weekly per capita expenditure was \$18.22. This includes the cost of maintenance of the properties at White Plains and Oakland Beach, salaries and wages, supplies, ordinary repairs, and all other ordinary expenses. It does not include amounts spent for extraordinary renewals and improvements for which special appropriations were made.

NEEDS OF THE HOSPITAL.

The fund of \$100,000 which, in 1912, was made available for improvements will soon be entirely expended. It was applied as follows: The erection of a nurses' dining room, a garage, a dairy building, a barber shop and an addition to the laundry; the renewal of laundry and kitchen equipment and of the kitchen floor; extensive overhauling of the electric wiring and the purchase of a

dynamo and engine; the plastering, painting, plumbing and partial refurnishing of the nurses' quarters; repainting and renewing carpets and furniture in portions of the patients' quarters; improving the quarters for farm employees; improving the balconies; furnishing a filter for the lake water; additional medical and nursing equipment. By the expenditure of this fund the hospital has been made safer, more sanitary, more comfortable and attractive, and in some respects more efficient. Other uses could have been made of the fund, but those to which it was applied seemed at the time the most important. Large as it was, additional funds are needed to enable the hospital to keep pace with the steadily advancing requirements. The special fund for furniture was scarcely half of what is needed. The plumbing and toilet equipment throughout the hospital are no longer in keeping with modern standards. There is no gas on the property for use in the laboratory and for cooking. The balconies are inadequate for the application of fresh air and sunshine to the extent to which these are now used in the treatment of the sick. As the service grows in activity, the need of rearranging the halls and rooms to provide for classifying the patients in smaller groups becomes more evident. In previous reports I have referred to the need of a new gymnasium for the men, of new work shops for both men and women, of nurses' homes, and of separate buildings for voluntary patients and convalescents. A separate building or "Cure House" for the application of various physical measures of treatment, such as baths, electricity and mechanotherapy, would furnish the means of employing these measures in a more attractive as well as a more efficient manner than is possible with present facilities. Better provision for the social life of the 300 employees would add to their contentment and efficiency. The members of the nursing service organized a Club during the year and were given the use of the men's gymnasium in the evenings. This has worked out very satisfactorily, but better facilities are needed.

OAKLAND BEACH COTTAGE.

The cottage at Oakland Beach was open from June 6th to October 15th. Ninety-one parties, consisting in all of 476 patients, visited the cottage during this period, going over by automobile and remaining during the day. Boating, bathing, fishing, shore dinners and other seaside pleasures were enjoyed and much benefit was derived. The motor boat, which was placed at the disposal of the hospital by Dr. Lyon, added much to the enjoyment and benefit. Thirty-five patients remained at the cottage for several days or

longer, the average number in residence being 6. The amount received from patients for the use of the cottage and for transportation was \$979.16, which is much below the cost of maintenance.

CONVALESCENT COTTAGE FOR MEN.

The cottage for convalescent men from the New York Hospital was used for nurses while their quarters at the hospital were undergoing renovation and was not opened for patients until August 18th. It was closed on November 1st and re-opened December 23rd. The number of patients admitted was 53, and the number of hospital days 660.

GENERAL.

The usual social dances and other entertainments for the patients were held during the winter months, and during the summer outdoor sports, picnic parties, drives and long walks were enjoyed. Religious services were conducted as usual by the Chaplain, Rev. Frederick B. Van Kleeck, and his assistants.

The following changes took place in the medical staff:—On May 1st, much to our regret, Dr. C. Macfie Campbell resigned from the position of First Assistant Physician to accept a similar position at the Henry Phipps Psychiatric Clinic and the position of Adjunct Professor of Psychiatry at Johns Hopkins Medical College. On October 1st, Dr. Charles I. Lambert was appointed as his successor. Dr. Lambert is a graduate in science and in medicine of the University of Iowa, and for nine years was a member of the staff of the New York State Psychiatric Institute and of the Manhattan State Hospital in New York City.

On April 1st Mr. Louis D. Ferriss, who for nearly twenty years had served acceptably in the position of steward, resigned from the position because of the condition of his health. He was succeeded by Mr. Earl R. Quackenbush, who for fifteen years had been steward of the Gowanda State Hospital at Gowanda, N. Y.

Several gifts were received by the hospital during the year, among them being an attractive clock from President Rives, a marble lawn seat, pictures for the nurses' sitting room, books, etc., all of which are gratefully acknowledged.

To the officers and employees of the hospital who, by their earnest and efficient work, have contributed so much to the success with which the hospital has been conducted during the year, I express my acknowledgment and appreciation.

BLOOMINGDALE HOSPITAL
DEPARTMENT FOR MENTAL DISEASES
WHITE PLAINS, NEW YORK
Front, Showing Administration Building

The continued confidence and support of the Bloomingdale Committee and of your Honorable Board have been a constant source of encouragement through the year and of hope for the future.

Respectfully submitted,

WILLIAM L. RUSSELL,
Medical Superintendent.

REPORT OF THE ASSISTANT SUPERINTENDENT, CAMPBELL CONVALESCENT COTTAGES, WHITE PLAINS, NEW YORK

To the Board of Governors:

GENTLEMEN:—I herewith submit the report of the Women and Children's service for the year 1913.

The number of admissions to both cottages during the year was practically the same as that of 1912, which appears to be as large a number as can satisfactorily be admitted and given a proper degree of care. It would be possible to admit a larger number of children if our work were of the nature of a summer home, which affords fresh air for a great many children during the vacation season; but, as we receive many children who require constant nursing, their length of stay necessarily depends upon their physical improvement.

With reference to the actual nursing which has been given both women and children, we feel that the past year has been the most successful, there having been many surprising improvements and unexpected recoveries. No changes have been made in the nursing staff, which fact is advantageous to the patients. Nursing convalescents is a branch in itself, and as the nurse's understanding of this work broadens, it becomes more valuable to those placed in her care, and we feel that many of our most conspicuous cases owe much of their improvement to the experienced care of their nurses.

The children's kindergarten and school continue to be a source of instruction and pleasure, and seem to be more necessary every day. The ignorance and helplessness of some of our children are amazing, and, as many children remain in the institution many weeks, such instruction as can be given them in our schoolroom is very useful. The brighter children enjoy the reading-room and can be taught to interest themselves in suitable occupations. There are great distances of intellect separating children of the same age. The winter school work is naturally different from that of the summer, and at the opening of spring the children give a little exhibition of practical work, such as basket-weaving, clay modelling, drawing and sewing. The summer gardening and rides to the beach continue to be a healthful attraction, and are remembered by many older boys and girls, who regret that they have outgrown the Cottages.

The institution was free from contagion eight months out of the year, which is a fortunate circumstance, considering that our children's department is a constantly changing scene, new cases being admitted every week.

IMPROVEMENTS AND REPAIRS.

During the year there were planted additional shade-trees and flowering shrubs. These will not only provide pleasant shade for the children on warm, summer days, but will also contribute their foliage towards beautifying what was originally an uncultivated field, but has been gradually developing into attractive grounds.

A considerable amount of painting was done during the year, including the exterior woodwork of the Cottages and the iron fence. The front road was remade upon a firmer and more level bed, and a new road was laid from one end of the institution to the back road, for the use of heavy wagons. The grass at the rear of the Cottages had always been scant and choked with weeds, but during the autumn the ground was ploughed and leveled and fresh seed sowed, and we are anticipating a great improvement in the appearance of the lawn.

The winter has been unusually mild, and the patients' outdoor hours have seldom been shortened by the cold, so that they have derived all the benefit possible from fresh-air treatment. Even on cold days the children enjoy the air from the depths of cosy sitting and sleeping-bags, into which they are securely tucked.

Christmas was a very happy season, and the Christmas-tree entertainment the most successful we ever had. The children, as usual, trimmed their own little tree, and prepared pretty carols and recitations. The Christmas dinner was greatly enjoyed by all, and was the first of its kind that many, if not all, of our women patients had ever seen. Some of their expressions of gratitude were very pathetic. The children's anticipations were remembered by several friends, whom we wish to thank on behalf of our girls and boys. A complete list of donations for the year is appended.

I wish to express my appreciation of the advice and co-operation with which the Board of Governors have always supported my endeavors to develop this important and interesting undertaking.

Respectfully submitted,

ALICE C. ELLISON,

Assistant Superintendent.

CAMPBELL CONVALESCENT COTTAGES, PLAY GROUND - WHITE PLAINS, NEW YORK

CAMPBELL COTTAGES.

DONATIONS FOR 1913.

Mr. George L. Rives.....	\$10.00 for Christmas.
Mr. F. K. Sturgis.....	10.00 for Christmas.
Mr. Waldron P. Brown.....	10.00 for Christmas.
	Yearly subscription for nine magazines for nurses.
Mr. David B. Ogden.....	Christmas toys for all the children.
Mrs. F. K. Sturgis.....	Christmas post-cards.
Mr. F. Clowes.....	\$10.00 for Christmas.
Mrs. J. Steers.....	Post-card album.
Mr. R. Fanelli.....	\$5.00.
Mrs. L. B. Chapman.....	Christmas toys.
Miss A. Blanchard.....	Books and clothing for children.
Mrs. L. E. Nicholson.....	\$5.00.
Mrs. Charles I. Lambert.....	Christmas toys.
Mr. Earle D. C. Vendig.....	Games.
Mrs. Parsons.....	Hallowe'en post-cards.
Mrs. C. Moore.....	Post-card albums.
Mrs. E. Forsythe.....	Christmas gifts for women patients.

GOVERNORS

OF

THE SOCIETY OF THE NEW YORK HOSPITAL.

The following is a list of the names of Governors from its organization to the first of January, 1914, with the date of their respective elections and the length of time they continued in office:

NEW YORK HOSPITAL—BROADWAY, OPPOSITE PEARL STREET

Opened for Patients January 3, 1791

TO THE LEGISLATURE OF THE
STATE OF NEW YORK

The Governors of the Society of the New York
Hospital respectfully present their Annual Re-
port of the state of the Institutions under their
charge for the year 1914, as required by law.

NEW YORK HOSPITAL AS IT APPEARED IN 1869—BROADWAY, OPPOSITE PEARL STREET

ANNUAL REPORT

OF THE

GOVERNORS OF THE SOCIETY OF THE NEW YORK HOSPITAL FOR THE YEAR 1914.

In conformity with the provisions of its charter, granted by Royal authority June 13, 1771, in the reign of King George III., the Governors of the Society of the New York Hospital present their Annual Report, consisting of the report of the Treasurer and of the several institutions under their control and management, as follows:

The Hospital at Fifteenth Street, the Private Hospital at Sixteenth Street, the House of Relief at Hudson Street, the department for the treatment of mental diseases, known as Bloomingdale Hospital, and the Convalescent Cottages at White Plains, Westchester County.

The number of individuals who received care and treatment in all departments during the past year was 64,376, as appears in the statistical reports hereto annexed. These numbers may be classified as follows:

Treated in the City of New York:

In wards and private rooms.....	17,630
In Out-Patient Departments.....	37,242
Treated by Ambulance Surgeons and not brought to the Hospitals.....	7,927

Treated in Westchester County:

In the Psychopathic Department.....	551
In the Convalescent Homes.....	1,026
	64,376

These figures are in a way misleading, because the amount of work done and relief afforded in Westchester County, dealing as it does so largely with convalescent or chronic cases, cannot be measured merely by the numbers of individuals assisted.

The needs of the Society for an increased endowment are as urgent as ever. The following brief statement shows how large are the imperative demands upon its funds:

Current expenditure, 1914.....	\$729,913.43
Current income, 1914.....	713,201.72

Excess of current expenditure.....	\$16,711.71
------------------------------------	-------------

In addition, the Society has expended for necessary repairs and renewals and per- manent improvements, during 1914.....	24,491.44
---	-----------

Total excess of expenditures.....	\$41,203.15
-----------------------------------	-------------

The corresponding figures for the three preceding years were as follows:

Total excess of expenditures, 1911.....	\$96,270.72
Total excess of expenditures, 1912.....	86,602.34
Total excess of expenditures, 1913.....	95,884.79

The excess of expenditures over receipts thus amounts for four years to no less than \$319,961.00, a reduction of course, to that extent, of the invested funds of the institution.

It will be noticed that there has been a very sensible diminution in the amount of the deficit for 1914, as compared to that for the three previous years; a fact which is chiefly due to the allowance by the City of a sum of money towards meeting the cost to the Society of caring for the sick poor. During the early years of its history, the Society was in the annual receipt of considerable sums from the City and State, but for nearly a century it has received nothing from the municipality. As the amounts allowed by the City of New York to other hospitals are not given as gratuities, but as payment (though on a wholly insufficient scale) for services rendered in caring for those who would otherwise become public charges, there seemed to be no reason why this Society should not seek to share in the allowances annually made. The rate paid by the City varies from 45 cents a day for children to \$1.25 a day for adult surgical cases, whereas the actual average cost of caring for ward cases, adults and children, for the past year, was \$2.46 a day,— or at least double the average City allowance. The City investigates every case in which we claim an allowance, and declines to pay for those who may be found to be in fact able to pay for themselves, or who are not strictly cases of *emergency*, thus limiting public assistance to a very moderate fraction of the poor who come to us for help and

NEW YORK HOSPITAL—WEST FIFTEENTH STREET

Completed 1877

whom we treat without charge. Nevertheless, in spite of this strictness and in spite of the fact that our bills for October, November and December, had not been audited and paid by the end of the year, the payments actually made by the City in 1914, for patients in the Sixteenth Street and Hudson Street Hospitals, together amounted to \$30,600.75; bringing up the total received for board of patients in the two hospitals mentioned, together with Bloomingdale Hospital, to the unprecedented sum of \$472,291.86, or nearly 65 per cent. of the current expenses of maintenance for the year.

The expenses of maintenance are believed to be now as low as is consistent with due regard to the welfare of our patients, and it is not apparent, in spite of careful and prolonged inquiry made during the past year, how any important saving can be effected without injury to the service. Nor is it apparent how our income can readily be increased. The rates payable by patients at Bloomingdale have been gradually but materially increased; and the rate payable by such ward patients in our general hospitals has been raised to \$2.25 a day, which is less than the actual cost, and materially less than the charge at any respectable hotel quite irrespective of the expense of medical and nursing attendance, etc., but is as much as such patients are generally willing or able to pay. Only a limited number of ward patients pay anything, as appears from the following table:

Fifteenth-Sixteenth Street Hospital.	69 per cent. are free.
Hudson Street Hospital.....	91.4 per cent. are free.
Bloomingdale Hospital.....	16½ per cent. are free, or paying less than half the expense of their support.
Convalescent Cottages.....	100 per cent. are free.

The Society has expended great sums of money in the last four years in keeping its various hospital buildings in repair, or in improving their physical condition, so as to bring them up to the standards of the present day. These efforts have been signally successful with the institutions in the City, as is evidenced by the fact that the State Charities Commission a year ago put the Society's hospitals in Class II. for buildings, but has recently raised them to Class I. At Bloomingdale large amounts have been expended in the effort to improve sanitary conditions and to guard against the dreadful possibilities of fire, involving the necessity of extensive rewiring of the electric light system. Nevertheless, much still remains to be done to put that establishment in a thoroughly satisfactory condition. In particular, the plumbing is still far from what it should be, the bal-

conies should be greatly enlarged in order to afford opportunity for fresh air treatment, a new men's gymnasium, and new workshops for both men and women, and a nurses' home should be provided. A small detached villa for women patients is another need which has long been felt. Some of these smaller buildings could be erected for relatively small sums of money, and could be built as memorials. Three detached villas have already been constructed in this way and named after the donors, the Banker Villa, the Brown Villa and the Macy Villa. It is hoped that the examples thus set may be thought worthy of imitation.

The War in Europe has affected the Society by calling upon us for the service, temporarily, we trust, of physicians and nurses. Five of our surgical staff and fourteen of our nurses have already gone on this errand of mercy, and if the war lasts much longer, we shall doubtless have to give further help. Thus is the New World again called on to redress the balance of the Old.

During the past year, 12,368 ambulance calls were answered, the largest number of any hospital organization in the City, with the possible exception of Bellevue and Allied Hospitals. The average number of calls was over 33 a day.

A most important and interesting part of the work of the Society is the increasing activity of the Social Service Department which seeks to help patients after their discharge from our wards either by finding them work to do, securing them help at convalescent or tuberculosis homes or assisting them in their own homes. The work also extends to "follow-up" cases, where former patients are visited at home after discharge and instructed as to precautions in their convalescence and as to preventing a recurrence of disease. The aid afforded by the Ladies' Auxiliary, a Committee composed mainly of the wives of Governors and physicians of the Society, has been invaluable, and cordial thanks are due to its members for the zealous and intelligent efforts which they have so constantly exerted.

During the past year we have received Five Thousand Dollars from the Estate of the late Dr. Frank Hartley, for many years an Attending Surgeon, given to endow a bed, and also a legacy of One Thousand Dollars from the Estate of Frederick Duhrkop. The Governors of the Society will welcome and gratefully acknowledge gifts in any amount, whether in the form of legacies or otherwise.

The reports annexed exhibit in detail the manifold activities of the Society for the past year. No one, we think, can read them without becoming convinced that we are fully justified in again urging the claims of this ancient charity upon a generous public, whether in consideration of the vast number of distressed and indigent people

whom we have cared for, or of the constant necessity for extensive renewals and repairs to our buildings, or of the steadily increasing cost of meeting the needs of those who apply to us for treatment, or of the great variety of relief we are able to afford both to body and mind. If the Society is to perform its full duty to the community, we must have large additions to our income, which we repeat can best come from an increase in our endowment, and for this we ask with all possible earnestness and urgency.

GEORGE L. RIVES,
President.

HENRY W. CRANE,
Secretary.

		\$830,782.45	

REPORT OF THE SUPERINTENDENT OF THE NEW YORK HOSPITAL AND HOUSE OF RELIEF.

To the Board of Governors:

GENTLEMEN:—The cost of maintaining the New York Hospital in 1914 was \$285,835.98, against \$260,549.71 in 1913, an increase of \$25,286.27.

The increase is accounted for, in part, as follows:

Rent of Nos. 13 and 15 West 16th Street.....	\$4,591.73
Replacing Worn-out Laundry Machinery.....	3,845.01
Increase in Insurance Premiums.....	2,479.41
Increased Cost of Drugs and Medicines.....	1,630.46
Increased Cost of X-Ray Supplies.....	2,036.38
Increase in Pay Roll.....	3,936.54
Increase in Heat, Light and Power Plant Ex- pense.....	4,119.28
Cost of Equipping New Record Room.....	600.00

An increase of nearly two cents a pound in the cost of meat.

The cost of maintaining the House of Relief was \$55,384.79 against \$54,154.97 in 1913, an increase of \$1,229.82.

The total number of patients admitted to the wards and private rooms was 5,722 against 5,962 in 1913—a decrease of 240, or about 4 per cent. But, owing to the fact that the average stay in the Hospital was two days longer than in 1913, the daily average population was larger—218 against 209 in 1913. The number of days' care furnished was 94,218 against 92,142 in 1913, an increase of 2,076.

The number of patients cared for in the private rooms was 43 less than in 1913.

Owing to the effects of the depressed industrial conditions and the Workmen's Compensation Law, the number of persons applying at the Emergency Room and in the Out-Patient Department was decreased slightly. On the other hand, the number of return visits made to the Out-Patient Department was larger than ever before. In 1912 the average daily number treated in this department was 238; in 1913 it was 244, and in 1914 it was 249.

The work in the public operating room continues to increase. The number of operations has increased 40 per cent. during the past five years. In 1914 there were 2,503 operations; 2,238 in 1913; 2,071 in 1912; 1,893 in 1911; 1,819 in 1910 and 1,509 in 1909. The number of operations in the private patients' operating room was somewhat less in 1914 than in 1913.

The rate for ward patients was increased from \$1.50 to \$2.25 a day. In 1914 the operating cost of caring for ward patients was \$2.46 a day.

AMBULANCE SERVICE.

The ambulance district, which had been covered by the House of Relief for many years, was divided by the Ambulance Service Board on December 1st. The new district of the House of Relief will have the same northern boundary as at present, running along Canal Street to Bowery to Park Row. From there the boundary line will be the west side of Park Row to Broadway; the west side of Broadway to Battery Park, including the south side of State Street. In the new district all of police precinct numbers two and four and part of precinct number six are included.

No change was made in the district covered by the New York Hospital.

The average daily number of calls responded to from the New York Hospital was 20 plus, the same as last year, and from the House of Relief 13 plus, one less than last year.

ADDITIONS AND REPAIRS.

The expenditures for additions and repairs were unusually heavy.

There was expended for new machinery for the laundry the sum of \$6,872.21. Two large metal washers of the most modern type, three over-driven extractors, a small mangle, and three steam pressers were installed. The laundry is now completely equipped with thoroughly up-to-date machinery. The result is that while the work done in this department has more than doubled during the past seven years, the number of hands employed has decreased from 23 to 20.

There was expended in extending and improving the laboratory the sum of \$3,918.48. In addition to the laboratory building, this department now occupies the entire second floor of the help's dormitory building.

There was expended in extending and improving the X-Ray Department the sum of \$2,824. It now occupies the entire first floor of the help's dormitory building. The work of this department is increasing rapidly, as is indicated by the expenditures for X-Ray plates. In 1910 we spent \$375 for these, and in 1914 \$4,529.79.

The store-room was moved to the basement of the nurses' home building.

Two residences on the north side of Sixteenth Street opposite the Hospital have been leased for a term of years and are occupied by nurses. It is estimated that the maintaining of these houses will increase the annual expenditures of the Hospital about \$7,500.

There was spent for constructing fire escapes on the Fifteenth Street side of the Hospital building and on the two leased houses in West 16th Street, the sum of \$1,104.

Connection by means of doors was made between the help's dormitory building and wards G and I. All of the wards on the west side of the Hospital building are now connected with the help's dormitory building. This not only facilitates our work, but would be of great value in case of fire.

A gift of \$250, by Col. Francis L. Leland, enabled the Hospital to build a platform outside one of the windows of the children's ward. It is used for giving the children fresh air treatment.

A new system for filing medical records was installed at an expense of \$600.

No important improvements were made at the House of Relief. The usual amount of painting was done at both institutions.

MUNICIPAL AID.

This year, for the first time, the New York Hospital and House of Relief received municipal aid in caring for patients. Only those patients unable to pay their own Hospital expenses, and accepted by the city authorities as emergency cases, are paid for. The rates established by the city are \$1.25 a day for adult surgical cases, \$1.10 a day for adult medical cases, and 45 cents a day for children. The amount paid to the Society by the City was \$30,600.75, of which \$24,424.40 was earned by the New York Hospital and \$6,176.35 by the House of Relief.

PENSION SYSTEM.

After carefully studying the subject for over a year, the Governors voted to establish a pension system for the New York Hospital, Bloomingdale Hospital for Mental Diseases, the House of Relief and the Campbell Convalescent Cottages.

This action was taken because the Governors felt that it would assist in making Hospital employment more attractive and thereby enable the institution to secure a more efficient and permanent body of workers.

The entire expense is borne by the Society, the employees not being required to contribute to the pension fund.

The plan adopted provides pensions for employees who have reached the age of 65 years and who have been in the service of the Hospital for 15 years; for those who have reached 60 years of age and who have been in the service for 20 years; for those who have reached 55 years of age and have been in the service 25 years; and for those who have completed 30 years of service, regardless of age.

A number of employees coming under the provisions of the pension system have been retired and pensioned.

HOUSE OF RELIEF—67 AND 69 HUDSON STREET

Completed 1894

WORKMEN'S COMPENSATION LAW.

The Workmen's Compensation Law took effect July 1st. It materially increases our clerical work, but it brings in an income to the Hospital more than sufficient to reimburse it for the expense incurred for additional clerks. The New York Hospital and House of Relief being located in districts where there are many factories and great industrial activity, are called upon to care for a great many accident cases. Between 400 and 500 cases, most of them of a trivial nature, are treated each month.

HYDRIATIC DEPARTMENT.

In this department treatment is furnished to ward, private room and out patients.

Men and women are treated on alternate afternoons. Expert operators are in constant attendance.

The average daily number of treatments in 1914 was 8+, the same as in 1913.

The number treated during the year is as follows:

	Male.	Female.	Total.	From Wards.	From O. P. Dept.	Total Treat- ments.	Average Day Treat- ments.
January.....	17	28	45	..	45	222	8+
February.....	18	27	45	1	44	167	6+
March.....	23	31	54	1	53	253	9+
April.....	24	35	59	2	57	289	11+
May.....	29	29	58	1	57	267	10+
June.....	25	26	51	1	50	217	8+
July.....	23	31	54	2	52	258	9+
August.....	18	26	44	3	41	139	5+
September.....	24	27	51	3	48	216	8+
October.....	29	33	62	5	57	295	10+
November.....	19	27	46	1	45	232	9+
December.....	21	25	46	3	43	243	7+
Total.....	270	345	615	23	592	2,798	8+

DENTAL CLINIC.

The work in this department continues to increase. A dentist is on duty four mornings of each week from 9:30 until 12 o'clock. Adults as well as children are treated, and there are no charges.

The number of patients treated in 1914 was 2,894 against 2,439 in 1913. There were 21 oral surgery cases, 686 alloy fillings, 265 oxyphosphate fillings, 927 extractions and 731 treatments.

Miss Susan V. Gifford, who was connected with the House of Relief for seventeen years, first as Matron and afterward as Assistant Superintendent, resigned December 1st, on account of ill health. Miss Gifford was an efficient officer, and loyal to the institution. Dr. A. H. Wilkinson, Assistant Superintendent at the Hospital, has been assigned to the House of Relief.

Mr. George F. Holmes, Assistant Superintendent at the Hospital, resigned in October to accept the superintendency of the General Memorial Hospital. He had served the Hospital faithfully for many years.

GIFTS.

This Hospital has been the recipient during the year of a large number of donations, such as books, toys, flowers, fruit, etc. These gifts, while ordinarily inexpensive, have as a whole assisted much in rendering hospital life more attractive, especially for the children. We desire to encourage these donations.

We are under obligations to the Employment Society of St. Thomas's Church and the Friends' Employment Society, and the New York House and School of Industry for a large amount of sewing done without expense to the Hospital. For statistics, see Statistical Report.

Respectfully submitted,

THOMAS HOWELL,

Superintendent.

REPORT OF THE MEDICAL BOARD OF THE NEW YORK HOSPITAL FOR THE YEAR ENDING DECEMBER 31, 1914.

To the Board of Governors of the New York Hospital:

GENTLEMEN:—The service at the Hospital and at the House of Relief during 1914 was one of activity and, in some directions, was more active than in the preceding year. At the Hospital, fewer patients were admitted to the wards, and there were also fewer new patients in the Out-Patient Department, but it may be noted, by reference to the statistical table, that there was an increase in the total days of hospital care and total visits in the Out-Patient Department respectively.

The surgical service was more active, in that 265 more operations were performed than during the previous year. The ambulance service was equally as active in 1914 as in the previous year.

At the House of Relief there were more admissions to the wards, fewer new patients treated in the Out-Patient Department, and a slight decrease in the number of ambulance calls. The increasing number of dispensaries in the lower section of the city, together with the diminishing area of the surrounding residential district, accounts mainly for the fewer patients treated in the Out-Patient Department. The difficulty also, of obtaining a sufficient number of assistants to work in the dispensary, has handicapped the work of the department, and if moderate salaries could be paid, it would remedy this difficulty and thus increase the activity and efficiency of the work. Owing to the loss of some of our ambulance territory in 1914, the number of ambulance calls will be less in the future, but it is, in a way, an advantage, as it will allow the interne staff to give more attention to the work in the wards.

The genito-urinary class, under the direction of Dr. Seay, continues its activity, and in 1914 there were 1,100 new patients treated, together with 8,074 total treatments. The efficiency of the cystoscopic work in the ward service has been promoted by placing it under the direction of Dr. Seay, since the cystoscopic examinations are now made promptly.

At the Hospital one important change made during the past year has been the installation of a new and improved system of filing the medical records of the Hospital. Such case records have heretofore been collected in chronological order and bound in large volumes, with card indices of the patients' names and of the diagnoses. As a result, the different case histories of any single disease were scattered widely throughout many volumes, and the work

of collecting such histories for the purpose of scrutiny and study was necessarily laborious and difficult. Under the new system histories are filed by diagnosis and placed in filing cases until these are filled; then the histories are bound in volumes, the grouping by diagnosis being retained. By this means, all the histories of each disease are grouped together and are readily accessible. In the indexing and filing of case histories, the system of nomenclature established at Bellevue Hospital, is used. The medical records have been installed in a much more commodious and suitable record room, and the new arrangement not only increases greatly the availability and usefulness of these records but, by its system of checks and controls, adds much to the accuracy of the records and to their security as well.

The plan, inaugurated during the year, of publishing from time to time a small Hospital Bulletin, containing news of the various activities and changes in the different institutions operated by the Society of the New York Hospital, has worked well and serves a useful purpose.

The enlargement of the quarters of the X-Ray Department is a noteworthy improvement, and with the increased area for its work the efficiency of this important department will benefit accordingly. Additional equipment in the way of a new machine, extra tables, as well as illuminating boxes for each medical and surgical division, has added materially in bringing the department to a proper standard. The number of cases examined in 1914 was 4,383, an increase of 239 over the preceding year, and owing to the increased number of gastro-intestinal cases examined there were many more plates used, since in each of these cases a series of plates were taken.

At the House of Relief a new and modern machine has been installed, and the quarters enlarged to meet the demands of the increased yearly work in this department.

The work of the Pathological Department for the year 1914 may be summarized as follows:

Post Mortem Examinations:	1913	1914
New York Hospital.....	108 25.4%	82 21.0%
House of Relief.....	50 27.6%	51 25.1%
	1913	1914
Bacteriological Examinations.....	1,938	1,940
Histological Examinations.....	1,039	1,292
Vaccines.....	110	74
*Hemoglobin Estimations.....	1,700	1,700
*Red Cell Counts.....	175	200
*White Cell Counts.....	6,200	6,300
*Differential Counts.....	6,700	6,700
*Malarial Examinations.....	175	150

* Many of these examinations were carried out in the wards by members of the House Staff.

	1913	1914
Widal Examinations.....	1,200	800
Sulphonephenolphthalein Tests.....	150	100
Stomach Contents Analyses.....	225	200
Sputum Examinations.....	1,500	1,800
Urine Analyses.....	13,000	14,000
Feces Examinations.....	1,300	1,400
Chest Fluid Examinations.....	80	80
Abdominal Fluid Examinations.....	35	30
Cerebrospinal Fluid Examinations.....	125	75
Milk Analyses.....	15	10
Nitrogen Partitions.....	25	20
* Wassermann Reactions.....	1,212	1,076
○Gonococcus Complement Fixation Tests.....	71	41
Guinea Pigs Inoculated for Diagnosis.....	60	70

* These reactions were performed at Bloomingdale by Dr. G. S. Amsden.

○These tests were performed by Dr. Schwartz at Cornell University Medical College.

Table indicating the total number of deaths, number of Coroner's cases and number of autopsies for the year 1914, compared with the preceding year:

	New York Hospital.		House of Relief.	
	1914	1913	1914	1913
Total number of deaths.....	389	425	203	181
Total Number of Autopsies.....	82	108	51	50
Number of Coroner's Cases.....	120	75	60	59
Number of Coroner's Autopsies.....	12 (5 by Path.)	7	6	12
Number of Hospital Cases.....	269	248	143	122
Number of Consent Autopsies.....	65	92	13	14
Number of Autopsies on Friendless.....	5	9	32	24

NOTE—An analysis of the preceding statistics shows that the actual and relative number of autopsies performed during the year 1914 is smaller than in the preceding year. In the New York Hospital proper this is due to the smaller number of so-called "consent" cases, while in the Hudson Street Branch it is due to the smaller number of Coroner's autopsies.

For expenses of the department see statistical report.

During the past year the quarters of this department have been considerably enlarged, an entirely new laboratory has been equipped for the use of the clinical pathologists and the interne staff, and extensive alterations have been made in the old laboratories.

The equipment of this department is now such as to meet all reasonable demands which might be made upon it, and the amount of room assigned to it is sufficient to accommodate several volunteer workers desirous of engaging in research work.

Radical changes have also been made in the work of the junior members of the interne staff. These have been assigned to the department to receive more thorough training in laboratory methods which, in the opinion of the Medical Board would tend

to make them more efficient agents in carrying out the work in the wards during the subsequent periods of their service in the Hospital.

This plan has yielded satisfactory results in so far as the medical branch of the service is concerned, but has fallen short of our expectations in so far as it applies to the surgical members of the staff. The experiences of the past six months have revealed the fact that with so few internes on the surgical divisions only a very limited amount of time can be devoted to special training of its members in the laboratories.

During the year clinical instruction has been given in the wards of the First Division by Drs. Conner, Gibson, and the Associates in their respective divisions. Clinics for medical students have been held in the operating room by Drs. Conner and Gibson. Public clinics have been held by Drs. Johnson, Pool and Turnure.

The creation during the year of the position of Syphilologist to the Hospital, and the appointment to this position of Dr. J. M. Kent, has resulted from a growing recognition of the importance of this subject and of the urgent need of systematizing and standardizing its methods of treatment. A special class in this subject, under the supervision of Dr. Kent, has been established in the Out-Patient Department, and to this all patients requiring such treatment are now sent. The Wassermann blood tests, which have become such an important laboratory procedure, and which hitherto have been made for the Hospital at Bloomingdale, are now made in the Hospital laboratory by Dr. Kent.

In the death of Dr. George L. Peabody the Medical Board has lost one of its most distinguished and most valued members. Dr. Peabody's association with the Hospital began thirty-five years ago when, in 1879, he was appointed to the position of Pathologist. In 1884 he was made an Attending Physician, and in that capacity served the Hospital with the utmost fidelity and with great distinction until his resignation in 1909. From that time until his death, on October 30, 1914, he held the position of Consulting Physician.

After fourteen years of active service as Attending Surgeon, Dr. A. B. Johnson, to the regret of the Medical Board, has resigned from the Attending Staff of the Hospital. His ability in the operative field, as well as his skill in surgical diagnosis, won the esteem and respect of his colleagues. Among his contributions to surgical literature are two important works on surgical diagnosis and operative treatment.

F. W. MURRAY, *President.*
L. A. CONNER, *Secretary.*

A list of the publications by members of the Medical Board is appended herewith:

REPORT OF THE TRAINING SCHOOL FOR NURSES FOR THE YEAR 1914

The Staff of the Training School on duty at the close of the year is as follows:

Officers of Instruction:

Directress.....	1
Assistant Directress.....	1
Clerical Assistant.....	1
Night Supervisor.....	1
In charge of Private Patients Building.....	1
In charge of Out-Patient Department.....	1
Operating Room Nurses (day).....	4
Operating Room Nurses (night).....	1
Head Ward Nurses.....	9
Graduate Nurses in charge of floors of Private Patients Building.....	3
Matron Nurses' Home.....	1
Dietitian.....	1

Pupils:

Seniors.....	21
Second Seniors.....	24
Intermediates.....	19
Juniors.....	36

The Training School consists of one hundred nurses distributed as follows:

Hospital wards, public and private.....	77
House of Relief.....	13
Lying-in Hospital.....	6
Sloane Hospital for Women.....	4

During the year 940 applications were received and considered, with the following result:

Accepted and entered on probationary duty.....	45
Accepted as pupils in the school.....	39
Resigned.....	4
Declined.....	2

During the year, seven pupils resigned for various reasons.

The general health of the pupils has been excellent. The total days of illness was 785, a decrease of 139 days from last year. The room in the Private Patients Building assigned to nurses during illness was occupied 730 days, of which 405 were by graduate nurses and 325 by pupils of the Training School. The Isolation

NEW YORK HOSPITAL—Nurses' Home
Suite of Rooms

Wards were occupied 98 days, with five cases of Diphtheria and three cases of Measles.

It is with sorrow that we record the death of Miss Amanda Swenson, a graduate of the Class of 1910, which occurred in this Hospital, to which she was brought after being injured by an accident in the discharge of her duty.

Thirty-four pupils finished the course, passed the final examinations and were awarded diplomas in 1914. The graduating exercises were held March 18th in the Governor's Room of the Administration Building. Mr. George L. Rives, President of the Hospital, presided. Professor Henry Fairfield Osborn delivered an address which was listened to with great interest, as he depicted the growth of the nursing profession, and showed an intimate sympathy with many of its aspects.

During the year, Miss Blanche Gibson, Assistant Directress of Nurses, who had been actively connected with this Hospital for seventeen years, resigned to assume the duties of Superintendent of the Training School of the Buffalo General Hospital, Buffalo, N. Y. While we are always glad to have our graduates called to such important positions, we cannot but regret the loss to our own School of such an efficient, broadminded and loyal officer.

At this time of great stress in Europe, our graduates have responded promptly and generously to the call for nurses in the war-stricken countries, and eighteen are now engaged there in various positions. Miss Anna L. Reutinger, who was for five years an officer in our School, was sent in charge of a unit under the auspices of the Red Cross Association.

There are certain urgent needs calling for attention and which seriously impair the effectiveness of the instruction.

First, a room for practical demonstration. This is a most important part of our instruction and worthy of a serious effort to provide accommodation. At present, as for some time past, we are forced to use makeshifts which prove awkward and inconvenient.

Second, increased accommodation for pupils. Perhaps this might be better said more *unbroken* accommodation. At present our pupils are disposed of in three separate buildings. Of these, two are rented dwelling houses outside the Hospital on the opposite side of the street. Such accommodations are inadequate. If the present Nurses' Home could be enlarged by an annex, all the pupils could be properly housed under one roof and the convenience and effectiveness of the School greatly enhanced.

Respectfully submitted,
ADELINE HENDERSON,
Directress of Nurses.

REPORT OF THE SOCIAL SERVICE DEPARTMENT

To the Board of Governors of the New York Hospital:

DEAR SIRs:—I wish to submit to you the following report of the Social Service Department for the past year. You will see by the statement of work that a considerable increase has been made over that accomplished in 1913, and we are glad to have been able to meet these extra demands as satisfactorily as the accompanying report shows.

Although we have not thought it advisable to attempt to raise money for the Department as "we did last year" by means of an entertainment, we hope, by private subscriptions, to collect enough for the expenses of the coming year.

The ladies of the Social Service Committee, and I, hope that you will approve of the work done by the Department as embodied in the report. Very respectfully yours,

ELEANOR ISELIN,

Chairman of Executive Committee.

Social Service Auxiliary to the New York Hospital.

To the Board of Governors of the New York Hospital:

GENTLEMEN:—I beg to submit the following report of the Social Service Department:

We have endeavored during the past year to make our services of value to the Hospital and doctors, as well as to the patients; continuing our work, in a general way, along the same lines as heretofore. Upon summing up the work (so far as work can be judged statistically) we find most of our figures of 1914 increased over those of 1913. Especially do we notice this in the amount of clothing, surgical appliances, supporters and Thanksgiving and Christmas dinners given, in the number of visits made and in the patients sent to convalescent and fresh air homes. There has been an increase in the number referred to co-operative agencies and a large increase in the number of letters written; also, in the number of calls made for the office and in the follow-up work for the medical staff of the hospital. But, the greatest gain for the year appears to have been made in that important branch—preventive work.

Through the kindness of the heirs of the Van Beuren Estate, the property opposite the Hospital, on 15th Street, was loaned to the Auxiliary for the use of children selected from the clinics. There children met in the garden, under supervision, from early summer to late autumn. They planted and cared for vegetable and flower gardens and were taught to make their own dresses from material supplied them, which they wore on their summer outings. They also made other garments which they cheerfully contributed to the

Social Service Department's stock and supply cupboard. A garden party for a hundred children and their mothers, was given in August by two members of the Auxiliary.

A large number of children were sent to boys' camps, fresh air and convalescent homes, aside from those sent to our own convalescent cottage, and our thanks are extended to the owners and staffs of these homes and camps where the children were so well and hospitably entertained.

At the present time five small boys are being taken care of for several months at private homes in the country. Four of these boys were on the border line of pulmonary tuberculosis, their home conditions were bad and they were, while in town, going rapidly down-hill. They are now attending school regularly and gaining in every way. The fifth boy had been admitted to the Hospital six times between June 29th and December 11th. The doctors came to the conclusion that his trouble (pernicious vomiting) was largely due to hysteria. They advised different home surroundings and careful training, which it was impossible to give him in his own home. He is now attending school and is well and happy.

The Young Women's Christian Association has very generously extended to us the use of a large, light room at a nominal rent, in order that the sewing classes of the summer might not be discontinued during the winter months. They have also put their recreation room at the disposal of the children after classes. Two sewing classes are held each Saturday. It is our aim not only to teach these children how to sew, but to look after their moral and physical condition, and in this we have been greatly aided by our three volunteer workers, who have done such faithful and good service. Thanks are also due the members of the Committee on Tuberculosis, who have given up so much time to prepare the work. About forty children have the benefit of these classes.

The above will show something of what we have accomplished through preventive measures.

June 1, 1914, the Auxiliary assumed the responsibility of paying the salary of the assistant to the head worker. Miss Sutcliffe, we are glad to say, still continues the work at the House of Relief. The salary of an additional member of the Staff was provided, from a private source, November, 1913, for one year. We are happy to say this help has been renewed. The workers on the staff, therefore, with the children's clinic and the tuberculosis clinic nurses, remain the same as last year, with the addition of a worker for one day a week, supplied last December through the Auxiliary.

Early in the year a committee was appointed from the Auxiliary to confer with the head worker and nurse of the tuberculosis clinic regarding tubercular patients presenting problems or needing relief.

Dinners were given at Thanksgiving and Christmas to many families connected with our Department. Fifty families were given Christmas gifts of warm clothing. On New Year's Eve a tree, toys, candy and entertainment were given to 440 children.

We wish to express our great appreciation of the co-operation extended by you, the Governors, the Officers and Staff of the Hospital, the head nurses of the dispensary and wards and the Staffs of our Convalescent cottages.

We are glad to make public acknowledgment of the co-operation given by the Relief and other Organizations of the City and by several of the churches. Especially do we thank one church for the giving of employment to several of our men.

The sum of money given to the Superintendent of the Hospital, and to the Chairman of the Tuberculosis Committee, by the Trustees of the Haven Fund has been of the greatest help. We are most grateful for all the aid given our people by friends of the Department, by gifts of clothing, books, toys, etc.

This report would be incomplete without an earnest expression of appreciation of the valuable work done by our Auxiliary. Without their aid and interest the work, which is now steadily growing, could hardly continue.

The following statements of work done during the year include all divisions of the Social Service Department:

Number of new cases.....	2,091
Visits made to patients, institutions, etc.....	4,974
Accompanied to trains, homes.....	160
Clinic sessions attended by workers.....	509
Referred to co-operative agencies.....	510
Sent to convalescent and fresh air homes.....	1,516
Sent to tuberculosis hospitals, sanatoria and pre-ventoria.....	84
Clothing given to families.....	335
Eggs dispensed.....dozen	2,186
Milk dispensed.....quarts	9,488
Referred to hospitals and dispensaries.....	338
Surgical appliances and supports given to.....	103
Thanksgiving baskets given.....	61
Christmas baskets given.....	73
Letters written.....	1,002

Received for special cases and causes over and above
amounts received from Treasurer of Auxiliary and
"Haven Fund".....\$453.37

Respectfully submitted,

HANNAH LOUISE JOSEPHI,

Head Worker.

THE SOCIETY OF THE NEW YORK HOSPITAL.

ANNUAL REPORT OF THE MEDICAL SUPERINTENDENT OF BLOOMINGDALE HOSPITAL, WHITE PLAINS, NEW YORK.

To the Board of Governors:

GENTLEMEN:—I beg to submit the following report of the operations of Bloomingdale Hospital for the year ending December 31, 1914:

GENERAL STATISTICS.

ADMISSIONS.

The number of admissions was 201. The number is 57 greater than in 1913 and the greatest in many years. Eighty-five were men and 116 were women. Fifteen fewer persons than cases were admitted, some having been received more than once. Ninety-eight,

making over 48 per cent. of the total admissions, were received on voluntary application without certification or commitment. Later commitment became necessary in 10 instances. The proportion of voluntary admissions was 5 per cent. greater than in 1913, and there has been a steady increase for several years. This is in accord with a growing tendency, in dealing with mental disorders, to emphasize the medical needs and not to apply legal procedures unless it is plain that they will serve some really necessary and useful purpose. The New York State laws now recognize the right of a person suffering from mental disorder to apply voluntarily and to be received for treatment without commitment in any chartered or licensed institution or in a State hospital. Many take advantage of this and certification and commitment as an insane person is no longer an indispensable preliminary to hospital treatment. The regulation and expert supervision of institutions by the State Government furnishes ample protection against improper detention or inhumane treatment. Commitment is, of course, still necessary in many instances. Experience indicates, however, that the present methods of receiving patients on voluntary application and under the regulations and expert supervision of the State Hospital Commission could be extended with advantage to the patients and to Society. Of the 186 persons who were received during the year, 63, or about a third, came to the Hospital within three months of the beginning of the disorder, and 92, or nearly half, came within six months. Great reluctance to seek treatment in a hospital for mental disorders is still prevalent. This is based principally upon ignorance and prejudice, but is not without some justification and can be overcome only by means of further elaboration and modification of hospital provision and methods as well as by spreading abroad correct information.

DISCHARGES.

The total number discharged was 188. Twenty-six of these were classed as recovered, 27 as much improved, 37 as improved, 24 unimproved, 23 died, and 36 were transferred to other institutions. One of those who were regarded as recovered had been under continuous Hospital treatment for nearly eight years. She returned to the occupation which she had followed previous to her illness, and is quite efficient. The number discharged to some degree of social efficiency equalled 45 per cent. of the number admitted. Of the 23 who died, 18 were men and 5 were women. The causes of death were: Among the women, organic brain disease in old age, drowning, and meningitis; among the men, cerebral arterio-sclerosis, pleur-

BLOOMINGDALE ASYLUM—1821

DEPARTMENT FOR MENTAL DISEASES

Site now Occupied by Columbia University

isy, paresis, pernicious anemia, myocarditis, cerebral syphilis, and alcoholism. The number who died was 4.18 per cent. of the total number under treatment during the year, and 12.23 per cent. of the number discharged.

As noted in the report of last year, the interest of the Hospital in the patients does not cease at discharge. A large proportion of those discharged are retained on the list of patients for varying periods up to six months, during which they may return to the Hospital without formalities. The average daily number who were thus carried was 23, and at the close of the year 21 patients who had left the Hospital were still on the books. By advice to the patient and to the family and, in some instances, by aid in securing suitable employment, treatment is extended beyond the period of Hospital residence. This method of working for the more complete restoration of the patient to social efficiency than can be accomplished by intrahospital treatment only, should, we believe, be looked upon as a definite and necessary part of the work. The patients received at this Hospital belong principally to the more productive classes, and their restoration to usefulness is a distinct contribution to the public good. The following occupations are represented among the men patients received during the year: Physicians 6; lawyers 3; teachers 6; chemists 2; engineers 3; manufacturers 5; writers 2; merchants 6; salesmen 9; musician 1; clerks 3; farmers 3; mechanics 3; dock master 1; dyer 1; gardener 1; restaurateur 1; tradesmen 3; and 12 were students. Only three of those admitted were said to have no occupation. Among the women admitted a very large proportion were wives and mothers who could ill be spared from their home and social duties. The following gainful occupations were also, however, represented among the women: Physicians 2; teachers 9; librarian 1; social workers 5; writers 4; nurses 5; designer 1; art critic 1; actress 1; stenographers 4; saleswomen 4; milliner 1; and 6 were students. The number who had been previously employed in gainful occupations made up 41 per cent. of the total number of women admitted. Better facilities for the supervision and guidance of discharged patients during the period of readjustment to normal contacts and activities are much heeded in the treatment of mental disorders. Especially is the need felt for convalescent homes and opportunities for work under favorable conditions pending complete restoration. Nothing of this kind is, so far as I know, provided in this country, and in no form of illness is such provision more appropriate or more urgently needed.

MEDICAL SERVICE.

The increased number of admissions made the work of the medical staff especially active. The lines of organized work referred to in the report of 1913 were adhered to in 1914. In addition to the regular staff conference, five special evening conferences were held during the year, in which physicians not connected with the hospital were asked to participate. These were well attended by the physicians of White Plains and vicinity and by some from New York and elsewhere. Contributions to the program were principally from members of the hospital staff. We are also indebted to Dr. Hoch, Director of the New York State Psychiatric Institute, to Dr. H. A. Cotton, Medical Director of the New Jersey State Hospital, to Dr. C. Macfie Campbell, Associate Professor of Psychiatry of Johns Hopkins Medical School, and to Dr. C. O. Cheney, Pathologist of the Manhattan State Hospital, for valuable contributions.

Dr. Lambert and Dr. Harrington of the hospital staff have, during the year, furnished the medical service for an out-patient mental clinic which has been established at White Plains under the auspices of the State Charities Aid Association. Most of the work of the clinic, thus far, has consisted in examining backward or otherwise difficult school children, and a room for the clinic has been provided in one of the schoolhouses by the School Board. The work furnishes an opportunity for the Hospital to be of service to the community in which it is located, and it is of advantage to the physicians to study the beginnings and earlier periods of mental disorders.

The laboratory work has been carried on as heretofore. The usual routine clinical and post-mortem work has been attended to. More than 1,000 Wasserman tests have been made for patients at the New York Hospital, and about 200 laboratory examinations have been made for patients at the Campbell Cottages. Some new equipment was added during the year, especially a high grade microscope, a projection apparatus, and a renal efficiency apparatus. The technique of the Abderhalden test was acquired, and the employment of the gold chloride reaction in the examination of spinal fluid was introduced. Ten autopsies were made, representing 63 per cent. of the deaths, and 580 slides were prepared from these for microscopic examinations.

The number of major surgical operations required during the year was unusually small, there being only three. There were twenty minor operations of noteworthy importance, and the usual number of dressings and other minor surgical procedures. The more important work has, as heretofore, been attended to by Dr. J.

Fielding Black of White Plains. The need of better facilities for surgery continues to be plainly felt.

A considerable number of cases of general paralysis have been treated by intra-spinal injections of Salvarsanized serum, with favorable results. At one of the quarterly conferences of medical superintendents with the State Hospital Commission held in Albany in November, Dr. Amsden, by invitation, presented a report of the results in the six cases which had been treated longest. This report will be published in the State Hospitals' Bulletin.

The dental work has, as heretofore, been attended to by Dr. D. Austin Sniffen of White Plains. The dentist makes systematic examinations of the patients and attends to whatever work may be needed to keep all mouths in sanitary condition, and to any other necessary work which may be authorized or requested by those responsible for the finances of the patients. During the year 318 different patients were examined by the dentist, the number of examinations being 637. A large amount of operative and conservation work was attended to.

The sanitary condition of the Hospital has been satisfactory during the year.

OCCUPATIONAL AND PHYSICAL TREATMENT.

Occupational and certain forms of physical treatment which require for their efficient application specially equipped and organized departments are among the most distinctive and important features in the Hospital treatment of mental disorders. Special attention has been given to the development of these departments and further development is still needed. For this reason it seems advisable to invite special attention to them in the report.

Although occupation, especially handwork, has from the beginning of systematic attention to the treatment of mental disorders been looked upon as one of the most helpful measures, it is only within recent years that it has been applied with much system or attempt at precision. At this Hospital, the first reference in the annual reports to an occupation department as at present organized was in that for 1908. It was stated that a small department for fancy manual occupation had been established for women patients under the charge of Mrs. Amsden, and that it was still in the nature of an experiment. In the report for 1909 it was stated that the occupation department had proved valuable and less expensive than was expected. In the 1910 report the value of the department was again referred to and it was stated that 52 patients were employed and a list of 587 articles made by them was given. The

report for 1911 stated that 70 patients had been given special training and 886 articles had been made. In 1912 the report showed that 125 patients had been employed. No mention was made of the number of articles made. The report for 1913 showed that 183 patients received attention in the department and that 10,452 articles were made and 5,719 were mended. During the year 1914 the number of patients who received attention in the department was 216; the number of articles made was 11,014 and the number mended 7,208. The number of articles made during 1913 and 1914 includes some plain sewing of which even before the department was organized, a certain amount was done by the patients, but was not recorded. This brief review of the development of this department fails to convey any adequate impression of what the work has done for the patients who have engaged in it. This cannot be presented statistically. The way in which it has developed shows, however, that it must supply a felt want and fulfil a useful purpose in the Hospital system of treatment.

The occupational department for men is of much more recent development than that of the women. After a preliminary attempt with a teacher who remained for a few weeks only, the work was fairly started on September 1, 1912. The annual report of that year gave the average number of patients who worked in the department to be 25. The report for 1913 stated that 69 men had received attention, and that 614 articles had been made and 409 mended. During the year 1914 the number of individual patients who received attention was 84; the number of articles made was 1,239, and the number mended 280. In addition, 16,861 pieces of printed matter were produced in the printing shop against 5,604 in 1913. A book repairing and binding department was also started in connection with the printing shop, with an output of 63 articles. Twenty-two patients also engaged in mechanical drawing and a party of eight or ten patients were employed in outdoor work. It is more difficult to find suitable occupation for the men than for the women, who have, as a rule, been always accustomed to some kind of handwork. A smaller proportion of men than women are occupied, and the men's department has not yet been developed as fully as we believe can be made possible. It is interesting to note that valuable assistance in the work has been given by some of the patients, two of whom have, through the year, conducted classes for women, and two of the men who are teachers by profession are now giving instruction in school work to some of the younger male patients.

In the report for 1913 attention was directed to the fact that the occupational department had outgrown the space available for

BLOOMINGDALE ASYLUM—1881
DEPARTMENT FOR MENTAL DISEASES
Site now Occupied by Columbia University

workrooms. It is gratifying to be able to add now that the Bloomingtondale Committee has very kindly voted to set aside the Dexter Cottage for the sole use of the women's department, and to permit the transfer of the printing shop to a large room in the basement under Hall 7, Men, providing it with equipment at a cost of \$300. The appropriation of \$15,000 for new workshops for the men, which was kindly voted by the Governors, will go far to provide for their needs.

In the physical treatment of the patients much benefit is derived from the therapeutic use of water, massage, outdoor air and sunshine, formal physical exercises and games, and invigorating and enlivening measures generally. In providing for the application of these with system and precision considerable organization and equipment are necessary. In the treatment of excitement, water is employed in the form of prolonged baths and wet packs. Special equipment is needed for these and this is provided. The treatment is applied by the nurses. Other methods of using water are by means of douches, sprays and vapor, which requires special apparatus for their application. The Hospital is equipped with this apparatus, which is placed in specially prepared rooms, there being separate departments for the men and for the women. Excellent work is done in these departments, each of which is under the direction of a trained hydrotherapist. The apparatus was, however, installed years ago, and improved types are now obtainable. The rooms are too inadequate for present standards and needs, and those for the men especially are not well located. It would add much to the value of these departments if they could be furnished with better quarters and equipment. A separate building, to be called a "Cure House," such as may be found in European institutions, was suggested in the report for 1913. By providing separate homes for the nurses, however, the quarters now occupied by employees of the domestic force could be vacated and used for the departments of hydrotherapeutics and other forms of physical treatment in the application of which the Hospital is somewhat limited by lack of facilities. The extent to which the use of water is employed in the special forms of treatment mentioned may be gathered from the following statistics for the year: The prolonged bath was used in the treatment of 132 patients who received in all 1,297 baths; wet packs were used for 75 patients, the number of packs given being 694; in the hydrotherapeutic rooms for treatment with sprays, douches, hot cabinet, etc., 120 patients were treated; the number of treatments was 3,564; massage was employed with or without hydrotherapy in the treatment of 106 patients, and 2,477 treatments were given.

In the annual report for 1912 mention was made of the employment of directors of physical training and games for the men and for the women. These departments have developed and the work during the past year is the best that has thus far been done. Each of the directors has been given an assistant, and in the women's department excellent help has been rendered by one of the patients and by the pupil nurses, who receive some instruction in physical exercises during their course of training. The number of patients who received attention in the departments during the year was 308, of which 161 were men and 147 were women. The following exercises and games are employed: Calisthenics with and without dumbbells, striking-bag, medicine-ball, Indian clubs, chest-weights, ring and bar stalls, basketball indoor and outdoor, handball, tennis indoor and outdoor, bowling, golf, field-hockey, baseball in and outdoor, roque, croquet, quoits, skating, skiing, etc. The physical directors and their assistants also take patients for country walks and picnics, and join with them in social parties and dances. The women have a good gymnasium but are much in need of a bowling alley. The men's gymnasium is quite dilapidated and inadequate and, just as the year had closed, their bowling alley was destroyed by fire. There is scarcely anything that would contribute more to the welfare of the men patients than a new gymnasium fully equipped with all modern improvements, including a swimming pool and a new bowling alley.

The grounds of the Hospital furnish for all the patients who are able to be out of doors facilities for access to fresh air and sunshine under attractive and favorable conditions. The halls and rooms are also arranged so as to secure the maximum of light and air. There are, however, always some patients who are too ill to walk or drive out and, in bad weather, all the patients are more or less restricted. In certain nervous states the sedative and soporific effect of outdoor air has a definite therapeutic value, so much so that even outdoor sleeping is desirable. Direct exposure to the sun's rays may also be applied for its invigorating effect. As the activity of the service increases and as the necessity of more precision in treatment becomes more apparent, the present facilities for outdoor treatment seem scarcely adequate. Roof gardens or more balconies, and open pavilions would add much to the resources of the Hospital in the application of the healing powers of outdoor air and sunshine.

THE NURSING SERVICE.

Owing to the increased number of admissions to the Hospital and the greater activity of the service, and also with a view to re-

ducing the working hours, the number employed in the nursing service has, during the year, been gradually increased towards the limit set by the budget. Progress has been made in the development of the school of nursing, though it has not been as rapid as is desired or needed. At the beginning of the year there were 2 pupils taking the three-years' course, and 35 the two-years' course. During the year 4 entered the former course and 42 the latter. At the close of the year there are 6 in the three-years' course and 40 in the two-years' course. Two graduate nurses were received during the year for the four months' post-graduate course. The Mt. Sinai Training School of New York affiliated during the year for three months' elective work in the nursing of mental disorders for third-year pupil nurses. Three of these pupils have been received thus far. Other schools have expressed interest in securing this advantage for their nurses, but we are unable to accommodate them for lack of room. The need of homes for the men and women of the nursing service is more than ever plainly felt. These homes would do much to facilitate progress in the development of the school and in advancing the nursing standards. Another advantage to the Hospital would be the release for the use of patients of at least twenty rooms which are now occupied by members of the nursing staff. Beginning January 1, 1915, two members of the school who are taking the three-years' course will take up that portion of the training which is given at the New York Hospital. A special assistant to the Directress of Nurses for technical nurse teaching was established during the year and the position filled by the appointment of Miss Gertrude Trefry, a graduate of the White Plains Hospital. Instruction in dietetics was given by Miss Theodora Root, dietician of the New York Orthopedic Hospital. The lack of a special diet kitchen both for the purposes of nurse instruction and for the preparation of sick diet is much felt. Besides the lectures given by members of the resident medical staff, lectures to the senior class were given by Dr. Black, the Hospital surgeon, and by Dr. Sniffen, the dentist.

The graduation exercises were held on June 6th. Diplomas were presented by President Rives to eight graduates. The address to the graduates was made by Mr. George P. Ludlum, Emeritus Superintendent of the New York Hospital.

On the same day the Board of Governors made the annual inspection of the Hospital.

IMPROVEMENTS ON EQUIPMENT AND PLANT.

The most important piece of construction work attended to during the year was a barber shop and smoking room attached to the

department for men. This was designed and erected by our own employees at a cost of \$3,500, which was provided from the appropriation of \$100,000 made by the Board of Governors two years ago. The building is not yet quite ready for use. The sleeping quarters for farm employees, over the carriage house, were completed at a cost of \$3,500. They accommodate 22 men and are entirely comfortable, sanitary and attractive. A wire and iron fence with brick gate posts topped by lanterns was erected at the rear of the service buildings at a cost of \$475. New and larger standpipes were placed in the Hospital buildings at a cost of \$2,300. The toilet rooms of Hall 4 on each side of the house were remodelled so as to dispense with the wooden stalls, and new plumbing fixtures were installed. An additional toilet room was provided for the employees' quarters over Hall 8, Men, and modern equipment installed. One of the toilet rooms in the quarters over Hall 3, Men, was enlarged and furnished with new fixtures. The employees' quarters over Halls 3 and 8 on each side of the house were rewired for electric lights and new fixtures installed at a cost of \$890.17. The Dexter Cottage was resingled, repainted, all the metal work replaced, and considerable alterations made in the building to render it suitable for use as an occupation department for the women. The work is not yet complete. The stables and cow barns were repainted and the gutters and leaders replaced in part with others of copper. The dormitory for farm men attached to the farmhouse was torn down and the exposed end of the house was renovated. The silo was removed from the garden and attached to the hay barn. Quite an attractive piece of road, made necessary by the sale of land to the Burke Foundation, was constructed near the southern boundary of the property. The old garage was remodelled for use as a paint shop and machine shop at a cost of \$400. Two rustic summer houses were erected in the women's recreation grounds, and six rustic lawn benches were purchased. One of the small dynamos was replaced at a cost of \$500. A room in the basement under Hall 7, Men, was fitted up and equipped as a printing shop at a cost of \$350. The men's workshop at the gymnasium was also improved by dividing off from the main shop a room for joinery and adding some equipment. The Nurses' Club Room in the Men's Gymnasium was improved by additional furniture, rugs and curtains. A filter for the lake water was installed at a cost of \$1,500. The medical library was improved by some additional shelving and furniture and new books. A moving picture machine was added to our resources, and on summer evenings pictures were displayed on an outdoor curtain for the benefit not only of our own patients but those from the convalescent homes and the crippled children from

BLOOMINGDALE HOSPITAL

DEPARTMENT FOR MENTAL DISEASES

WHITE PLAINS, NEW YORK

Completed 1891

St. Agnes' Hospital. Four pianos were purchased. A gas main was laid to connect the hospital with the Westchester Light and Power Company's system, at an expense of \$1,500. Much shrubbery which had become overgrown was thinned out and removed. A number of dead trees were cut down and much pruning done. Wheeled stretchers, operating tables, cabinets, screens, and other medical and nursing equipment were added during the year. Much interior painting was done and some new carpets and furniture added in the patients' quarters.

FINANCIAL.

The total number of patients treated during the year was 551. Of these 58 were cared for free, and 227 paid less than the average weekly cost of maintenance. The number thus cared for was 41.1 per cent. of the total number treated. The cost to the Society of the care and treatment of these patients was \$78,597.35, which is equivalent to the maintenance of 87 free beds. The John C. Green Memorial Fund furnished \$7,606.41 towards this expense, and was applied in accordance with the terms of the Memorial, to the support of 46 women. The average weekly per capita cost of maintenance was \$17.31. This includes the cost of maintenance of the properties at White Plains and Oakland Beach, which are used for the purposes of Bloomingdale Hospital, salaries and wages, supplies, ordinary repairs, and all other ordinary expenses. It does not include capital charges and amounts spent for extraordinary renewals and improvements for which special appropriations were made.

OAKLAND BEACH COTTAGE.

The Cottage at Oakland Beach was open from June 17th to October 15th. Ninety-one parties, consisting in all of 591 patients, visited the Cottage during this period, going over by automobile and remaining during the day, enjoying seaside pleasures and healthful exercises. Ninety patients remained at the Cottage for more than a day at a time, the average daily number in residence being eight. The motor boat gave much enjoyment, making 66 trips and carrying in all 442 passengers. One trip was made for the children of the Campbell Cottage. The amount received from patients for the use of the Cottage and for transportation was \$1,758, which scarcely pays the interest on the cost of the property.

CONVALESCENT COTTAGE FOR MEN.

The Cottage for convalescing men from the New York Hospital was, for the first time, kept open throughout the entire year. The

number of patients admitted was 212, and 7 remained from the previous year, making 219 who received treatment. The number of Hospital days was 3,351. The cost of maintenance for the Cottage for supplies and service was \$4,461.

NEEDS OF THE HOSPITAL.

During the coming year it will be necessary to replace three of the steam boilers at an expense of \$10,000. Some of the hot water boilers also require renewal at a cost of \$1,000. At the same time it would be advisable to make some changes in the pumping station at the lake, in the indirect heating and ventilating system, and to make provision for burning the garbage. The condition of the Hospital plant, considering its age and use, is generally good. Ordinary repairs and minor renewals and improvements are being constantly made out of the funds provided by the annual budget. Special funds are, however, required for changes and improvements which are needed to bring the structural conditions, the equipment, and facilities for treatment into harmony with the present-day standards, which are different from those of twenty years ago when the buildings were erected and furnished. The wooden stalls and trim in the bath and toilet rooms are in marked contrast with the type of construction employed now, and should be replaced with impervious material. Modern plumbing fixtures should also be installed. Some additional bath rooms would place the Hospital in position to supply more frequently the requests for private baths, which are increasing in number. The total expense for the bath and toilet improvements needed would be about \$25,000. Pantries, food lifts, and food conveyors should be made more sanitary and efficient. Woodwork should be replaced with metal and tile. Steam tables and cabinets should be installed, and the more expeditious electric power should take the place of hand power for the food lifts. The total expenditure required would be at least \$10,000, though if electric lifts were omitted the larger part of the expense would be avoided. The improvement of the employees' quarters begun two years ago should be completed. The expense would be about \$8,000. The hydrotherapeutic departments require better facilities. A small surgical operating room for each side of the house is much needed. The cost for each would be about \$4,000. Some additional expenditure for fire protection would also be advisable, though not urgently needed. An expenditure of about \$4,000 would provide for fire-proof doors at all stairway exits and at openings in division walls. A clock system to take the place of the present unreliable and expensive collection of clocks would facilitate good

order and efficiency. We are advised that the tower clock is worn out and will have to be replaced at a cost of about \$400. The cost of an electric clock system would probably be about \$3,500. An officers' call system would save much time and effort for the physicians and employees and for the patrons of the Hospital. The need of a new gymnasium for the men to take the place of the present inadequate building has been mentioned in previous reports. This has been accentuated by the loss of the bowling alley by fire and the damaged condition of the rest of the building. The cost of a suitable building in addition to the appropriation already made for a workshop would be about \$25,000. A bowling alley for the women's gymnasium is also desired, and would cost for building and equipment not over \$4,000.

One of the greatest needs of the Hospital is for Nurses' Homes. Encouraging progress has been made in the development of the training school and in raising the standard of nursing. The lack of suitable provision for the comfort and social life of the members of the nursing force is felt now to be the greatest obstacle.

In the further development of this department of the work of the Society of the New York Hospital it can be plainly seen that, the needs of the mentally sick, as they come to our attention, require, in addition to the provision already made, three lines of development: (1) Better provision in the city for receiving patients and for the treatment of acute conditions; (2) better separation of the different types of cases on the property at White Plains; (3) better provision for convalescence and a period of after-care. Practical plans for development in these lines could very readily be formulated, and though they would require large funds, they are so clearly what is needed to provide for wants that are widely felt that, if adopted by your Honorable Board, they would, I am sure, be carried into effect.

GENERAL.

The usual social dances and other entertainments for the patients were held during the winter months, and outdoor sports, picnic parties, drives and other outdoor exercises and pleasures were enjoyed throughout the year. Religious services were conducted as usual by the Chaplain, Rev. Frederick B. Van Kleeck, and his assistant, Rev. William H. C. Lylburn.

The following changes took place in the medical staff: Dr. Albert Durham resigned from the position of second assistant physician July 1. He had served the hospital with remarkable fidelity and ability for twenty-two years, and is much missed. On July 1 Dr. M. Louise Frazee, a graduate of Johns Hopkins Medical School, and

on September 23 Dr. James L. Tower, a graduate of Queen's University in Arts and Medicine, were appointed to the position of medical interne.

On July 1 Mr. Earl R. Quackenbush resigned from the position of Steward. He was succeeded on September 1 by Mr. Emil Strateman, who for fourteen years had served the Hospital acceptably in the positions of stenographer and Chief Clerk.

On June 20 Miss Mary C. Blanchard, who had for twelve years served the Hospital efficiently in the position of housekeeper, resigned. On September 15 she was succeeded in the position by Miss Rye Morley, who had just previously been Superintendent of Nurses of the Mt. Sinai Training School for Nurses in New York. On July 1, on account of a serious injury, Mrs. Medora Amsden, who had for six years conducted the occupational department for women, resigned. It was she who, as a labor of love, started the department in 1908, and by her unselfish earnest capability built it up to its present proportions. She was succeeded by Miss Pauline Gunderson, who had been her assistant. On August 18 Mr. R. Ellinger Blithe resigned as director of the men's occupational department. He was succeeded by Mr. Joseph H. Vertrees, a graduate of the Teachers' College of Columbia University. During the year the position of librarian and musician was established, and Miss Natalie M. Ashley, a graduate of the New England Conservatory of Music of Boston, was appointed. This position will, we believe, lead to the utilizing with more efficiency and precision the libraries and musical equipment. Forty-four volumes were added to the patients' library during the year. Miss Annie Purcell, who had been a faithful member of the nursing service for thirty-two years, died at the Hospital on August 17, 1914.

We are indebted to Miss Elizabeth Jordan and Miss Kate Douglas Wiggin for gifts of books, and to other friends in White Plains and New York for musical entertainments during the year.

Acknowledgment is due the members of the medical staff, the executive officers, and the employees for the loyal and efficient service which they rendered during an unusually active and, in some respects, an unusually difficult year.

To the Bloomingdale Committee and to your Honorable Board I beg to express again my appreciation of the wise guidance and support which I have unfailingly received.

Respectfully submitted,

WILLIAM L. RUSSELL,

Medical Superintendent.

REPORT OF THE ASSISTANT SUPERINTENDENT,
CAMPBELL CONVALESCENT COTTAGES,
WHITE PLAINS, NEW YORK.

To the Board of Governors:

GENTLEMEN:—I respectfully submit the following report of the convalescent women and children for the year 1914:

The cottages continue their activity of service, and there have been many interesting recoveries. While the number of patients admitted was somewhat less than that of last year, this is accounted for in the fact that a greater proportion of patients made a more or less lengthy stay, fully fifty per cent. of the women having been kept three weeks. Many of these women were too sick to improve noticeably in a fortnight, while others who were recovering from major operations were given every opportunity to return home with wounds entirely healed. Twelve cases were transferred to the Hospital during the year.

In several surgical instances the recoveries were very gratifying, proving what pure air, nourishing food and complete rest can accomplish. One woman who had undergone a serious operation and had been in the Hospital ward for five months, made the remarkable gain of seventeen pounds in three weeks. Her treatment consisted of daily dressing of the wound, extra nourishment and outdoor rest.

Contagion visited the institution several times, but with the exception of a somewhat severe form of measles in February, the various attacks were brief and mild.

It would be difficult to decide whether it is more gratifying to see a child gradually recover from a wound which had threatened to remain permanently unhealed, or to contemplate the case of a child whose condition would not justify a necessary operation, but who was so fully restored to health in the country that the operation was finally declared unnecessary.

The children who respond least satisfactorily to the labor spent on their behalf are marasmus babies and feeding cases. The older children are able to reap the full benefit of country air in all seasons, but the advantages of fresh air in cold weather are lost to the very young children who have no vitality. At intervals there are periods of many weeks during which there is no baby who could be discharged in good condition. Our experience in this particular coincides with the growing opinion of those who have interested themselves in various methods of infant care and feeding.

The automobile rides to the beach are one of the summer's greatest attractions, and on more than one occasion they have been supplemented by a ride in the Bloomingdale boat. The children also enjoyed motion pictures on the Bloomingdale lawns on the Fourth of July and other occasions.

The kindergarten and school department continues its pleasant instruction. Very few of our children have absorbed even a moderate amount of education, and their backwardness is painfully evident. The patient efforts of the teacher to develop their minds along individual lines are sometimes quite encouraging, particularly in the instances of children who remain in the cottages a considerable length of time. All the children join in the practical class work and show very pretty results in the spring exhibition of basket-weaving and drawings, and in the Christmas decorations.

Repairs to the hedge and the addition of rose bushes to the shrubbery have added to the attractiveness of the grounds. The annual indoor painting has been done, and the walls of the entire institution have been washed. The exterior woodwork and the iron fence have been given a fresh coat of paint. A few pictures purchased and others given to the institution have brightened several cottage walls.

Further protective measures against danger from fire have taken the form of a fire-proof ceiling in the cellar. The electric wiring has been overhauled by competent men, and is in good condition.

The winter brought many needy cases among both women and children, and the cry of poverty and distress was heard on all sides. Many friends had our women and children generously in mind at Christmas time, and perhaps it was because we were thus enabled to give so much pleasure to those who had expected so little that the past Christmas was the happiest the cottages have ever seen.

The institution is indebted to a number of friends for kindness which is shown in many forms from time to time, and which is a source of encouragement to those who have the welfare of the institution at heart.

The sympathetic advice of the Committee continues to encourage me in all my efforts.

Respectfully submitted,

ALICE C. ELLISON,

Assistant Superintendent.

CAMPBELL CONVALESCENT COTTAGES.

CAMPBELL CONVALESCENT COTTAGES, PLAY GROUND- WHITE PLAINS, NEW YORK

GOVERNORS

OF

THE SOCIETY OF THE NEW YORK HOSPITAL.

The following is a list of the names of Governors from its organization to the first of January, 1915, with the date of their respective elections and the length of time they continued in office:

GOVERNORS.	Elect- ed.	Re- signed.	Served the Institution.	
A.				
Charles Ward Apthorp.....	1770	1784	14 years	Died in office, 1819.
William Axtell.....	1770	1784	14 years	
John Alsop.....	1784	1788	4 years	
Gilbert Aspinwall.....	1799	1809	} 15 years	
Gilbert Aspinwall.....	1811	1812		
Gilbert Aspinwall.....	1815			
John Atkinson.....	1800	1809	9 years	Died in office, 1852.
John Aspinwall.....	1814	1817	3 years	
John Adams.....	1818	1854	36 years	
Stephen Allen.....	1823	1830	} 24 years	
Stephen Allen.....	1835			
Augustine Averill.....	1848	1857		9 years
John Jacob Astor.....	1860	1864	4 years	Died in office, 1879.
George W. Abbe.....	1877		2 years	
William W. Astor.....	1879	1882	3 years	
James W. Alexander.....	1904	1905	1 year	
B.				
Gerardus William Beekman....	1770	1777	7 years	Died in office, 1818.

PHYSICIANS AND SURGEONS.

The following is a list of the Physicians and Surgeons who have served the Institution in the order of their appointment, together with the date of their resignation or death, and their respective periods of service:

PHYSICIANS AND SURGEONS.		Elect- ed.	Re- signed.	Served the Institution.	
P.	Samuel Bard.....	1774	1797	23 years	
P.	Peter Middleton.....	1774	1791	17 years	
P.	John Jones.....	1774	1791	17 years	
P.	Malachi Treat.....	1774	1794	20 years	
P.	John Charlton.....	1791	1792	1 year	
P.	Thomas Jones.....	1791	1792	} 4 years	
S.	Thomas Jones.....	1792	1795		
S.	Richard Bayley.....	1792	1805	13 years	
S.	James Tillary.....	1792	1792	1 month	
S.	Wright Post.....	1792	1821	} 36 years	Died in office, 1828.
*Cons'g S.	Wright Post.....	1821			
S.	Richard S. Kissam....	1792	1796	} 29 years	Died in office, 1822.
S.	Richard S. Kissam....	1797			
P.	Samuel Nicholl.....	1792	1796	4 years	
P.	William P. Smith.....	1792	1796	4 years	
P.	J. R. B. Rodgers.....	1794	1807	13 years	
S.	Samuel Borrowe.....	1795	1817	22 years	
S.	Valentine Seaman....	1796		21 years	Died in office, 1817.
P.	Elihu H. Smith.....	1796		2 years	Died in office, 1798.
P.	Samuel L. Mitchell....	1796	1817	21 years	
P.	David Hosack.....	1797	1806	} 34 years	
P.	David Hosack.....	1807	1826		Died in office, 1832.
Cons'g P.	David Hosack.....	1826			
P.	William Hamersley ...	1798	1817	} 31 years	Died in office, 1833.
*Cons'g P.	William Hamersley ...	1821			
P.	Edward Miller.....	1806		6 years	Died in office, 1812.
P.	James S. Stringham...	1807		10 years	Died in office, 1817.
P. to L. A.	Archibald Bruce.....	1808	1817	9 years	
P.	John C. Osborne.....	1809		8 years	Died in office, 1817.
P.	Benjamin Dewitt.....	1809	1810	1 year	
S.	Valentine Mott.....	1817	1837	} 48 years	Died in office, 1865.
Cons'g S.	Valentine Mott.....	1837			
S.	Alex. H. Stevens.....	1817	1839	} 52 years	Died in office, 1869.
Cons'g S.	Alex. H. Stevens.....	1839			
P.	John Watts.....	1817	1829	} 14 years	Died in office, 1831.
Cons'g P.	John Watts.....	1829			
P.	John Neilson.....	1817	1819	} 13 years	
P. to L. A.	John Neilson.....	1819	1829		
C. P. to B. A.	John Neilson.....	1829	1830		
P. to L. A.	William Handy.....	1817	1819	2 years	
P.	Peter C. Tappan.....	1817	1824	7 years	
P.	Thomas Cock.....	1819	1834	} 50 years	Died in office, 1869.
Cons'g P.	Thomas Cock.....	1834			
S.	John C. Cheesman.....	1821	1856	} 41 years	Died in office, 1862.
Cons'g S.	John C. Cheesman.....	1856			

PHYSICIANS AND SURGEONS—Continued.

PHYSICIANS AND SURGEONS.		Elect- ed.	Re- signed.	Served the Institution.	
S.	J. Kearney Rodgers....	1822		29 years	Died in office, 1851.
P.	Samuel W. Moore.....	1824	1828	4 years	
P.	Stephen Brown.....	1826	1832	6 years	
P.	Fr. U. Johnston.....	1828	1848	} 30 years	Died in office, 1858.
Cons'g P.	Fr. U. Johnston.....	1848			
P. to B. A.	James Macdonald.....	1829	1830	} 6 years	
	James Macdonald.....	1832	1837		
P.	Joseph M. Smith.....	1829		37 years	Died in office, 1866.
P. to B. A.	Guy C. Bayley.....	1830	1832	2 years	
P.	John B. Beck.....	1832	1843	11 years

S.	George A. Peters.....	1860	1884	} 34 years	Died in office as Con- sulting Surg., 1894.
Cons'g S.	George A. Peters.....	1884			
P.	Thomas B. Dash.....	1862	1867	} 5 years	
P.	William H. Draper....	1862	1889		
Cons'g P.	William H. Draper....	1889	1893	} 39 years	Died in office as Con- sulting Phys., 1901.
P.	William H. Draper....	1893	1896		
Cons'g P.	William H. Draper....	1896			
S.	Henry B. Sands.....	1863	1882	} 20 years	
Cons'g S.	Henry B. Sands.....	1882	1883		
S.	Charles M. Allin.....	1865		15 years	Died in office, 1880.
P.	Gouverneur M. Smith..	1866	1879	} 32 years	Died in office as Con- sulting Phys., 1898.
Cons'g P.	Gouverneur M. Smith..	1879			
P.	Charles E. Hackley....	1866	1885	} 49 years	Continues in office as Cons'g Phys.
Cons'g P.	Charles E. Hackley....	1885			
P.	James W. McLane.....	1867	1884	} 45 years	Died in office as Cons'g Phys., 1912.
Cons'g P.	James W. McLane.....	1884			
S.	Ernst Kracowizer.....	1867		8 years	Died in office, 1875.

PHYSICIANS AND SURGEONS—Continued.

PHYSICIANS AND SURGEONS.		Elect- ed.	Re- signed.	Served the Institution.	
P.	Woolsey Johnson....	1872		15 years	
S.	Robert F. Weir.....	1876	1900	39 years	Continues in office as Cons'g Surgeon.
Cons'g S.	Robert F. Weir.....	1900		12 years	
S. to H. of R.	William T. Bull.....	1876	1888	26 years	
S.	William T. Bull....	1883	1900	30 years	Died in office as Cons'g Surg., 1909.
Cons'g S.	William T. Bull.....	1900		26 years	Died in office as Cons'g Phys., 1914.
P.	George L. Peabody...	1884	1909	20 years	Died in office as Cons'g Phys., 1908.
Cons'g P.	George L. Peabody...	1909		26 years	Continues in office as Cons'g Phys.
P.	A. Brayton Ball.....	1888	1905	22 years	Ret. 1909, Age Limit.
Cons'g P.	A. Brayton Ball.....	1905		22 years	Ret. 1909, Age Limit.
P.	Edward L. Partridge.	1888	1892	5 years	Continues in office as Cons'g S.
Cons'g P.	Edward L. Partridge.	1893			
S.	Lewis A. Stimson....	1888			
S. to H. of R.	Lewis A. Stimson....	1888			
Cons'g S.	Lewis A. Stimson....	1909			
P.	W. Gilman Thompson	1889	1895	6 years	
M. S. to B. A.	Samuel B. Lyon.....	1890	1911	21 years	
S.	Frank Hartley.....	1892	1912	21 years	Died in office as Cons'g Surg., 1913.
Cons'g S.	Frank Hartley.....	1912		22 years	Continues in office.
S.	Francis W. Murray...	1893		21 years	Continues in office.
Cons'g P.	L. Duncan Bulkley...	1894		12 years	
P.	Henry B. Loomis....	1895	1910	19 years	Continues in office as Cons'g Physician.
P.	Samuel W. Lambert..	1896			
Cons'g P.	Samuel W. Lambert..	1910			
P. to H. of R.	Lewis A. Conner.....	1896	1909	13 years	
S.	Francis H. Markoe...	1899		8 years	Died in office, 1907.
Cons'g S.	Charles McBurney....	1900		13 years	Died in office, 1913.
S.	Percival R. Bolton...	1900	1911	15 years	Continues in office as Cons'g Surgeon.
Cons'g S.	Percival R. Bolton...	1911		15 years	Continues in office.
S.	Alex. B. Johnson....	1900		10 years	Continues in office.
P.	Lewis A. Conner.....	1905		7 years	Continues in office.
A. P.	Hughes Dayton.....	1908		7 years	Continues in office.
A. P.	Nellis B. Foster.....	1908		7 years	Continues in office.
A. P.	Joseph C. Roper.....	1908		7 years	Continues in office.
A. P.	James C. Greenway..	1908		7 years	Continues in office.
A. S.	William A. Downes...	1908		7 years	Continues in office.
A. S.	Percy R. Turnure....	1908		7 years	Continues in office.
A. S.	Eugene H. Pool.....	1908		7 years	Continues in office.
A. S.	James M. Hitzrot....	1908		7 years	Continues in office.
A. P.	William R. Williams.	1910		5 years	Elected Phys. 1912.
P.	William R. Williams.	1912			Continues in office.
A. P.	Theo. B. Barringer, Jr.	1910		5 years	Continues in office.
A. P.	Edward Cussler.....	1912		3 years	Continues in office.
S.	Charles L. Gibson...	1913		2 years	Continues in office.
A. S.	Burton J. Lee.....	1913		2 years	Continues in office.

NOTE.—The above abbreviations are: P. for Attending Physician, S. for Attending Surgeon, Cons'g P. Consulting Physician, Cons'g S. Consulting Surgeon, B. A. Bloomingdale Asylum, M. S. to B. A. Medical Superintendent to Bloomingdale Asylum, S. to H. of R. Attending Surgeon to House of Relief, P. to H. of R. Attending Physician to House of Relief, A. P. Associate Attending Physician, A. S. Associate Attending Surgeon.

* There is no evidence that the position of Consulting Physician or Surgeon was created before 1821.
